

Privacy Impact Assessment Form

v 1.47.4

Status

Form Number

Form Date

Question

Answer

1 OPDIV:

2 PIA Unique Identifier:

2a Name:

3 The subject of this PIA is which of the following?

- General Support System (GSS)
 Major Application
 Minor Application (stand-alone)
 Minor Application (child)
 Electronic Information Collection
 Unknown

3a Identify the Enterprise Performance Lifecycle Phase of the system.

3b Is this a FISMA-Reportable system?

- Yes
 No

4 Does the system include a Website or online application available to and for the use of the general public?

- Yes
 No

5 Identify the operator.

- Agency
 Contractor

6 Point of Contact (POC):

POC Title POC Name POC Organization POC Email POC Phone

7 Is this a new or existing system?

- New
 Existing

8 Does the system have Security Authorization (SA)?

- Yes
 No

8b Planned Date of Security Authorization

 Not Applicable

11 Describe the purpose of the system.

Modernization Platform (MPN) is a strategic effort to align existing National Institute for Occupational Safety and Health (NIOSH) investments to open standards and modern data services. This platform provides a framework to effectively manage and provide oversight of NIOSH Information Technology (IT) systems while encouraging the adoption of the NIOSH Analytical Data Warehouse (ADW) and CDC Cloud Strategy.

The platform supports the replacement and limited redevelopment of NIOSH applications using agile methodologies. The platform will be Federal IT Acquisition Reform Act (FITARA) compliant in planning, programming, and budgeting and is FISMA (Federal Information Security Management Act) Moderate.

12 Describe the type of information the system will collect, maintain (store), or share. (Subsequent questions will identify if this information is PII and ask about the specific data elements.)

MPN maintains Social Security Numbers (SSN), names, email addresses, mailing/physical addresses, phone numbers, medical notes, certificates, date of birth (DOB), photographic identifiers, biometric identifiers, demographics (ethnicity and gender), medical record numbers, military and employment status.

Other related data include the types of injuries/fatalities involved in incident, general time and physical location information related to incident, general exposures, work behaviors, cancer diagnoses, and other relevant risk factors with the intent to monitor cancer incidence and other health related risk factors. Also, desensitized narratives from surveys and injury context are collected.

All full time employees and contractors that utilize MPN use CDC user credentials/PIV card to access the system in conjunction with Active Directory (AD) Services within the CDC/Agency for Toxic Substances and Disease Registry (ATSDR) Enterprise. AD has its own system and PIA. Authorized System users have AD accounts with role-based access to the information system. Some contractors use CDC credentials to work on behalf of the agency.

External partners authenticate via Secure Access Management Services (SAMS), which has it's own PIA.

13 Provide an overview of the system and describe the information it will collect, maintain (store), or share, either permanently or temporarily.

MPN helps to store and share information amongst the NIOSH divisions which are located in various states. The information collected is accessed by authorized NIOSH employees, giving them the ability to enter, search, and view collected data.

MPN collects and maintains identifying information about the workers involved in the safety incident such as participant names to ensure collected data is associated with the correct person. DOB is collected to understand relationship between age and safety. Medical information (medical notes, medical records number, biometric identifiers, medical/health history) is collected to understand the safety and health risks of certain tasks and/or environments.

Demographic information like ethnicity or gender is collected to understand the role of ethnicity and gender in safety. Contact information is to ensure that program participants can be contacted. Employment status and work history is collected to understand how a worker's role and industry employment relates to safety.

Other data collected includes the types of injuries/fatalities involved in incident for safety incident type classifications, general time and physical location information related to incident to understand environmental context. Also, desensitized narratives, from surveys, that may help clarify what the root causes and contributing factors were for the incident. Injury context is collected in order to organize each safety incident into quantifiable data that can be analyzed.

MPN collects external users' business contact information (email and phone number) for account set up and user support.

All full time employees and contractors that utilize MPN use CDC user credentials/PIV card to access the system in conjunction with Active Directory Services within the CDC/ATSDR Enterprise. AD has its own system and PIA. External partners authentication via Secure Access Management Services (SAMS), which has it's own PIA.

14 Does the system collect, maintain, use or share PII? Yes No

15 Indicate the type of PII that the system will collect or maintain.

- Social Security Number
 - Name
 - Driver's License Number
 - Mother's Maiden Name
 - E-Mail Address
 - Phone Numbers
 - Medical Notes
 - Certificates
 - Education Records
 - Military Status
 - Foreign Activities
 - Taxpayer ID
 - Date of Birth
 - Photographic Identifiers
 - Biometric Identifiers
 - Vehicle Identifiers
 - Mailing Address
 - Medical Records Number
 - Financial Account Info
 - Legal Documents
 - Device Identifiers
 - Employment Status
 - Passport Number
- Demographic info
- Medical/Health history
- Ethnicity
- Gender

Question 15 Comments

Per Q12, states "military and employment status" is collected by the system. Please select "Military Status" in your answer as well.
Additionally, please also list "ethnicity and gender."

16 Indicate the categories of individuals about whom PII is collected, maintained or shared.

- Employees
 - Public Citizens
 - Business Partners/Contacts (Federal, state, local agencies)
 - Vendors/Suppliers/Contractors
 - Patients
- Other

17 How many individuals' PII is in the system?

18 For what primary purpose is the PII used?

MPN collects external users' business contact information (email and phone number) for account set up and user support. MPN collects and maintains identifying information about the workers involved in the safety incident such as participants' names to ensure collected data is associated with the correct person. DOB is collected to understand any relationship between age and safety. Medical information (medical notes, medical records number, biometric identifiers) is collected to understand the safety and health risks of certain tasks and/or environments.

19 Describe the secondary uses for which the PII will be used (e.g. testing, training or research)	Secondary uses for collecting PII include informing workers of study findings, analyzing data, administering surveys, contacting participants, verifying the miner's identity, to keep records of procedures performed within the system, and for user account setup and user support.	
20 Describe the function of the SSN.	MPN uses miner's SSN to search for data, verify identity, and group radiographs taken during a miner's lifetime. SSN is also used in determining whether a match is for a particular worker. The set of information which MPN and the data source have in common typically consists of SSN, name, date of birth, and gender. These fields are used to ascertain whether a linked record for a worker is a true match, a false match, or whether it remains unclear. Without the SSN, many of these determinations would be impossible.	
20a Cite the legal authority to use the SSN.	Federal Mine Safety and Health Act, Sections 203 and Occupational Safety and Health Act, Section 20	
21 Identify legal authorities governing information use and disclosure specific to the system and program.	Occupational Safety and Health Act, Section 20, "Research and Related Activities" (29 U.S.C. 669); Federal Mine Safety and Health Act of 1977, Sections 203, "Medical Examinations" and 50I, "Research" (30 U.S.C. 843, 95I); Public Health Service Act, Section 301, "Research and Investigation" (42 U.S.C. 241).	
22 Are records on the system retrieved by one or more PII data elements?	<input checked="" type="radio"/> Yes <input type="radio"/> No	
22a Identify the number and title of the Privacy Act System of Records Notice (SORN) that is being used to cover the system or identify if a SORN is being developed.	Published: 09-20-0149 Morbidity Studies in Coal Mining, Metal and Non-metal Mining and General Industry. Published: <input type="text"/> Published: <input type="text"/> <input type="checkbox"/> In Progress	

23 Identify the sources of PII in the system.

Directly from an individual about whom the information pertains

- In-Person
- Hard Copy: Mail/Fax
- Email
- Online
- Other

Government Sources

- Within the OPDIV
- Other HHS OPDIV
- State/Local/Tribal
- Foreign
- Other Federal Entities
- Other

Non-Government Sources

- Members of the Public
- Commercial Data Broker
- Public Media/Internet
- Private Sector
- Other

23a Identify the OMB information collection approval number and expiration date.

OMB 0920-0953 Expires 08/31/2021
OMB 0920-0260, Expiration: 10/31/2020

24 Is the PII shared with other organizations?

- Yes
- No

24a Identify with whom the PII is shared or disclosed and for what purpose.

Within HHS

Other Federal Agency/Agencies

PII is provided to allow users to contact the publication author with questions/comments.
The Mine Safety and Health Administration (MSHA) may be provided PII when needed, as NIOSH runs the Coal Workers' Health Surveillance Program (CWHSP) on their behalf.
PII is provided to IRS for matching with their database in order to identify addresses for workers. PII is also provided to Department of Energy in order to obtain additional exposure data and study data.

State or Local Agency/Agencies

PII is provided to allow users to contact the publication author with questions/comments. PII is also provided to the State statistic offices and state cancer registries.

Private Sector

PII is provided to allow users to contact the publication author with questions/comments.
Analysis files not containing direct identifiers may be shared with collaborators or researchers interested in replicating the study, either through a data use agreement or at a research data center.
Lab testing with Clinical Laboratory Improvement Amendments (CLIA) certified lab

24b Describe any agreements in place that authorizes the information sharing or disclosure (e.g. Computer Matching Agreement, Memorandum of Understanding (MOU), or Information Sharing Agreement (ISA)).

Agreements are in place for data sharing as follows:
1) Data exchanged with National Death Index (NDI) is governed by the NDI process which includes an application process with protocol review of new studies.
2) Data exchanged with the Internal Revenue Service (IRS) is governed Under Title 26 – Internal Revenue Code 6103(m)(3), (https://www.irs.gov/irm/part11/irm_11-003-029) as amended (Appendix A) and Public Law 96-128, title V, Sec. 502, as amended, (<http://thomas.loc.gov/cgi-bin/bdquery/z?d096:HR02282:@@D&summ2=m&>). NIOSH has been granted authority for this type of search and has been vetted by IRS to gain access and the use of their secure FTP site.
3) Data exchanged with Department of Energy (DOE) Inter-agency Agreement to collect study records from the various sites.
4) Data exchanged with state Vital Records departments are governed by an approval process with each state at the time requested.
5) Data exchanged with state cancer registries are governed by an approval process with each state at the time requested.
7) Study analysis files not containing direct identifiers are governed by Data Use Agreements or by restricted access through National Center for Health Statistics (NCHS's) Research Data Center.

24c Describe the procedures for accounting for disclosures

Health Management Systems (HMS) Federal has established the International Organization for Standardization (ISO) 9001 procedures for accounting for disclosures under this system.

This is maintained by the system owner. Within this disclosure ledger includes the date, the name (the address if known) of the entity of the receiving person or agency, a brief description of the information disclosed, and a brief purpose of the disclosure (or a copy of the disclosure request).

This ledger is captured in a spreadsheet.

25 Describe the process in place to notify individuals that their personal information will be collected. If no prior notice is given, explain the reason.

The National Firefighter Registry Consent Form explains how the firefighter information will be kept private and requires them to sign granting NIOSH permission to collect and use the data when requesting access to participate in the NFR.

When voluntarily signing up for an account, individuals provide business contact information. The website form describes the information collection and the use of PII. Users requesting access to the system for a specific role will be notified during the request either verbally or by email that their user Id will be stored. New employees are notified via email or verbally that their information will be stored.

26 Is the submission of PII by individuals voluntary or mandatory?

- Voluntary
- Mandatory

<p>27 Describe the method for individuals to opt-out of the collection or use of their PII. If there is no option to object to the information collection, provide a reason.</p>	<p>Participation is voluntary and initiated by the users. Users opting to participate are required to provide business contact information as needed for account setup and user support. Once established, users can opt out by contacting eidtechinfo@cdc.gov and their account will be disabled.</p>										
<p>28 Describe the process to notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of original collection). Alternatively, describe why they cannot be notified or have their consent obtained.</p>	<p>Users are notified of system updates via the email address they provide. Major changes in the use of PII are not anticipated and have not occurred.</p>										
<p>29 Describe the process in place to resolve an individual's concerns when they believe their PII has been inappropriately obtained, used, or disclosed, or that the PII is inaccurate. If no process exists, explain why not.</p>	<p>If PII has been inappropriately obtained, used, or disclosed, or if the PII is inaccurate, an individual can contact the systems program manager at eidtechinfo@cdc.gov.</p> <p>Concerns about PII can be directed to NIOSH MPN administrators at nioshpia@cdc.gov. The administrators will direct the concern to the system security steward who will reach out to the individual and division management, NIOSH's Information System Security Officer, and CDC's Privacy Office for an appropriate resolution.</p>										
<p>30 Describe the process in place for periodic reviews of PII contained in the system to ensure the data's integrity, availability, accuracy and relevancy. If no processes are in place, explain why not.</p>	<p>PII contained in the system is reviewed by MPN administrators weekly and any incorrect information is remedied. Additionally, users or authors may request their information be updated by sending an email to the system administrators.</p> <p>Integrity checks include: the data entry staff verify that PII matches the form when entering the data, entered data are compared to appropriate valid ranges of values, databases are designed to eliminate redundancies, and database constraints require values for critical fields and disallow invalid values. Workers' addresses are updated prior to notifications.</p> <p>Users may update their email address and phone number by sending updates to eidtechinfo@cdc.gov. Reviews are conducted by NIOSH's Project Manager.</p>										
<p>31 Identify who will have access to the PII in the system and the reason why they require access.</p>	<table border="1"> <tr> <td data-bbox="727 1348 951 1472"> <input checked="" type="checkbox"/> Users </td> <td data-bbox="956 1348 1416 1472"> <p>Program researchers will have access to their program's PII data in order to conduct analysis. Users are able to respond to inquiries</p> </td> </tr> <tr> <td data-bbox="727 1478 951 1602"> <input checked="" type="checkbox"/> Administrators </td> <td data-bbox="956 1478 1416 1602"> <p>For creating user accounts and communicating system status and providing user support.</p> </td> </tr> <tr> <td data-bbox="727 1608 951 1667"> <input type="checkbox"/> Developers </td> <td data-bbox="956 1608 1416 1667"> </td> </tr> <tr> <td data-bbox="727 1673 951 1759"> <input checked="" type="checkbox"/> Contractors </td> <td data-bbox="956 1673 1416 1759"> <p>Direct contractors serving as users administrators.</p> </td> </tr> <tr> <td data-bbox="727 1766 951 1822"> <input type="checkbox"/> Others </td> <td data-bbox="956 1766 1416 1822"> </td> </tr> </table>	<input checked="" type="checkbox"/> Users	<p>Program researchers will have access to their program's PII data in order to conduct analysis. Users are able to respond to inquiries</p>	<input checked="" type="checkbox"/> Administrators	<p>For creating user accounts and communicating system status and providing user support.</p>	<input type="checkbox"/> Developers		<input checked="" type="checkbox"/> Contractors	<p>Direct contractors serving as users administrators.</p>	<input type="checkbox"/> Others	
<input checked="" type="checkbox"/> Users	<p>Program researchers will have access to their program's PII data in order to conduct analysis. Users are able to respond to inquiries</p>										
<input checked="" type="checkbox"/> Administrators	<p>For creating user accounts and communicating system status and providing user support.</p>										
<input type="checkbox"/> Developers											
<input checked="" type="checkbox"/> Contractors	<p>Direct contractors serving as users administrators.</p>										
<input type="checkbox"/> Others											

<p>32 Describe the procedures in place to determine which system users (administrators, developers, contractors, etc.) may access PII.</p>	<p>MPN utilizes Role Based Access Control (RBAC) that enforces the most restrictive permissions for authorized users based on their role. The Business Stewards determine which users can access PII based on their job role. Authorized administrators and users are the only ones who can access the PII and they are authenticated against a list of users via Active Directory. The Business steward ensures users complete tasks with only the privilege necessary to perform their separate job functions. Administrators access PII in order to run reports and update the documentation criteria.</p>	
<p>33 Describe the methods in place to allow those with access to PII to only access the minimum amount of information necessary to perform their job.</p>	<p>MPN personnel are identified at the project level by role, and only appropriate personnel with the requisite skills and knowledge are assigned to the project in the required role. System users and administrators are given access based on the principles of least privilege. Least Privilege model is applied, ensuring privilege levels no higher than necessary to accomplish required functions.</p>	
<p>34 Identify training and awareness provided to personnel (system owners, managers, operators, contractors and/or program managers) using the system to make them aware of their responsibilities for protecting the information being collected and maintained.</p>	<p>All users complete Security and Privacy Awareness Training at least annually.</p>	
<p>35 Describe training system users receive (above and beyond general security and privacy awareness training).</p>	<p>The Division of Field Studies and Engineering (DFSE) annually provides 308(d) training that includes Confidentiality as well as Privacy Act and security training. System administrators complete HHS Role Based Training at least annually.</p>	
<p>36 Do contracts include Federal Acquisition Regulation and other appropriate clauses ensuring adherence to privacy provisions and practices?</p>	<p><input checked="" type="radio"/> Yes <input type="radio"/> No</p>	
<p>37 Describe the process and guidelines in place with regard to the retention and destruction of PII. Cite specific records retention schedules.</p>	<p>NIOSH handles and retains information system output and retention in accordance with the CDC Records Management Policy. CDC Records Control Schedule and other applicable record scheduling procedures prescribed by the General Records Schedule (GRS) and National Archives and Records Administration (NARA). System stewards consult with the CDC Records Manager to identify applicable records scheduling requirements and otherwise manage electronic records.</p> <p>Records Schedule 16, Item 14 Records Schedule N1-442-09-1, item 3 (4-57) Records Schedule is N1-442-09-1, item 2 Records Schedule N1-GRS-98-2 item 23 Records Schedule CDC N1-442-2009-01, item 3 and 4 Records Schedule N1-442-09-1 GRS 20.2D</p>	

38 Describe, briefly but with specificity, how the PII will be secured in the system using administrative, technical, and physical controls.

Administrative: only authorized employees can access using PIV card and system authentication.
The business steward authorizes new users for the system. Data is secured by Active Directory and access is only granted to users authorized by the business steward. Data is stored on an encrypted database server. The servers and hard-copy records reside in secured facilities which require PIV card access. Comprehensive security plans are formalized through the Security Assessment and Authorization (SA&A) process to validate compliance with Federal Information Security Management Act (FISMA) requirements.

Technical: both database layer and application layer access is controlled by PIV card (network user credentials) to prevent unauthorized access. PII is secured on the CDC network using network shares and Server databases that limit access to the appropriate staff. The network is protected with firewalls, and intrusion detection systems. All users complete Security and Privacy Awareness Training at least annually.

Physical: Hosted and stored on the consolidated web server and database server which is located in a locked secure CDC facility, secured with guards, ID badges, key cards and closed circuit television (CCTV) with access only by authorized badged staff or escorted visitors.

39 Identify the publicly-available URL:

MPN is a platform framework that involves multiple URLs.

43 Does the website contain links to non- federal government websites external to HHS? Yes No

REVIEWER QUESTIONS: The following section contains Reviewer Questions which are not to be filled out unless the user is an OPDIV Senior Officer for Privacy.

Reviewer Questions		Answer
1	Are the questions on the PIA answered correctly, accurately, and completely?	<input type="radio"/> Yes <input type="radio"/> No
Reviewer Notes <input type="text"/>		
2	Does the PIA appropriately communicate the purpose of PII in the system and is the purpose justified by appropriate legal authorities?	<input type="radio"/> Yes <input type="radio"/> No
Reviewer Notes <input type="text"/>		
3	Do system owners demonstrate appropriate understanding of the impact of the PII in the system and provide sufficient oversight to employees and contractors?	<input type="radio"/> Yes <input type="radio"/> No
Reviewer Notes <input type="text"/>		
4	Does the PIA appropriately describe the PII quality and integrity of the data?	<input type="radio"/> Yes <input type="radio"/> No
Reviewer Notes <input type="text"/>		
5	Is this a candidate for PII minimization?	<input type="radio"/> Yes <input type="radio"/> No
Reviewer Notes <input type="text"/>		

Reviewer Questions		Answer	
6	Does the PIA accurately identify data retention procedures and records retention schedules?	<input type="radio"/> Yes <input type="radio"/> No	
Reviewer Notes	<input type="text"/>		
7	Are the individuals whose PII is in the system provided appropriate participation?	<input type="radio"/> Yes <input type="radio"/> No	
Reviewer Notes	<input type="text"/>		
8	Does the PIA raise any concerns about the security of the PII?	<input type="radio"/> Yes <input type="radio"/> No	
Reviewer Notes	<input type="text"/>		
9	Is applicability of the Privacy Act captured correctly and is a SORN published or does it need to be?	<input type="radio"/> Yes <input type="radio"/> No	
Reviewer Notes	<input type="text"/>		
10	Is the PII appropriately limited for use internally and with third parties?	<input type="radio"/> Yes <input type="radio"/> No	
Reviewer Notes	<input type="text"/>		
11	Does the PIA demonstrate compliance with all Web privacy requirements?	<input type="radio"/> Yes <input type="radio"/> No	
Reviewer Notes	<input type="text"/>		
12	Were any changes made to the system because of the completion of this PIA?	<input type="radio"/> Yes <input type="radio"/> No	
Reviewer Notes	<input type="text"/>		
General Comments	Q10: The National Firefighter Registry (NFR) is being added as a sub-system of MPN and therefore, NFR data will reside in MPN. NFR will be used to track and analyze on-the-job exposure to toxicants, cancer trends and risk factors among the U.S. fire service to help the public safety community, researchers, scientists and medical professionals find better ways to protect those who protect our communities and environment. Collected data will be stored by unique participant ID and will be stored in a secure database with multiple layers of encryption.
