

IX. Climate Change Science Module

Recently, you may have noticed that *global warming* has been getting some attention in the news. Global warming refers to the idea that the world's average temperature has been increasing over the past 150 years, may be increasing more in the future, and that the world's climate may change as a result.

1. What do you think: Do you think that global warming is happening?
 Yes
 No
 Don't know
2. Assuming global warming is happening, do you think it is...
Check one.
 Caused entirely by human activities
 Caused mostly by human activities
 Caused about equally by human activities and natural changes in the environment
 Caused mostly by natural changes in the environment
 Caused entirely by natural changes in the environment
 None of the above because global warming isn't happening
3. Which comes closest to your own view?
Check one.
 Most scientists think global warming is happening
 There is a lot of disagreement among scientists about whether or not global warming is happening
 Most scientists think global warming is not happening
 Don't know enough to say
4. Which of the following statements comes closest to your view?
Check one.
 Global warming isn't happening
 Humans can't reduce global warming, even if it is happening
 Humans could reduce global warming, but people aren't willing to change their behavior, so we're not going to
 Humans could reduce global warming, but it's unclear at this point whether we will do what's needed
 Humans can reduce global warming, and we are going to do so successfully

8. Which, if any, of the following activities have occurred on your wooded land in <STATE> in the **past 5 years** in order to help limit or adapt to the potential impacts of global warming?
Check all that apply.

- Increased the number of drought tolerant trees
- Increased the number of trees found in warmer areas
- Increased the mixture of tree species
- Increased the mixture of tree ages, including seedlings and saplings
- Reduced the density/number of trees to limit moisture stress
- Reduced the number of small trees and other plants to minimize wildfire risk
- Reduced/eliminated invasive plants
- Planted trees not currently found on my wooded land
- None of the above
