This notice invites comment on a proposed information collection project

titled Operational Readiness Review (ORR) 2.0. The Operational Readiness Review is a rigorous, evidence-based assessment used to evaluate PHEP recipients' planning and operational functions.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the

proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

5. Assess information collection costs.

Proposed Project

Operational Readiness Review 2.0—Existing Collection in Use Without OMB Control Number—Center for Preparedness and Response (CPR), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

To help evaluate the country’s public health emergency preparedness and response capacity, the Centers for Disease Control and Prevention’s Division of State and Local Readiness

(DSLRL) administers the Public Health Emergency Preparedness (PHEP) cooperative agreement. The PHEP program is a critical source of funding for 62 state, local, and territorial jurisdictions to build and strengthen their ability to respond to and recover from public health emergencies. The Operational Readiness Review (ORR) is a rigorous, evidence-based assessment used to evaluate PHEP recipients’ planning and operational functions. The previous version of the ORR evaluated a jurisdiction’s ability to execute and a large emergency response requiring medical countermeasure (MCM) distribution and dispensing. The purpose of this new ORR 2.0 is to expand measurement and evaluation to all 15 Public Health Emergency Capabilities: 1—Community Preparedness, 2—Community Recovery, 3—Emergency Operations Coordination, 4—Emergency Public Information and Warning, 5—Fatality Management, 6—Information Sharing, 7—Mass Care, 8—Medical Countermeasure Dispensing and Administration, 9—Medical Materiel Management and Distribution,

10—Medical Surge, 11—Nonpharmaceutical Intervention, 12—Public Health Laboratory Testing, 13—Public Health Surveillance and Epidemiological Investigation, 14—Responder Safety and Health, 15—Volunteer Management. These capabilities serve as national standards for public health preparedness planning.

The ORR 2.0 will have three modules: Descriptive, planning, and operational, which will allow DSLR to analyze the data for the development of descriptive statistics and to monitor the progress of each recipient towards performance goals. The intended outcome of the ORR 2.0 is to assist CDC to identify strengths and challenges facing preparedness programs across the nation and to identify opportunities for improvement and further technical support. Information will be collected from respondents using the new Operational Readiness Review (ORR) 2.0 platform. CDC is requesting a three-year approval for this information collection. The total annualized burden hour estimate is 3423 burden hours. There is no cost to respondents other than their time.
