Information Collection Request
1140-XXXX
Reciprocity Questionnaire - ATF Form 8620.59

SUPPORTING STATEMENT

A. JUSTIFICATION

1. Necessity of Information Collection

Pursuant to the Memorandum of Understanding (MOU) between the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) and the Office of Personnel Management (OPM), dated March 3, 2000, ATF is authorized to conduct personnel security and suitability background investigations and periodic reinvestigations. Investigations are conducted on applicants and employees in competitive service positions, as well as candidates, contractors, task force officers (TFOs), or volunteers/interns in ATF service provider positions. All personnel security investigations are conducted in accordance with the Intelligence Reform and Terrorism Prevention Act of 2004, 5 C.F.R. Part 736, and Executive Orders 13467 and 13764.

ATF recruits individuals for placement into full-time equivalent Federal positions and solicits individuals through the Federal acquisition process, to fill non-ATF personnel (contractors, TFOs, and volunteers/interns) positions. Candidates who are tentatively selected for positions must meet Federal, Department of Justice (DOJ), and ATF basic qualification requirements, before they may be granted access to ATF information, information technology (IT) systems, and/or unescorted access to ATF facilities. Individuals will not be granted access if they fail to comply with these requirements and receive an unfavorable adjudication of their background investigation and/or polygraph examination (special agent applicants only).

2. Needs and Uses

The Reciprocity Questionnaire - ATF Form 8620.59 will be used to collect personally identifiable information (PII), to begin the eligibility determination process for granting a candidate (respondent) access to ATF information, IT systems, and/or unescorted access to ATF facilities. This collection includes information relating to previous background investigations, security clearances, and polygraph examinations (if applicable).

ATF's Personnel Security Division (PSD) staff will compare the respondent's completed ATF Form 8620.59, to the risk sensitivity level of the position for which they are being considered. Based on this analysis, a determination will be made whether prior background investigations and polygraph examinations conducted by other Federal agencies, may be reciprocally accepted. If a prior investigation, clearance level, and/or polygraph examination meet or exceed the requirements of the position, it may be

reciprocally accepted in lieu of conducting a new background investigation and/or polygraph examination. By accepting reciprocal investigations and/or examinations, ATF and the Federal government experience budgetary cost savings. The respondent also benefits from the acceleration of the background investigation through the Federal personnel security process.

3. Use of Information Technology

ATF makes every effort to take advantage of electronic collection and dissemination capabilities available. The fillable ATF Form 8620.59 (with electronic signature capability) will be available on the ATF portal for download and distribution by ATF sponsors (human resources specialists and contracting officer's representatives (CORs) to respondents. The form will be emailed to respondents along with submission instructions for returning the completed package to ATF for processing. Respondents will be able to electronically complete the form, print, and mail it to a specific address provided by ATF. Respondents will also have the option of electronically submitting an encrypted or password protected completed form by email. Individuals with disabilities will also be able to access and complete this form. ATF will try to implement a fully electronic submission process, which would reduce the public cost burden for mailing completed forms.

4. Efforts to Identify Duplication

ATF uses a uniform subject classification system for forms to identify duplication and to ensure that any similar information already available cannot be used or modified for use for the purpose of this information collection.

5. Minimizing Burden on Small Businesses

This collection of information has no impact on small businesses. The information sought is in response to ATF's evaluation of the respondent's eligibility for employment. The purpose of creating a record is to gather required information to start the respondent's Federal personnel security process.

6. Consequences of Not Conducting or Less Frequent Collection

ATF must ensure that all employees and non-ATF personnel have the highest degree of integrity and character, while maintaining the safety and security of ATF information, IT systems, and facilities. ATF would be unable to ensure the safety and security of its resources without this information collection. A candidate's onboarding for employment would also be delayed without this information collection.

7. Special Circumstances

This information collection requirement is consistent with the intent of Executive Order 13764, and the MOU authorizing ATF to conduct personnel security and suitability background investigations and periodic reinvestigations. The information

sought allows ATF to determine if a candidate for employment previously completed a background investigation and/or polygraph examination with another Federal agency. No other circumstance would cause this to be conducted in any other manner such as:

- Requiring respondents to report information to ATF more often than quarterly;
- Requiring respondents to prepare a written response in fewer than 30 days after receipt of the questionnaire;
- Requiring respondents to submit more than one original copy of any document;
- Requiring respondents to retain any records;
- Requiring the use of any statistical data;
- Requiring any pledge of confidentiality; or
- Requiring respondents to submit any proprietary or trade secrets.

8. Public Comments and Consultations

No comments were received during the 60-day Federal Register notice period. However, a 30-day notice will be published in the Federal Register in order to solicit public comments.

9. Provision of Payments or Gifts to Respondents

No decision of payment or gift is associated with this collection.

10. Assurance of Confidentiality

Confidentiality is not assured. Information collected by the PSD is protected by the Privacy Act of 1974 and will not be released to outside parties, unless authorized as set forth in the Privacy Act of 1974.

11. Justification for Sensitive Questions

Respondents are required to provide PII, including full name, Social Security Number (last four digits), date of birth, place of birth, current citizenship, and aliases to verify their identity and citizenship. This information collection also protects the respondents from the collection of erroneous information and significantly reduces any likelihood of false records.

12. Estimate of Respondent's Burden

It is anticipated that 2,000 respondents will complete this form annually. Each respondent will respond one time per year. It is estimated that it will take 10 minutes to complete the form. The total number of annual burden hours associated with this collection is 333 hours.

13. Estimate of Cost Burden

The estimated cost per respondent is \$1.00. At \$0.10 a page, each respondent will need to complete the 2-page information collection for \$0.20. Mailing costs are \$0.55 per ounce. Therefore, the total estimated cost burden of this form is \$2,000. (2,000 respondents * \$1 (paper and postage rounded up) = \$2,000).

14. Cost to Federal Government

There is no cost to the Federal government.

15. Reason for Change in Burden

There are no changes associated with this submission, as this is a new collection of information.

16. Anticipated Publication Plan and Schedule

ATF will not publish this information collection.

17. Display of Expiration Date

ATF is not requesting approval to omit the expiration date for this information collection.

18. Exception to the Certification Statement

There are no exceptions to the Certification Statement.

B. STATISTICAL METHODS

1. None
