State Court Improvement Program 2019 Annual Self-Assessment Report

This self-assessment is intended as an opportunity for Court Improvement Programs (CIPs) to review progress on required CIP projects, joint program planning and improvement efforts with the child welfare agency, and ability to integrate CQI successfully into practice. Questions are designed to solicit candid responses that help CIPs apply CQI and identify support that may be helpful.

I. **CQI Analyses of Required CIP Projects** (Joint Project with Agency and Hearing Quality Project) *It is ok to cut and paste responses from last year, but please update according to where you currently are in the process.*

Joint Project with the Child Welfare Agency:

Provide a concise description of the joint project selected in your jurisdiction.

Identify the specific safety, permanency, or well-being outcome this project is intended to address.

Approximate date that the project began:

Which stage of the CQI process best describes the current status of project work?

How was the need for this project identified? (Phase I)

What is the theory of change for the project? (Phase II) *If you do not yet have a theory of change and/or would like assistance, please indicate such in the space below.*

Have you identified a solution/intervention that you will implement? If yes, what is it? (Phase III)

What has been done to implement the project? (Phase IV)

What is being done or how do you intend to monitor the progress of the project? (Phase V). Be specific in terms of what type of evaluation (e.g., fidelity or outcome, comparison group, etc) or data efforts you have in place or plan to have in place to assess your efforts. If you have already evaluated your effort, how did you use this data to modify or expand the project?

What assistance or support would be helpful from the CBCC or Children's Bureau to help move the project forward?

Hearing Quality Project:

Provide a concise description of the joint project selected in your jurisdiction.

Approximate date that the project began:

Which stage of the CQI process best describes the current status of project work?

How was the need for this project identified? (Phase I)

What is the theory of change for the project? (Phase II) *If you do not yet have a theory of change and/or would like assistance, please indicate such in the space below.*

Have you identified a solution/intervention that you will implement? If yes, what is it? (Phase III)

What has been done to implement the project? (Phase IV)

What is being done or how do you intend to monitor the progress of the project? (Phase V) *Be* specific in terms of what type of evaluation (e.g., fidelity or outcome, comparison group, etc) or data efforts you have in place or plan to have in place to assess your efforts. If you have already evaluated your effort, how did you use this data to modify or expand the project?

What assistance or support would be helpful from the CBCC or Children's Bureau to help move the project forward?

II. Trainings, Projects, and Activities

For questions 1-9, provide a *concise* description of work completed or underway to date in FY 2019 (October 2018-June 2019) in the below topical subcategories.

For question 1, focus on significant training events or initiatives held or developed in FY 2019 and answer the corresponding questions.

On average, with ordinary funding levels, how many training events do you hold per year? What is your best prediction for the number of attorneys and judges that attend a training annually?

The Family First Prevention Services Act amends the Social Security Act adding an eligibility criterion for the training of judges and attorneys on the congregate care provisions of the Act. See the highlighted portion below.
(1)¹ IN GENERAL.— In order to be eligible to receive a grant under this section, a highest State court shall have in effect a rule requiring State courts to ensure that foster parents, pre- adoptive parents, and relative caregivers of a child in foster care under the responsibility of the State are notified of any proceeding to be held with respect to the child, shall provide for the training of judges, attorneys, and other legal personnel in child welfare cases on Federal child welfare policies and payment limitations with respect to children in foster care who are placed in settings that are not a foster family home, and shall submit to the Secretary an application at such time, in such form, and including such information and assurances as the Secretary may require, including—
States have an option to delay implementation of the congregate care provisions by two years. The decision will have a direct impact on when judicial determinations and CIP training requirements must begin.

Self-Assessment – Capacity Continued

We evaluate (beyond monitoring outputs) our efforts.

We would like you to assess your current capacities related to knowledge, skills, resources, and collaboration by responding to the following 2 sets of questions. In questions 6 and 7, we ask about CQI. When we say CQI we mean the entire change management process including root cause analysis, theory of change, strategy selection, implementation and evaluation.

APPENDIX A: DEFINITIONS

Definitions of Evidence

Evidence-based practice – evidence-based practices are practice that have been empirically tested in a rigorous way (involving random assignment to groups), have demonstrated effectiveness related to specific outcomes, have been replicated in practice at least one, and have findings published in peer reviewed journal articles.

Empirically-supported- less rigorous than evidence-based practices are empirically-supported practices. To be empirically supported, a program must have been evaluated in some way and have demonstrated some relationship to a positive outcome. This may not meet the rigor of evidence-base, but still has some support for effectiveness.

Best-practices – best practices are often those widely accepted in the field as good practice. They may or may not have empirical support as to effectiveness, but are often derived from teams of experts in the field.

Definitions for Work Stages

Identifying and Assessing Needs – This phase is the earliest phase in the process, where you are identifying a need to be addressed. The assessing needs phase includes identifying the need, determining if there is available data demonstrating that this a problem, forming teams to address the issue.

Develop theory of change—This phase focuses on the theorizing the causes of a problem. In this phase you would identify what you think might be causing the problem and develop a "theory of change". The theory of change is essentially how you think your activities (or intervention) will improve outcomes.

Develop/select solution—This phase includes developing or selecting a solution. In this phase, you might be exploring potential best-practices or evidence-based practices that you may want to implement as a solution to the identified need. You might also be developing a specific training, program, or practice that you want to implement.

Implementation – the implementation phase of work is when an intervention is being piloted or tested. This includes adapting programs or practices to meet your needs, and developing implementation supports.

Evaluation/assessment – the evaluation and assessment phase includes any efforts to collect data about the fidelity (process measures: was it implemented as planned?) or effectiveness (outcome measures: is the intervention making a difference?) of the project. The evaluation assessment phase also includes post-evaluation efforts to apply findings, such as making changes to the program/practice and using the data to inform next steps.
