

## Department of the Interior Museum Catalog Records Data Standards<sup>1</sup>

In an effort to increase accountability and improve the management of and public access to its museum collections, the Department of the Interior (DOI) uses the set of data standards identified below to catalog its museum objects housed at both bureau facilities and non-Federal repositories. Additionally, DOI is consolidating documentation by migrating catalog data to the Interior Collection Management System (ICMS).

DOI recognizes that non-Federal repositories may not have the information to complete all of the fields below for each object. DOI asks that non-Federal repositories voluntarily provide the data for as many fields as possible per object in an Excel spreadsheet or similar format. This will enable DOI to migrate the data into ICMS.

- A. For **all museum collections**, please record the following mandatory catalog data.
- (1) *Accession number.*
  - (2) *Catalog number.*
  - (3) *Discipline type and classification.* The disciplines used to classify and report DOI museum property are archaeology, archives, art, biology, ethnography, geology, history, and paleontology.
  - (4) *Object or scientific name.*
  - (5) *Unit acronym and/or identifier.*
  - (6) *Controlled property status.*
  - (7) *Item count or quantity.* Report item count, lot, bulk, and/or linear feet (archives only) as applicable.
  - (8) *Current location.*
  - (9) *Description.* In addition to physical description, this field may be used to record the object's associations with people, resources, or events, and interpretive and research data.
