

## Infant and Toddler Teacher and Caregiver Competencies Study: Program-Level Master Semistructured Interview Protocol

NOTE TO INTERVIEWER: *Throughout the protocol, question text instructs to “[SPECIFY COMPETENCY FRAMEWORK]” that is of focus in this case. Depending on what we learned during case exploration, system-level interviews, and screening there may be an alternative or familiar name for the framework or initiatives that use the framework that should be used instead of the formal name of the framework.*

### **INTRODUCTORY SCRIPT**

Thank you very much for agreeing to participate in this discussion. Your participation is very important to the study. My name is [LEAD INTERVIEWER] from Mathematica, an independent research organization. I am joined by [OTHERS ON CALL].

We are conducting a study for the Administration for Children and Families within the U.S. Department of Health and Human Services with approval from the Office of Management and Budget, Office of Management and Budget. This collection of information is voluntary and will be used to support efforts to improve the quality of care for infants and toddlers. Public reporting burden for this collection of information is estimated to average [SPECIFY 30 FOR CENTER-BASED TEACHERS OR 60 FOR FCC PROVIDERS OR DIRECTORS] minutes per response, including the time for reviewing instructions, gathering and maintaining the data needed, and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB number and expiration date for this collection are OMB #: 0970-XXXX, Exp: XX/XX/XXXX.

In this study, the Infant and Toddler Teacher and Caregiver Competencies (ITTCC) Study, we’d like to better understand different approaches to developing and implementing competency frameworks and assessing competencies for teachers and caregivers of infants and toddlers. We are focusing on using competencies for teachers and caregivers in group settings, including center-based and family child care settings. Ultimately, this information will support efforts to improve the quality of care for infants and toddlers.

We realize that the word “competencies” can mean different things to different people. For our project, we use the term “competency” to refer to a piece of knowledge, a skill, or an attribute essential to the practice of teaching and caring for infants and toddlers. A “competency framework” is a set of competencies that an organization or entity has compiled to convey the range of knowledge, skills, and attributes that a teacher or caregiver should have. Today, we wanted to speak with you about how your program uses the [SPECIFY COMPETENCY FRAMEWORK].

We will present our findings in an internal memo to the Administration for Children and Families, that will not be made public outside of the government agency. The internal memo will describe what we learn from you and others, and it will identify the competency framework we discussed but we will not attribute comments to specific individuals. In future public reports, we may highlight key lessons from our conversations and identify the competency framework we discussed but we will not identify you or your program by name.

I would like to record our discussion so I can listen to it later when I write up my notes. No one besides our research team will listen to the recording. If you want to say anything that you don't want recorded, please let me know and I will be glad to pause the recorder. We will delete all recordings at the end of the study. Please keep in mind that there are no right or wrong answers to any of the questions and you don't have to answer any questions you don't want to answer. You may withdraw from this study at any time without consequences. We expect this conversation to take up to [SPECIFY 30 FOR CENTER-BASED TEACHERS OR 60 FOR FCC PROVIDERS OR DIRECTORS] minutes. Please keep any information discussed today private to those participating in this interview. Do you have any objections to being part of this interview or to my recording our discussion?

If you think of resources or documents related to topics we discuss today that you think would be helpful for our team to review, please let me know. [IF SENT DOCUMENTS] This would be in addition to the resources that you already sent, which were very helpful so thank for taking the time to send those!

Do you have any questions before we begin?

In this interview we will ask you about the work you do related to [SPECIFY COMPETENCY FRAMEWORK]. We realize that your work since early 2020 will likely have been disrupted by the challenges of the COVID-19 pandemic. When you respond to the questions please consider both how you typically approached your work prior to COVID-19 and also whether and how that has changed due to COVID-19.
