

# Instrument 4: Focus Group Guide for Youth

## Consent Script for Focus Groups

This form answers a number of questions you may have about the focus group in which you have been invited to participate. After we review this information, you can decide if you still want to participate in the focus group.

- **Who is doing the focus group and why?**

The focus group is being led by researchers from the Urban Institute and Chapin Hall at the University of Chicago as part of a study of the Family Unification Program or FUP. The study is being conducted for the U.S. Department of Health and Human Services, Administration for Children and Families (ACF), and the U.S. Department of Housing and Urban Development, agencies in the federal government. The purpose of the focus group is to learn more about the experiences of young people who are participating in FUP. We are speaking with you because you currently have a lease on a home that you obtained using a FUP voucher.
- **What will you be asked to do?**

You will be asked to take part in a discussion about your experiences in FUP and share your ideas about the program. The discussion will last no more than 90 minutes.
- **Will the focus group be recorded?**

We would like to audio record the focus group so that we have an accurate record of what is said. However, we will not audio record the focus group if any focus group participant objects to being recorded. One of the researchers will be taking detailed notes, but those notes will not include your name.
- **How will the information that is shared during the focus groups be used?**

We will combine what you tell us about your experiences with FUP with what youth in 7 other locations tell us and share the results with ACF. ACF will use this information to improve administration of the program.
- **Will anyone know what you say during the focus group?**

Although we will share the ideas that are discussed during the focus groups with ACF, we won't share your name or other information that could be used to identify you. Additionally, we will not allow anyone outside the research team to listen to the audio recordings of the focus group. The focus group involves a group discussion and we cannot guarantee that focus group participants won't share what is said. However, the researchers will make it clear that it is important to respect everyone's privacy by not sharing what is said outside of the focus group.
- **Are there any exceptions when your name would be shared?**

We are required by law to notify the authorities if you tell us that you intend to harm yourself or someone else.

- **Could you be harmed by participating in the focus group?**  
You may feel uncomfortable sharing your experiences or ideas with the group. However, you can always choose not to take part in the discussion.
- **Could you benefit from participating in the focus group?**  
It is unlikely that you will benefit directly from participating in the focus group, although some young people appreciate the opportunity to share their experiences and ideas with a group of their peers.
- **Will you receive money if you participate in the focus group?**  
You will receive a \$25 gift card as a thank you. You will still receive the \$25 gift card even if you choose not to take part in some or all of the discussion.
- **Can you refuse to participate in the focus group?**  
Yes. Your participation in the focus group is voluntary and will in no way affect your participation in the FUP program or any services you are eligible to receive.
