NISVS Redesign Paper Protocol – Round 1

INTRODUCTION

Thank you for taking the time to help us today. The session will take approximately an hour. I'll give you a little background on what we'll be doing today.

Westat is working with the Centers for Disease Control and Prevention. We are developing a national survey about health and injuries that asks questions about physical injuries, harassing behaviors, and unwanted sexual activity and today we would like to test the survey with you. The survey asks about different types of these experiences that you may have had. We are particularly interested in whether the questions make sense to you, and we might ask you to talk about what happened during these experiences and how you decided on your answers to the survey questions based on those experiences. We would also like your feedback to make sure the survey is easy to understand and navigate and that the questions make sense to you.

Some of the language in the survey is explicit, but it is important that we ask the questions this way so that you are clear about what we mean. The questions we ask are detailed and some people may find them uncomfortable.

Today, I am going to ask you to go through the whole questionnaire as a survey respondent. I am going to observe you as you do this and will take a few notes as you go through the survey. Every now and then, I will stop you and we'll talk about what you are seeing or how you decided on your answer to the question. If anything is confusing for you, or if you're not sure how to answer a question or are unsure what to do next, just tell me. There are no right or wrong answers. Our purpose is not to compile information about you. Instead, your interview along with those of others will show us how to improve these questions for a later survey.

This is a research project and your participation is voluntary. You can skip any question and you can stop at any point. There are no known benefits for you to take part in this study, but your answers will help us improve the survey. There is a risk that some of the questions that we will ask you to talk about are about private and sensitive things that may bother you. If you become upset during the interview or want to stop the interview at any time, please let me know. I will provide you with a list of resources at the end of the interview that you can use to help you.

We would very much appreciate your permission to audio and video record this session. The recordings will be used for note-taking purposes only and may be used only by members of the project or the CDC staff. They will be destroyed as soon as we complete the questionnaire

development process. You will receive \$40 cash as a token of our appreciation at the end of the interview.

All information obtained during this study will be treated as confidential, as required by law, and will only be used to develop and improve the questionnaire. We will not share your answers with anyone outside of the research team. The one exception is that if you express that you are a danger to yourself or to others. If that happens, in order to help protect your safety and the safety of others, we would report this to the appropriate healthcare or law enforcement agencies.

Your answers to the questions will not be linked with your name and we will not use your name in any reports. We may use quotes in our report that you provide during the interview, but never in a way that would identify you.

[IF OBSERVERS ARE PRESENT] {Finally, some of the researchers developing the questions are here today observing our interview to learn if there are things that might need to be changed.}

INFORMED CONSENT

ASK PARTICIPANT TO REVIEW THE CONSENT FORM, ANSWER ANY QUESTIONS, AND OBTAIN CONSENT BEFORE CONTINUING. This form contains more information about the research and your rights in this interview. Please read it over and let me know if you have any questions. (ANSWER QUESTIONS) If you are willing to take part in the study, please mark the Yes boxes. I will sign both copies. One copy is for you, and I will hold onto the other.

POINT TO THE LAST PARAGRAPH WITH CONTACT INFORMATION: Also, if you have any questions about this research study, you can contact David Cantor, the Principal Investigator. His phone number is provided here. If you have questions about your rights and welfare as a research participant, you can call the Westat Human Subjects Protections office. Their phone number is also provided on this form.

[START AUDIO AND VIDEO RECORDER AND GET ORAL PERMISSION TO RECORD.] It is [DATE AND TIME], do I have your permission to record this conversation? ~~~~Thank you.

Do you have any questions before we get started? I am going to hand you the questionnaire and will watch as you answer the questions. Every now and then we will stop to talk about the questions. Again, there are no right or wrong answers, we're just interested in getting your feedback about the questions and how you came up with your answers.

PART A. ISSUE LOG

Any time the respondent has issues with navigation or questions, record the question number and a few words about the problem on the Issue Log. Use the “Usability Probes” to determine what probes to ask about the issue.

PART B: QUESTION-SPECIFIC PROBES

[Interviewers will ask concurrent probes on the items listed below.]

Let’s look at the question “Have you ever, even once, taken any prescription pain medicine (like OxyContin, Vicodin, Lortab, or Percocet) without a prescription or differently than how a doctor told you to use it?” What types of situations do you think this is asking about? IF YES: What made you say “yes” to this question?	
The last question I asked was if you have ever attempted suicide. How did you feel about being	

asked that question?

We're trying to decide if we need to add a question before that which asks if you ever thought about suicide. Do you think we need to add that question?

Stalking

The next set of questions asks about experiences that can directly impact your health or may have resulted in injury. These experiences may or may not have happened to you. There will be some questions about physical injuries, harassing behaviors, and unwanted sexual activity.

Remember, you don't have to answer any question that you don't want to. We suggest that you be in a private setting during the survey. If, at any time, you do not feel physically or emotionally safe, please stop taking the survey. If you think you are able to do it in a private setting or are emotionally safe, please return to complete it at a later time.

The first set of questions are about times in your life when someone may have ever given you unwanted attention by repeatedly contacting you, following you, or harassing you.
