Archeological and historical evidence link the inhabitants of the Piro Province to the present-day inhabitants of the Pueblo of Ysleta del Sur of Texas. Based on material culture, site organization and architecture, site AR 03-03-03-334 has been identified as a small, prehistoric Puebloan habitation site that was occupied between A.D. 900 and A.D. 1250/1300, in the Piro Province of central New Mexico. The present-day descendants of the Piro Province populations are the Pueblo of Ysleta del Sur of Texas. Oral traditions provided by representatives of the Pueblo of Ysleta del Sur of Texas support cultural affiliation.

Officials of the Cibola National Forest have determined that, pursuant to 25 U.S.C. 3001 (9-10), the human remains described above represent the physical remains of one individual of Native American ancestry. Officials of the Cibola National Forest also have determined that, pursuant to 25 U.S.C. 3001 (3)(A), the 15 objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Cibola National Forest have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Pueblo of Ysleta del Sur of Texas.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains and/or associated funerary objects should contact Dr. Frank E. Wozniak, NAGPRA Coordinator, Southwestern Region, USDA Forest Service, 333 Broadway Boulevard SE, Albuquerque, NM 87102, telephone (505) 842-3238, before May 19, 2008. Repatriation of the human remains and associated funerary objects to the Pueblo of Ysleta del Sur of Texas may proceed after that date if no additional claimants come forward.

Cibola National Forest is responsible for notifying the Pueblo of Ysleta del Sur of Texas that this notice has been published.

### Document Availability

Individuals wishing copies of the habitat conservation plan and associated documents for review should immediately contact the above office. Documents also will be available for public inspection, by appointment, during normal business hours at the above address.

### Background

Section 9 of the Act and Federal regulation prohibit the "take" of a species listed as endangered or threatened, respectively (take is defined under the Act, in part, as to kill, harm, or harass a federally listed species). However, we may issue permits to authorize "incidental take" (defined by the Act as take that is incidental to, and not the purposed of, the carrying out of an otherwise lawful activity) of listed species under limited circumstances. Regulations governing permits for threatened species are promulgated in 50 CFR 17.32; regulations governing permits for endangered species are promulgated in 50 CFR 17.22.

The Maytag Trail would be located on Douglas County open space property. The Maytag Trail is a component of a regional trail system. The proposed trail and associated facilities will consist of:

A main trail 8 feet wide and about 5,820 feet long;

Two trail loops 4 feet wide and about 3,030 feet long;

A trail overlook encompassing about 0.25 acres; and

A trailhead consisting of about 1.4 acres.

The trail surface will be soft (crusher fines or crushed recycled concrete) or native surface as appropriate for the trail segment considering use and drainage.

Only one federally listed species, the threatened Preble's meadow jumping mouse occurs on site and has the potential to be adversely affected by the proposed trail project. To minimize and mitigate impacts that may result from incidental take of the mouse, the Country has agreed to: (1) coordinate with the Colorado Division of Wildlife to design and align the trail to minimize potential impacts to the mouse; (2) plant 20 gambel oaks (south gulch crossing) and 25 coyote willows (north gulch crossing) where the trail crosses mouse habitat to provide additional cover in the vicinity of the trail; (3) provide only in-kind services to the Colorado Division of Wildlife to assist them in determining the effects of the trail on the mouse; (4) manage the riparian areas of the property for mouse conservation; and (5) limit trail use and construction to daylight hours when the mouse is inactive.

We have made a preliminary determination that the County's Plan qualifies as a "low-effect" habitat conservation plan as defined by our Habitat Conservation Planning Handbook (November 1996). Low-effect habitat conservation plans are those involving: (1) minor or negligible effects on federally listed and candidate species and their habitats; and (2) minor or negligible effects on other environmental values or resources. The Maytag Trail Plan qualifies as a low-effect habitat conservation plan for the following reasons:

1. Approval of the Plan would result in minor or negligible effects on the mouse and its habitat. The County's management of the property as open space will likely have beneficial effects to the mouse. We do not anticipate significant direct or cumulative effects to the mouse resulting from construction or use of the trail.

3. Approval of the Plan would not result in any cumulative or growth inducing impacts and, therefore, would not result in significant adverse effects on public health or safety.

4. The Project does not require compliance with Executive Order 11988 (Floodplain Management), Executive Order 11990 (Protection of Wetlands), or the Fish and Wildlife Coordination Act, nor does it threaten to violate a Federal, State, local, or Tribal law or requirement imposed for the protection of the environment.

5. Approval of the Plan would not establish a precedent for future action or represent a decision in principle about future actions with potentially significant environmental effects.

We, therefore, have preliminarily determined that approval of the Plan as a categorical exclusion under the National Environmental Policy Act, as provided by the Department of the Interior Manual (516 DM 2, Appendix 1 and 516 DM 6, Appendix 1). Based upon this preliminary determination, we do not intend to prepare further National Environmental Policy Act documentation. We will consider public comments in making a final determination on whether to prepare such additional documentation.

This notice is provided pursuant to section 10(c) of the Act. We will evaluate the permit application, the Plan, and comments submitted therein to determine whether the application meets the requirements of section 10(a) of the Act. If it is determined that those requirements are met, a permit will be issued for the incidental take of the Preble's meadow jumping mouse in conjunction with the construction and use of the Maytag Trail. The final permit

decision will be made no sooner than 30 days from the date of this notice.

Dated: May 26, 1999.
