

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2060-NEW). Responses to this collection of information are voluntary. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 20.9 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

OMB Control No. 2060-NEW

Expiration Date: MM/DD/YYYY

10c. Please describe the finished products containing HFCs that your company imported and exported.

FINAL

11. Is 2020 a representative year for your use, or are there reasons why 2020 is higher or lower than past years?

12. Are there quality specifications with the HFC that you use, such as minimum purity specifications, that limit where your company can acquire HFCs from?

13. Could your company use recovered, recycled or reclaimed HFCs for any of the HFCs you currently use? If no, why? How much of each HFC that you use do you expect could be met with recovered, recycled or reclaimed HFCs?

14. What other chemicals have you historically used in this application other than HFCs? If available, when did you transition and why?

15. Is there any limitation on which HFC your company could use in this application? If so, why?

16. Has your company considered a transition plan to lower-GWP HFCs and/or HFC alternatives? If yes, have you assessed whether there are low-GWP alternatives to the HFCs that you currently use, including other HFCs? Have you done any testing to determine if the alternatives can work in your application?
