Table of Contents

1. Introduction

The purpose of this document is to list all the data elements collected online through the Fellowship Management System (FMS). The FMS online application module is a streamlined mechanism for applicants of the Centers for Disease Control and Prevention (CDC) fellowships to submit their information online and track statuses of the application processes (e.g., all required materials received, invited for interviews). The FMS is a robust flexible framework and the FMS Application Module is tailored successfully for various CDC fellowships:

1. Epidemic Intelligence Service (EIS)
2. CDC E-learning Institute (ELI)
3. Epidemiology Elective Program (EEP)
4. Future Leaders in Infections and Global Health Threats (FLIGHT)
5. Laboratory Leadership Service (LLS)
6. CDC Steven M. Teutsch Prevention Effectiveness (PE) Fellowship
7. Public Health Associate Program (PHAP)
8. Public Health Informatics Fellowship Program (PHIFP)
9. Science Ambassador Fellowship (SAF)
10. Preventive Medicine Residency and Fellowship (PMR/F)
11. Population Health Training in Place Program (PH-TIPP)

1.1 Document Structure

This document is broken down by the major pages of the FMS Application. In this document, each page of the FMS Application has sections and some sub-sections. In addition, application instructions, login, and registration pages are included. Instructions and emails in the FMS Application are tailored to each CDC fellowship's requirements, eligibility criteria, information, and timeline.

Following the screenshots in each section is a table that shows the status of the collection of data elements by each CDC fellowships. The following labels indicate the status of the collection:

- "Yes" indicates that the fellowship collects the information and that applicants are required to submit this information.
- "No" indicates that the fellowship does not collect this information.
- "-" indicates open text field

In addition, the table shows the data values of each data element, and for ones that have a list of dropdown values, the data value category is hyperlinked to its list located in the Appendix.

Major Duties

List one or more projects that will use population health approaches to develop leadership and management skills in policy analysis and development as well as program evaluation. All projects must be completed within the training period (12 months starting in July). For multi-year projects, define a component that can be accomplished within the training period. Performance requirements and examples of activities are provided below.

Policy Analysis and Development

Performance Requirements:

- Apply scientifically sound techniques to conduct a policy review and develop policy guidelines.

Possible Activities:

- Use scientific data to form public health policy or recommendations
- Advocate recommended policies or actions to various groups
- Identify factors that facilitate or impede adoption of policies and make strategic adjustments to push the process forward

Policy Analysis and Development: *

Program Evaluation

Performance Requirements:

- Conduct a comprehensive evaluation of a public health project or initiative that is either ongoing or in development.

Possible Activities:

- Identify program structure and organization, stakeholders, and components in the program environment
- Identify information sources and gather relevant data
- Plan and execute an evaluation
- Use evaluation outcomes for quality improvement

Program Evaluation: *

fellowship/program description

ELI	ELI is designed to cultivate skills of public health training professionals with limited experience designing or developing e-learning products. Through partnership with the Public Health Foundation, ELI is a six-month online fellowship that offers access to CDC-developed materials and subject matter experts, as well as the opportunity to learn from peers in a positive, experiential environment. Fellows learn innovative strategies and get the hands-on experience needed to create quality e-learning products. More information about this fellowship can be found at https://www.cdc.gov/elearninginstitute/index.html
EIS	EIS is a highly competitive 2-year, post-graduate fellowship in which health professionals and doctoral-level scientists develop competency in applied epidemiology, communication, and professionalism while addressing a wide range of front-line public health problems. More information about this fellowship can be found at www.cdc.gov/eis.
LLS	LLS is a highly competitive 2-year postdoctoral fellowship that prepares early-career laboratory scientists to become future public health laboratory leaders. Through on-the-job service at CDC and other public health laboratories, fellows acquire and apply skills in laboratory quality management, the science of biosafety, and leadership. More information about this fellowship can be found at www.cdc.gov/lls.
SAF	The CDC Science Ambassador Fellowship is the only program of its kind offered by CDC for teachers and educational leaders interested in bringing public health sciences into middle- and high- school classrooms. This competitive fellowship includes a 5-day summer course at CDC headquarters in Atlanta, Georgia, and a 1-year distance-based professional development opportunity. More information about this fellowship can be found at: https://www.cdc.gov/careerpaths/scienceambassador/index.html
EEP	The Epidemiology Elective Program (EEP) introduces medical and veterinary students to applied epidemiology, public health, and global health. Students learn by gaining hands-on experience and mentorship from CDC subject matter experts. This program offers assignments during 6- or 8-week rotation periods largely based at CDC in Atlanta, Georgia. More information about this program can be found at: https://www.cdc.gov/epielective/overview.html.
FLIGHT	FLIGHT is a new program focused on developing future CDC leaders through training, work experience, and mentorship. applicant has waived their right to view your recommendation. More

	information about this fellowship can be found at www.cdc.gov/ophss/csels/dsepd/organization/od/leadership.html.
PMR/F	PMR/F is a 12- or 24-month program accredited by the Accreditation Council for Graduate Medical Education (ACGME) and meets the residency requirement of the American Board of Preventive Medicine (ABPM) for the Public Health and General Preventive Medicine specialty. The Fellowship is a 12-month program similar to PMR intended for clinicians and for physicians who do not meet eligibility criteria for the Residency. More information about this fellowship can be found at www.cdc.gov/prevmed.
PH-TIPP	PH-TIPP provides formal training in policy analysis and development as well as program evaluation. During this 1-year on-the-job professional development opportunity, participants will engage in a training experience using projects from their day-to-day work. PH-TIPP training uses evidence-based approaches to help participants develop and enhance their population health skills and add value to their organizations. More information about this fellowship can be found at www.cdc.gov/pophealthtraining.
PHIFP	PHIFP is a 2-year, post-graduate fellowship in applied public health informatics for professionals interested in applying computer science, information science, and technology to address public health problems. PHIFP fellows are expected to be creative problem solvers and are trained in the following core competency domains – Analysis, Assessment, and Evaluation, Communication, Public Health Informatics Sciences, and Health Systems Change. More information about this fellowship can be found at https://www.cdc.gov/phifp/index.html.
PE	The PE Fellowship is a two-year research and service post-doctoral fellowship, established in 1995 to address an ongoing demand in the field of public health for quantitative policy analysis, health economics-based inquiry, and integrative health services research through the recruitment, internal placement, and professional development of critical research resources. At CDC, prevention effectiveness research includes the use of econometric, decision, simulation, and operations analysis and modeling to understand determinants of health, morbidity, mortality, health inequalities, healthcare use, and expenditures. More information about this fellowship can be found at https://www.cdc.gov/pef/index.html.

Sincerely,

{fellowship/program}
