Request for Approval under the "Generic Clearance for the Collection of Routine Customer Feedback" (OMB#: 0925-0648 Exp., date: 05/2021)

TITLE OF INFORMATION COLLECTION: 2021 Survey to Assess the Quality of Grant Review Among NIH Center for Scientific Review (CSR) Reviewers

PURPOSE: NIH depends on CSRs' peer review process to ensure that all NIH grant applications receive fair, independent, expert, and timely reviews that are free from inappropriate influences. To help assess and maintain the quality and efficiency of peer review at CSR, NIH has developed a new process that includes, among other measures, surveys to hear reviewers' opinions about the quality of the review in which they participated in. The survey will measure the panels' ability to score the applications, the expertise of the panel, the assignment of the applications, the usefulness of the discussions, and the scope of the study section. Feedback from reviewers will help CSR identify areas of success and room for improvements in the CSR review process. This collection is part of a larger and ongoing effort that includes the review of both secondary and primary research and evaluation activities as well as committees made of external experts from the scientific community and internal leaders from CSR and across NIH.

DESCRIPTION OF RESPONDENTS: Respondents will be approximately 1,000 NIH CSR grant reviewers serving on selected review meetings from January 2021 to December 2021. Most of these individuals are research scientists who work at academic universities across the U.S.
