Dominic Mancini
Acting Deputy Director
Office of Information and Regulatory Affairs
Office of Management and Budget
Washington, D.C.

Subject: Request for Emergency Clearance

Dear Mr. Mancini:

Pursuant to the Office of Management and Budget (OMB) procedures established at 5 CFR 1320, *Controlling Paperwork Burdens on the Public*, I request that the following collection of information, Temporary Halt in Residential Evictions to Prevent the Further Spread of COVID-19, be processed in accordance with section 1320.13 Emergency Processing.

There is currently a pandemic of a respiratory disease ("COVID-19") caused by a novel coronavirus (SARS-COV-2) that has now spread globally, including cases reported in all fifty states within the United States plus the District of Columbia and U.S. territories (excepting American Samoa). As of March 25¹⁷, 2021, over 29,730,000 cases have been identified in the United States, with new cases reported daily, and over 540,000 deaths due to the disease.

Evictions threaten to increase the domestic spread of COVID-19 as they force people to move, often into new shared housing settings with friends or family, or congregate settings such as homeless shelters. The ability of these settings to adhere to best practices, such as social distancing and other infection control measures, decreases as populations increase.

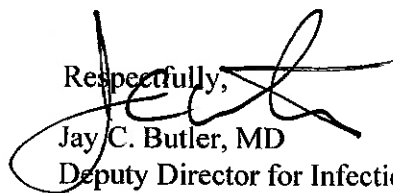

To respond to this public health threat, the federal, state, and local governments have taken unprecedented or exceedingly rare actions, including border closures, restrictions on travel, stay-at-home orders, mask requirements, and eviction moratoria. Although these efforts have helped slow spread, the rates of new COVID-19 cases are high and further action is needed. Eviction moratoria—like quarantine, isolation, and social distancing—can be an effective public health measure to prevent the spread of communicable disease. Eviction moratoria prevent increases in crowding and facilitate self-isolation by people who become ill or who are at risk for severe illness from COVID-19 due to an underlying medical condition. They also allow state and local authorities to more easily implement stay-at-home and social distancing directives to mitigate the community spread of COVID-19. Furthermore, housing stability helps protect public health because homelessness increases the likelihood of individuals moving into congregate settings, such as homeless shelters, which then puts individuals at higher risk to COVID-19.

As such, I have determined that this information must be collected prior to the expiration of time periods established under Part 1320, and that this information is essential to CDC's ability to effectively address this public health emergency. CDC cannot reasonably comply with the normal clearance procedures due to the public harm that could result if routine processing of this request is required. CDC requests emergency clearance to allow tenants, lessees, or residents of residential properties to provide a copy of the declaration to the landlord, owner of the residential property, or other person who has a right to have the individual evicted or removed.

The information will not be collected by CDC nor will the data be used at the federal, state, or local levels. The declaration will be for notification purposes only and will be given to the landlord, owner of the residential property, or other person who has a right to have the individual evicted or removed. The information collected will be limited to the signature of the tenant, lessee, or resident. Absent this emergency approval CDC will not be able to facilitate, in a timely manner, the temporary halt in residential eviction.

Please provide an approval/disapproval determination of this request to collect information under an emergency clearance by close of business Monday, March 29, 2021.

Respectfully,

A handwritten signature in black ink, appearing to read 'Jay C. Butler', is written over the word 'Respectfully,'.

Jay C. Butler, MD
Deputy Director for Infectious Diseases
Centers for Disease Control and
Prevention
