

## Appendix E.1 – Pre-ordering App Examples - Paper

This attachment provides possible examples of the paper pre-ordering apps.

- Exhibit 1: This is a paper pre-ordering app template. This first app allows students to choose from the full-range of items available in the cafeteria.
- Exhibit 2: Also a paper-based pre-ordering app, this second example gives students a range of meal options but does not include a la carte items that are available in the cafeteria. This example also encourages students to select a complete meal by suggesting students select three components from the menu options.
- Exhibit 3: This is the last of the paper-based pre-ordering apps and is the most restrictive pre-ordering option, whereby students select from a small number of complete meals and do not select individual components.
