

Updates to 1845-0616 for 83C filing March 2021.

Updating the Centers for International Business and Education (CIBE) Application.

Updates: Retiring the Performance Management Form (PMF) requirement for CIBE applicants.

- The PMF is no longer required of the CIBE applicants. We no longer require the PMF form as the performance measures do not collect data that can be used to evaluate program outputs and outcomes. The performance measures that each applicant develops are individually specific to their project and do not collect data that inform GPRA measures. Each grantee is evaluated and assessed by an annual performance report which gathers specific information concerning their project goals and activities. The PMF is redundant and not informative to report on program evaluation. Thus, elimination of the required form will reduce the burden on the applicant.
- It will be deleted from the application package.
