BILLING CODE 3510-DR-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; NOAA Geospatial Metadata

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on January 29, 2021 (86 FR 7541) during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic & Atmospheric Administration (NOAA), Commerce.

Title: NOAA Geospatial Metadata tools.

OMB Control Number: 0648-0024.

Form Number(s): None.

Type of Request: Regular submission, revision and extension of a current information collection.

Number of Respondents: 1,430.

Average Hours per Response: 1.75.

Total Annual Burden Hours: 2,590.

Needs and Uses: This request is for revision and extension of a currently approved information collection. The National Oceanic and Atmospheric Administration (NOAA) collects, generates, retains, and redistributes geospatial metadata in a wide array of data formats covering diverse aspects of earth, biological, and space sciences. To fully understand and reuse these data over the course of many years, NOAA provides several metadata documentation tools for various communities of users to enable them to easily create complete, standards-based descriptive information about geospatial

data. The following tools, in use or planned for use by NOAA Program offices, are authorized to collect geospatial metadata consistent with Executive Order 12906, NOAA Administrative Order 212-15, and the 2013 Office of Science and Technology Policy Memorandum 'Public Access to Research Results'. Geospatial metadata collected by the listed tools are 'voluntary' but the ability for data documented by relevant geospatial metadata is significantly degraded if metadata are incomplete, inaccurate or otherwise less than the information collection tool supports.

National Environmental Satellite, Data and Information Service (NESDIS): Send2NCEI web application (currently approved as OMB Control Number: 0648-0024).

National Environmental Satellite, Data and Information Service: Advanced Tracking and Resource tool for Archive Collections (ATRAC) web application.

National Environmental Satellite, Data and Information Service: Collection Metadata Editing Tool (CoMET) web application.

National Marine Fisheries Service (NMFS): InPort metadata authoring tool.

Office of Oceanic and Atmospheric Research (OAR): Science Data Information System (SDIS) metadata and data submission tool.

Collecting geospatial metadata is necessary to fully understand, use, and reuse geospatial data since the metadata provides contextual information about data formats, bounding areas, use and access limitations (if any). Geospatial metadata from this information collection also supports multiple search and discovery catalog services, such as data.gov, NASA Global Change Master Directory (GCMD), and many others.

Information will be collected from data producers (primarily university, private industry, and government-funded scientific researchers) in multiple fields of geosciences, biological and atmospheric sciences, and socio-economic sciences. Geospatial metadata typically includes descriptive information about specific observed, calculated, or modelled data (e.g., title, abstract, purpose statement, descriptive discovery keywords), characteristics of the described data (e.g., date and spatial range of data collection activities, data processing steps, collected/measured variables and units of measure for those variables) and administrative information (e.g., who collected or created data and metadata, how to cite data when used in scientific analyses). Information collected by the listed tools is used to inform the appropriate use of

data described by related geospatial metadata.

The existing OMB control number is expanded to include other information collection instruments that collect similar kinds of geospatial metadata but that have different community-based practices or standards that provide for more or less details in the metadata requested. Additionally, the title of the collection is being changed from National Centers for Environmental Information (NCEI) Send2NCEI Web Application to NOAA Geospatial Metadata to reflect the information being collected.

Affected Public: Business or other for-profit organizations; Not-for-profit institutions; State, Local, or Tribal government; Federal government.

Frequency: As needed for geospatial data documentation purposes.

Respondent's Obligation: Voluntary.

Legal Authority: Executive Order 12906 and the 2013 Office of Science and Technology Policy Memorandum 'Public Access to Research Results'.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0648-0024.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510-12-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; A Coastal Management Needs Assessment and Market Analysis for Financing Resilience

The Department of Commerce will submit the following information collection request to the Office of

Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on January 28, 2021 (86 FR 7365) during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA), Commerce.

Title: A Coastal Management Needs Assessment and Market Analysis for Financing Resilience.

OMB Control Number: 0648–XXXX.

Form Number(s): None.

Type of Request: Regular submission [new information collection].

Number of Respondents: 36

Average Hours per Response: 1.5 hours.

Total Annual Burden Hours: 54.

Needs and Uses: NOAA's Office of Coastal Management (OCM) and its regional, state, federal, and non-profit partners have worked closely with coastal managers across the country to increase the resilience of our coastal communities, economies and ecosystems. Per the Coastal Zone Management Act of 1972 (CZMA), OCM provides financial and technical assistance to states and territories, including that which helps its customers (coastal managers) develop hazard mitigation and climate adaptation plans that include strategies for short-term responses to immediate threats (e.g., flooding, hurricanes) as well as long-term responses to gradual changes (e.g., sea level rise, drought). Services are provided through outreach, training, funding, resource, and tool development.

Solutions to these resilience challenges are often complex and cross-sectoral. Therefore, coastal decision-makers regularly point to the need for more substantial, coordinated, sustained and creative funding opportunities to support these efforts. The results of an initial review of more than 200 resources that NOAA conducted in support of this effort, and informal conversations with NOAA customers and other stakeholders indicate that there is no comprehensive inventory or guide to understanding and selecting appropriate funding options or financing strategies. These findings have

been further confirmed in subsequent informal discussions with coastal resilience and finance practitioners at national venues such as the National Adaptation Forum in April 2019 and Social Coast Forum in February 2020. NOAA's coastal management partners have requested support on this topic.

The financing world is one that is constantly evolving new products and retiring others. The range of funding and financing options, from grants and low-interest loans to more innovative private-public partnerships and emerging bonds, presents an ever-changing and complex array of choices. In initial internal communications conducted between June and September 2018, NOAA customers indicated that these opportunities and mechanisms are not well understood, and are generally inaccessible to coastal managers, particularly in small to mid-sized communities, rural areas, and tribal communities.

In many coastal communities, investment in mitigation and resilience measures remains either limited or reactive in response to a catastrophic event. While there are no data on the number of adaptation plans that have been implemented, lack of funding is a frequently cited barrier to implementation. At the same time, it has been estimated that investing in mitigation can save communities \$6 for every \$1 spent through mitigation grants from agencies including the Federal Emergency Management Agency, Department of Housing and Urban Development, and Economic Development Administration (according to the National Institute of Building Sciences' October 2018 report, *Natural Hazard Mitigation Saves: Utilities and Transportation Infrastructure*). Understanding the suite of funding and financing options available at the time resilience planning is undertaken, and then incorporating financial strategies into the planning process and recommendations, will help ensure that these plans are implemented. Section 310 of the Coastal Zone Management Act allows for technical assistance and management-oriented research to develop and implement state coastal management program amendments.

NOAA is in the process of developing a needs assessment to define the types of funding, financing mechanisms, and associated resources that its state and local coastal manager customers need for coastal resilience activities and a market analysis of existing funding and financing programs and mechanisms. Simultaneously, NOAA is identifying existing resources and partnership opportunities for state and

local coastal managers and NOAA's non-profit, academic, and other customers.

This request is for a set of related interviews to facilitate this research. NOAA will perform interviews with state and local coastal managers, as well as representatives from non-profit organizations, academia, the federal government, and the finance industry. The interviews will collect relevant information from interviewees on their experiences with coastal resilience funding and financing mechanisms, challenges and opportunities related to funding and financing coastal resilience, and technical support needs and opportunities that NOAA can address.

The information provided by interviewees will be synthesized into the needs assessment, which will address needs and information gaps partitioned by region, financial scale, time scale, and scope/sector. The information provided by interviewees will also be used to help inform an inventory of existing entities providing resources for resilience funding, as well as a summary of existing and emerging funding sources and financial tools and mechanisms for coastal resilience. Finally, the interviews will inform recommendations on NOAA's potential niche in addressing the identified needs and gaps.

The resulting research (and any subsequent resources or tools developed by NOAA to address identified gaps) will provide much needed information to NOAA's customers on funding and financing coastal resilience efforts, including available resources and mechanisms, best practices and strategies, real world success stories, and opportunities for technical and financial partnerships with private and public entities.

Affected Public: State and local government, federal government, non-profit organizations, academic institutions, business or other for-profit enterprises.

Frequency: Once.

Respondent's Obligation: Voluntary.

Legal Authority: None.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day

Review—Open for Public Comments” or by using the search function and entering the title of the collection.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510-JS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Solicitation for Applications for Advisory Councils Established Pursuant to the National Marine Sanctuaries Act and the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve Executive Order

AGENCY: Office of National Marine Sanctuaries (ONMS), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of solicitation.

SUMMARY: Notice is hereby given that ONMS will solicit applications to fill non-governmental seats on its 15 established national marine sanctuary advisory councils and the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve Advisory Council (advisory councils), under the National Marine Sanctuaries Act and the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve Executive Order, respectively. Note, the list of 16 established advisory councils in the Contact Information for Each Site section includes the advisory council established for the Proposed Lake Ontario National Marine Sanctuary. Vacant seats, including positions (*i.e.*, primary and alternate), for each of the advisory councils will be advertised differently at each site in accordance with the information provided in this notice. This notice contains web page links and contact information for each site, as well as additional resources on advisory council vacancies and the application process.

DATES: Please visit the individual site web pages, or reach out to a site as identified in this notice’s

SUPPLEMENTARY INFORMATION section, regarding the timing and advertisement of vacant seats, including positions (*i.e.*, primary or alternate), for each of the advisory councils. Applications will only be accepted in response to current, open vacancies and in accordance with the deadlines and instructions included on each site’s website.

ADDRESSES: Vacancies and applications are specific to each site’s advisory council. As such, questions about a specific council or vacancy, including questions about advisory council applications, should be directed to a site. Contact information for each site is listed in the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: For further information on a particular advisory council or available seats, please contact the site as identified in this notice’s **SUPPLEMENTARY INFORMATION** section. For general inquiries related to this notice or ONMS advisory councils established pursuant to the National Marine Sanctuaries Act or Executive Order 13178, contact Katie Denman, Office of National Marine Sanctuaries Policy and Planning Division (katie.denman@noaa.gov; 240-533-0702).

SUPPLEMENTARY INFORMATION: Section 315 of the National Marine Sanctuaries Act (NMSA) (16 U.S.C. 1445A) allows the Secretary of Commerce to establish advisory councils to advise and make recommendations regarding the designation and management of national marine sanctuaries. Executive Order 13178 similarly established a Coral Reef Ecosystem Reserve Council pursuant to the NMSA for the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve. In this Supplementary Information section, NOAA provides details regarding the Office of National Marine Sanctuaries, the role of advisory councils, and contact information for each site.

Office of National Marine Sanctuaries (ONMS)

ONMS serves as the trustee for a network of underwater parks encompassing more than 620,000 square miles of marine and Great Lakes waters from Washington State to the Florida Keys, and from Lake Huron to American Samoa. The network includes a system of 14 national marine sanctuaries and Papahānaumokuākea and Rose Atoll marine national monuments. National marine sanctuaries protect our nation’s most vital coastal and marine natural and cultural resources, and through active research, management, and public engagement, sustain healthy environments that are the foundation for thriving communities and stable economies.

One of the many ways ONMS ensures public participation in the designation and management of national marine sanctuaries is through the formation of advisory councils. Advisory councils are community-based advisory groups

established to provide advice and recommendations to ONMS on issues including management, science, service, and stewardship; and to serve as liaisons between their constituents in the community and the site. Pursuant to Section 315(a) of the National Marine Sanctuaries Act, 16 U.S.C. 1445A(a), advisory councils are exempt from the requirements of the Federal Advisory Committee Act. Additional information on ONMS and its advisory councils can be found at <http://sanctuaries.noaa.gov>.

Advisory Council Membership

Under Section 315 of the NMSA, advisory council members may be appointed from among: (1) Persons employed by federal or state agencies with expertise in management of natural resources; (2) members of relevant regional fishery management councils; and (3) representatives of local user groups, conservation and other public interest organizations, scientific organizations, educational organizations, or others interested in the protection and multiple use management of sanctuary resources. For the Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve Advisory Council, Section 5(f) of Executive Order 13178 (as amended by Executive Order 13196) specifically identifies member and representative categories.

The charter for each advisory council defines the number and type of seats and positions on the council; however, as a general matter, available seats could include: Conservation, education, research, fishing, whale watching, diving and other recreational activities, boating and shipping, tourism, harbors and ports, maritime business, agriculture, maritime heritage, and citizen-at-large.

For each of the advisory councils, applicants are chosen based upon their particular expertise and experience in relation to the seat for which they are applying; community and professional affiliations; views regarding the protection and management of marine or Great Lakes resources; and possibly the length of residence in the area affected by the site. Applicants chosen as members or alternates should expect to serve two- or three-year terms, pursuant to the charter of the specific national marine sanctuary advisory council or Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve Advisory Council. More information on advisory council membership and processes, and materials related to the purpose, policies, and operational requirements for advisory councils can be found in the charter for a particular advisory council (<http://>
