FAADroneZone / Identification of Foreign Registered Civil Unmanned Aircraft Operating in the Airspace of the United States

The FAA extends the operational requirements of part 89 (remote identification of unmanned aircraft systems) to persons operating foreign civil unmanned aircraft in the United States. These persons have to comply with the remote identification requirements, which means that these persons have to operate foreign civil unmanned aircraft that qualify as standard remote identification UAS, limited remote identification UAS, or that have no remote identification equipment but are operated within an FAA-recognized identification area. The FAA allows a person to operate foreign-registered civil unmanned aircraft in the United States only if the person submits a notice of identification to the Administrator to enable the FAA to associate an unmanned aircraft to a responsible person. The authority for collecting the information you provide on the notice of identification is codified in 49 U.S.C. § 40103(b)(1) and (2), 49 U.S.C. § 44701(a)(5), Section 2202 of Public Law 114-190, 49 U.S.C. § 44805, 49 U.S.C. § 44805(b)(7), 49 U.S.C. § 44809(f), and 14 C.F.R. § 89.130.
