

Improving life on Earth, one technology at a time

Attention all SBIR/STTR Contractors, please submit your reports via the Electronic Handbook (EHB)

A New Technology Report (NTR) is the first step in helping NASA make the most of your technology

Report your NTR or NTSR

This is a US Government system and is for authorized users only.

By accessing and using this information system, you acknowledge and consent to the following:

You are accessing a U.S. Government information system, which includes: (1) this computer; (2) this computer network; (3) all computers connected to this network; and (4) all devices and storage media attached to this network or to a computer on this network; and (5) cloud and remote information services. This information system is provided for U.S. Government-authorized use only. You have no reasonable expectation of privacy regarding any communication transmitted through or data stored on this information system. At any time, and for any lawful purpose, the U.S. Government may monitor, intercept, search and seize any communication or data transiting, stored on, or traveling to or from this information system. You are NOT authorized to process classified information on this information system. Unauthorized or improper use of this system may result in suspension or loss of access privileges, disciplinary action, and civil and/or criminal penalties.

Note that you will be logged off this system after 15 minutes of inactivity. This system will continuously autosave as you enter information into the system.

NASA Information Technology Security Policy requires that any account that has been inactive for 30 days or longer be locked. If your account becomes locked, contact the Help Desk at arc-dl-nts-support@mail.nasa.gov or 757-865-2233 to regain access to it.

NASA Form 1679 (NF1679) - Disclosure of Invention and New Technology (Including Software):
(Use when a new technology/invention is developed). You may either log in above and fill out the electronic version of the NF1679 or download the [PDF](#) or [Word](#) version to be sent via email to your NASA center.

What qualifies as new technologies and innovations is very broad. They include any invention, discovery, improvement, or innovation that was either conceived or first actually reduced to practice in the performance of NASA work. This includes any new and useful processes, machines, manufacture, or composition of matter; or any new and useful improvement in existing processes, machines, manufacture, or compositions of matter. Also included are new computer programs, and improvements to, or new applications of, existing computer programs, whether or not copyrightable. A

representative list of new technologies and innovations includes, but is not limited to: new or improved techniques, products, devices, materials, methods, processes, chemical compositions, systems, machines apparatuses, articles, fixtures, tools, or software.

Interim New Technology Summary Report (NTSR): a listing (every 12 months from the start of the Contract) of all new technologies (inventions and/or innovations) developed during the reporting period, or certification that there were none.

Final New Technology Summary Report (NTSR): a listing (prior to the Contract closeout) of all new technologies (inventions and/or innovations) developed during performance of the Contract, or certification that there were none.

NASA prefers that contractors/grantees/recipients use the NASA NTSR form, by way of the New Technology Reporting System when submitting an NTSR.

Paperwork Reduction Act Statement: This information collection meets the requirements of 44 U.S.C. § 3507, as amended by section 2 of the Paperwork Reduction Act of 1995. You do not need to answer these questions unless we display a valid Office of Management and Budget control number. The OMB control number for this information collection is 2700-0052 and it expires on 06/30/2020. We estimate that it will take about eight (8) hours to read the instructions, gather the facts, answer the questions, and transmit. You may send comments on our time estimate above to: Peter Tran, Ames Research Center, Moffett Field, CA. 94035. Send only comments relating to our time estimate to this address, not the completed form.

National Aeronautics and Space Administration

[Contact Us](#)

Hi Judith!

Welcome to your home page! You can always come back by clicking the [Home](#) button at the top of any page.

Report

Submit a new NTR or a new NTSR to report your new technology or summary report.

Dashboard

Visit your [dashboard](#) to access and review your NTRs and NTSRs.

Address Book

Store an innovator's contact information in your [address book](#) to use for future NTR submissions.

NTR:

Unique or novel features:

Provide brief details focused on what component(s) or method step(s) differentiate(s) the new technology from other similar technologies (aka the "secret sauce"). Include as attachments any presentations, images, flowcharts, etc. that help identify the unique component(s) or method step(s). If there are no unique component(s) and method step(s) (e.g., NTR submitted only for software release), state "None."

Commercialization potential:

Identify other applications for this technology beyond the specific NASA use. What type of industries would be most applicable for this technology? Are there related commercial products that you're aware of that would benefit from this technology? List any companies that you've contacted or think may be interested in using this technology.

Degree of technical significance:

- Modification to Existing Technology
- Substantial Advancement in the Art
- Major Breakthrough
