

Attachment A - Consent for Trainers

OMB BURDEN STATEMENT: This information is being collected to assist the Food and Nutrition Service in understanding the impact of the effectiveness of the training to inform the development of the farm to school curriculum, and examine areas that might be improved in follow-up technical assistance following the training. This is a voluntary collection and FNS will use the information to evaluate the effectiveness of the farm to school producer training. This collection does not request any personally identifiable information under the Privacy Act of 1974. According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0584-0524. The time required to complete this information collection is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: U.S. Department of Agriculture, Food and Nutrition Service, Office of Policy Support, 1320 Braddock Place, Alexandria, VA 22306 ATTN: PRA (0584-0524).

Title of Information Collection: Evaluation of Farm to School Program Training and Curricula for State Agencies and Producers

Sponsor: U.S. Department of Agriculture

Principal Investigator: Carolyn Dimitri, PhD

Telephone: 212-992-7899 (9am-5pm)

Address: New York University
411 Lafayette Street, 5th Floor
New York, NY 10003
carolyn.dimitri@nyu.edu

You have recently taken part in a train-the-trainer workshop focused on assisting producers in farm to school marketing and other farm to school activities. You are receiving this form because you are being invited to provide feedback on the workshop.

Please read this document carefully. It contains important information about this research study. If there is any information that you do not understand, we will be happy to answer your questions.

Introduction: About this study

The National Center for Appropriate Technology (NCAT) and National Farm to School Network (NFSN) have a cooperative agreement with the U.S. Department of Agriculture's (USDA) Food and Nutrition Service (FNS) to develop a producer-focused farm to school curriculum, equip State agencies and their representatives to facilitate trainings using the curriculum, and support State agencies and others as they implement trainings.

RETAIN FOR YOUR RECORDS

The goal of this research is to assess the trainees' perceived readiness to provide training to producers, study the effectiveness of the training to inform the development of the farm to school curriculum, and examine areas that might be improved in follow-up technical assistance following the training. We are working with New York University researchers to conduct this research.

Procedure: What will I do during this study?

As a trainer that has been through the train-the-trainer workshop, you are being asked to take part in a survey to be completed online. The survey should take approximately 20 minutes to complete.

Study Benefits: What good comes from this study?

Your feedback will help us assess the effectiveness of the training and the development of the curriculum and will inform revisions made to the curriculum for later use.

Token of Appreciation: Will I be paid for being in this study?

There is no cost to you for taking part in this study. You do not have to answer any questions that you do not want to. You will not be incentivized for your time in this study.

Anticipated Risks: Could anything bad happen to me during this study?

We will take care to minimize any risks of participating in this study. As with all research, there is a chance that privacy could be breached. For example, despite the best efforts of the research team to keep the information we collect during the study private, a breach may occur as a result of accidental human error or hacking. However, this survey is being conducted anonymously, so your name and any identifying information will not be kept with your responses. In the event a breach occurs, all participants will be contacted and notified as to the extent of the breach, any damages incurred, and future potential risks; contact information for additional inquiries will also be provided. No sensitive information will be collected from you. If you have any questions about this research study, you may call one of the research team members at 301-891-0470 or email a study representative at carolyn.dimitri@nyu.edu

Privacy: Who will see the results of this study?

This survey will be anonymous. We will not disclose your identity in any report or presentation. Only researchers from New York University, NCAT, and NFSN will have access to the responses you provide. Staff from the USDA may also look at study records, but will not have access to your name.

Your survey responses will not be linked back to you or any of your other personal information, meaning that no one outside the researchers will know how you responded. Everything you share will be kept private to the extent allowable by law. This means that we will not share any information you provide with anyone outside the study unless it is necessary to protect you, or required by law. However, if you indicate a direct threat of harm to yourself or others, we reserve the right to take necessary action out of concern for your welfare and the welfare of others.

All of the information we collect, including your survey responses, will be kept for three years. The information will be stored on a password-protected computer and/or in locked cabinets that only the research team can access. We will not be collecting any personal demographic information from you or information that could identify you, like full name, address, or social security number. After three years, all of the collected data will be destroyed by securely shredding documents or permanently deleting electronic information.

RETAIN FOR YOUR RECORDS

Results from this study may appear in professional journals or at scientific conferences. No individual participants will be identified or linked to the results. We will not disclose your identity in any report or presentation. Results may also be used in future research or shared data with other researchers. Other researchers will not have your name or any identifying information.

Participation and Withdrawal: Do I have to be in this study? What if I change my mind?

You can choose to take part in the study or not. You can choose to not complete the survey or leave the survey at any time. You do not have to answer any questions you do not want to. The study is completely voluntary and you can stop participating at any time.

Who do I contact if I have questions about the study?

If you have questions or concerns about the study, you can contact:
Carolyn Dimitri, New York University
Carolyn.dimitri@nyu.edu

PLEASE CHECK ONE OF THE BOXES

- Yes, I agree to participate in this study. I have read, understand, and had time to consider all of the information above. I have no further questions.
- No, I do not agree to participate in this study. I have read, understand, and had time to consider all of the information above. I have no further questions.
