Form Approved OMB No. XXXX-XXXX Exp. Date xx/xx/xxxx

The course you are taking will contain presentation materials developed by the Mountain Plains Practice and Implementation Center (PIC), located at the University of Nevada, Reno. These materials are based on content developed by the Centers for Disease Control and Prevention (CDC).

This survey does not ask you for any personal identifying information and the results will only be used to assist us in determining the effectiveness of the course. The course instructor will not be able to view your individual responses or know if you completed this survey. Likewise, you are not required to complete this survey and your participation in this class will not be affected regardless of your decision.

Thank you for your time and enjoy the class.

1. Please enter the personal ID code you created for the pretest survey.

First letter of your mother's first name

First digit of your social security number

Last digit of your social security number

First letter of your mother's maiden name

The public reporting burden of this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333 ATTN: PRA (XXXX-XXXX)

Medical Assistants Follow-up Survey
The following items will be used only to describe the demographic makeup of the class.
2. Are you (choose one)
Male
Female
3. Are you Hispanic or Latino/a?
No
Yes
4. How do you describe your race? (check all that apply)
American Indian/Alaska Native
Asian
Black/African American
Native Hawaiian/Pacific Islander
White
5. In which state do you work?
6. In what type of medical setting do you work?
OB/GYN
Family medicine
Other (please specify)

The scenarios describe the alcohol use-related behaviors of two women. Please read each scenario carefully and respond to the questions that follow.

7. Scenario 1

Over the past few months, Sally has started to drink more than her usual amount of alcohol. In fact, she has noticed that she now needs to drink twice as much in order to get the same effect. Several times she has tried to cut down or stop drinking. However, each time she tried she became very agitated and couldn't sleep, so would start drinking and the symptoms would go away. Her family has complained that she is often hung over, moody, and has become unreliable – making plans one day and cancelling them the next. In fact, they report that she frequently calls them while intoxicated and has no memory of the calls or what she promised the next day.

In your opinion, how likely is it that Sally's situation might be caused by...

8. On a scale of 1 (Not at all) - 6 (Extremely), how likely would you be to									
	Not at all likely	2	3	4	5	Extremely likely			
feel ashamed if people knew someone like Sally was a member of your family?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
be uncomfortable having a conversation with Sally?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
be angry with Sally?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
believe that Sally's drinking is controllable?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
talk with Sally about her drinking?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
feel sorry for Sally?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
think that Sally's drinking is her own fault?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
interview Sally for a job if you were an employer?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
feel irritated with Sally?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
be likely to help Sally?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
feel sympathy for Sally?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
believe that Sally is responsible for her drinking?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
rent Sally an apartment if you were a landlord?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
be concerned about Sally?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			
try to stay away from Sally?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			

9. Scenario 2

During the past year, Jessica has started to drink more than her usual amount of alcohol. In fact, she has noticed that she now needs to drink twice as much in order to get the same effect. Three months ago, Jessica found out that she is pregnant and her doctor told her she should not drink alcohol during her pregnancy. Jessica has tried but so far has not been able to stop drinking. Some of Jessica's friends told her that when they were pregnant the taste and/or smell of alcohol made them sick. Jessica was hoping that she would have the same reaction, but that has not been the case. Out of concern for Jessica's health and the health of her baby, her family has tried several times to talk with her about it. However, they are telling her that she is being selfish and not behaving in the best interest of her child. This approach is only increasing how guilty and ashamed Jessica is feeling about not being able to stop. As a result, Jessica has become very secretive about her drinking, sneaking a drink whenever she has a chance.

In your opinion, how likely is it that Jessica 's situation might be caused by...

	Not at all likely	Not very likely	Neither likely nor unlikely	Somewhat likely	Very likely
her own bad character.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
a chemical imbalance in her brain.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
the way she was raised.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
stressful circumstances in her life.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
a genetic or inherited problem.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc

10. On a scale of 1 (Not at all) - 6 (Extremely), how likely would you be to									
	Not at all likely	2	3	4	5	Extremely likely			
feel ashamed if people knew someone like Jessica was a member of your family?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc

try to stay away from Jessica?	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc			

Medical Assistants Follow-up Survey
The following items deal with factors related to fetal alcohol spectrum disorders.
11. Fetal Alcohol Spectrum Disorders (FASD) is an umbrella term describing the range of effects that can occur in an individual whose mother drank alcohol during pregnancy.
True
False
12. FASD is preventable if a woman does not drink during her pregnancy.
True
False
13. The effects for FASD are always visible.
True
False
14. When is it safe to drink alcohol during pregnancy?
During the first three months
During the last three months
Once in a while
Never

Medical Assistants Follow-up Survey
15. How much alcohol is safe to drink during pregnancy?
One glass of wine
Two light beers
One shot of hard alcohol
None of the above
16. Screening for excessive alcohol use during pregnancy can be an effective strategy in reducing FASD.
True
─ False
17. How often do you talk to your patients or their parents/caregivers about prevention of excessive alcohol use?
Never
Occasionally
About Half the Time
Frequently
Always
18. The practice in which I work has a protocol to screen all patients about their alcohol use.
Yes
No
Don't know
Not applicable to the patients in my practice setting.

Medical Assistants Follow-up Survey
19. What does initial patient SCREENING for alcohol use consist of in your practice?
Informal questions (Do you drink? How often/much do you drink?, etc.)
Formal screening tool or evidence-based screening instruments (AUDIT, AUDIT-C, DAST, CAGE, etc.)
I don't know.
20. Who generally conducts the initial SCREEN for alcohol? (Check all that apply.)
Nurse (including nurse practitioner)
Social worker
Behavioral health specialist (coach)
Psychologist
Physician
Medical Assistant
Other (please specify)
21. Is screening for alcohol use followed by some type of intervention in your practice? (Check all that apply.)
No, there is no patient education or intervention done following the initial screening.
Yes, all patients are given educational materials/information on "safe" levels of alcohol and health risks associated with consuming too much alcohol.
Yes, patients who screen positive for risky alcohol use are asked follow-up questions and provided brief counseling.
Yes, patients who screen positive for risky alcohol use are asked follow-up questions and provided with additional resources (e.g., a list of treatment and/or counseling services in the community).

Medical Assistants Follow-up Survey

- 22. Who generally does the intervention in your practice? (Check all that apply.)
 - No one intervenes, to my knowledge
- Physician
- Physician's Assistant
- Psychologist
- Social worker
- Behavior health specialist (coach)
- Nurse (including nurse practitioner)
- Other (please specify)

23. Does your practice bill for screening and brief intervention services?

- Yes
-) No
-) Not sure

Medical Assistants Follow-up Survey

24. On a scale of 0-10 with 0 meaning "Completely Disagree" and 10 meaning "Completely Agree" to what extent do you agree with the following statements.

	0 (Completely disagree)	1	2	3	4	5	6	7	8	9	10 (Completely agree)
Alcohol consumption during pregnancy is more prevalent in women with lower incomes.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
Alcohol consumption during pregnancy is more prevalent in women with lower levels of education.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
Alcohol consumption during pregnancy is more prevalent in Anglo-white women.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc

25. Which of the following two statements best corresponds with your personal viewpoint (please check only ONE box).

Occasional consumption of one standard drink alcoholic drink per day or less (i.e., 1.5 oz. hard liquor, 12 oz. of beer or 5 oz. of wine) during pregnancy is not harmful to the mother or the fetus.

Pregnant women or women who are trying to become pregnant should completely abstain from consuming alcohol.

Medical Assistants Follow-up Survey

26. On a scale from 0 to 4 where 0 means you completely disagree with the statement and 4 means you completely agree, to what extent do you disagree or agree with the following statements.

	Completely disagree	Disagree	Neither agree nor disagree	Agree	Completely agree
It is important to routinely screen all patients for alcohol use	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
It is important to screen all pregnant women for alcohol use	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
It is important to screen all women of childbearing age, for alcohol use	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
I am comfortable asking women of childbearing age, including pregnant women, about their alcohol use	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
I am comfortable having a conversation with patients who indicate risky alcohol use.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
Screening for alcohol use confers a negative stigma to the woman being screened.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc

27. On a scale from 0 to 10 where 0 means "Not confident in my skills" and 10 means "Totally confident in my skills," how confident are you in your skills to do the following?

	0 (Completely disagree)	1	2	3	4	5	6	7	8	9	10 (Completely agree)
Inquire about potential prenatal exposure for pediatric patients	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
Screen women for risky or hazardous drinking	′	\bigcirc									
Educate women of childbearing age, including those who are pregnant about the effects of alcohol on a developing baby	•	\bigcirc									
Conduct brief interventions for reducing alcohol use	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
Utilize resources to refer patients who need formal treatment for alcohol abuse		\bigcirc									

28. To what extent to you agree with the following statements?

	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree
This training increased my understanding of the effects of prenatal alcohol exposure on the developing fetus.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
I have applied the concepts presented in this training.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
I have recommended this presentation to others.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc
Overall, I am satisfied with the quality of this training.	\bigcirc	\bigcirc	\bigcirc	\bigcirc	\bigcirc

Thanks for your participation!!!
