ASSIGNMENT MESSAGE:

Deaths and serious injuries to children, which may be associated with a variety of products, may be assigned throughout the year, depending upon Commission requirements. For serious incidents not specifically addressed in the Criteria & Rationales, assignments should be made after consultation with Headquarters' staff.

Determine product description, brand name, model; photograph product if possible. Determine age of product, manufacturer, and place of purchase.

Determine sequence/scenario of events, treatment administered and patient disposition. If more than one person involved, explain how others were involved. Collect all official documentation (paramedics, police, and coroner reports, medical records, death certificate).

Determine if product failure or faulty product design was a factor.

If entrapment played a role in the incident, obtain dimensions of the area of entrapment. Re-enact the entrapment using a doll or stuffed animal.

If there are broken parts, collect the parts and/or the product as a sample.

Please include all primary and all backup contacts in the distribution of the completed IDI.
