If you are conducting a focus group, survey, or plan to employ statistical methods, please provide answers to the following questions:

The selection of your targeted respondents

Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?
 [x] Yes[] No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

We have a listserv that we can use to contact potential survey respondents. The listservs are relatively small (~3000). We will send the surveys to all members of the listserv, so we do not have a sampling plan. We expect a response rate between 10 and 20% for surveys on use of newsletters and podcasts and as high as 50% for webinar participants. Information on responses rates is wide and varied. The actual response rate may be greater (or lower) than our estimate.
