<p>The High School Longitudinal Study of 2009 (HSL:09), conducted by the National Center for Education Statistics in the Institute of Education Sciences of the U.S. Department of Education, began with a cohort of ninth-grade students in the fall of 2009. The purpose of the study is to understand the high school experience and the school, community, family, and social aspects that influence student decision-making as they transition from middle school to high school, and from high school to postsecondary education, the military, and/or the workforce. Follow-ups have occurred in spring 2012, summer-fall 2013, spring 2016-January 2017, and a collection of administrative records (such as high school transcripts and postsecondary transcripts). The most recent panel maintenance activity for this cohort was conducted in 2018.</p> <p>This change memo is to modify the approved plan for the 2021 panel maintenance. These modifications include collecting updated contact information from both students and parents and removing the intensive tracing efforts for this round of panel maintenance.</p>
