

Law Enforcement Public Contact (LEPC) Questionnaire Platform

Data Collection:

Participating agencies will submit total annual counts in the three areas of public contacts relevant to the LEPC

- Citizen Calls for Service
- Unit/Officer Initiated Contact
- Court/Bailiff Activates

These counts will be entered into the electronic form found on the National Use-of-Force portal located on the Law Enforcement Enterprise Portal (LEEP). Below is an example of how the LEPC survey questions will be presented on the Use-of-Force portal.

The screenshot shows a web form titled "Law Enforcement Public Contact Entry". At the top, it asks "Is this a court/bailiff activity?" with "Yes/No" radio buttons and a note: "If yes, then business rule would apply and the ability to enter at bottom of page." Below this are three steps:

- Step 1: Select the Agency for Law Enforcement Public Contact (with a text input field).
- Step 2: Select the Year (with a dropdown menu).
- Step 3: Enter/Update the Law Enforcement Public Contact Submission. This section has a table with two columns: "Call/Request Call/Individuals on the Docket Count" and "Year".

Call/Request Call/Individuals on the Docket Count	Year
Citizen calls for service <input type="radio"/> Yes	Actual <input type="text"/>
Unit/Officer-initiated contacts <input type="radio"/> No	Estimated <input type="text"/>
Court/bailiff activities <input type="radio"/> No	Not Applicable <input type="text"/>

At the bottom of the form are three buttons: "Save", "Reset Form", and "Submit". A legend on the right side of the table indicates that "Actual" corresponds to "Actual", "Estimated" corresponds to "Estimated", and "Not Applicable" corresponds to "Not Applicable".

This layout represents what participating agencies will see when they log onto the site. The layout of the platform may change as adjustments are made to the system for the final launch of the collection, but the three text fields and the corresponding dropdowns indicating actual or estimated counts will remain for all agencies to use in submitting their annual data.
