EZ Form Qualification

Filing Id: IB2014000014

Based on your answers to the previous qualifying questions, it appears that you are qualified to file your application using the EZ process. However, before you move to the next section, there are two things you need to consider.

1. Schedule B data that can impact your EZ status
 - a. Antenna Elevation angle [question B6 (E)(F)] must be between 5 degrees and 90 degrees.
 - b. Emission Designator [question B7E] must not include NON.

If you proceed to Schedule B and you enter data that does not comply with the above qualifiers, **you will not be able to file your application via EZ. Instead, you will be required to file your application using the long Form 312 (see button below)**. Data previously entered will not be carried over to the long form.

2. Last opportunity to edit responses to the qualification questions.

By pressing the 'Continue' button below, you will leave the qualification section and move to the technical section of the application. Once you are in the technical section of the application, **you will not be able to return to the qualification section and change your responses**. Please take a moment to review your responses. You may access the questions by using the links on the right side of this page.

Once you are satisfied your responses are correct, press 'Continue' to move to the Technical Section of the application.

If you are unsure of your responses, you can press 'Save Draft and Return to Workspace.' This will take you to your Account page. You may return to your draft application to complete it at any time.

If you know you do not qualify to file the 312 EZ form, press 'File a Long Form 312'.
