The National Ambulatory Medical Care Survey (or NAMCS) was developed to meet the need for such information.</p> <p>The CDC's National Center for Health Statistics works closely with members of the medical profession to design the NAMCS each year. The NAMCS supplies essential information about how ambulatory medical care is provided in the United States, and how it is utilized by patients.</p> <p>Your part in the study is very important and should not take much of your time. It consists of your participation (during/following) a specified 7-day period, and includes supplying a minimal amount of information about the patients you see.</p> <p>First, I have some questions to ask about your practice. Your answers will only be used to provide data on the characteristics of office-based practices in the U.S. Any and all information you provide for this study will be kept confidential.
