NOTES

Clinical Signs or conditions reported

The owner's name is [redacted]. The beef animal is in a group of 20 with no other clinical animals evident. The animal has been ill for 3-5 days with bloating and apparent pneumonia signs. The group was purchased 3 weeks ago from an undisclosed sale yard. An FADD has been sent to evaluate and collect appropriate samples except for the ear notch unless warranted.

The electronic forms are completed by a State or Federal diagnostician, not by the owner or manager of the premises being investigated. The owner or manager verbally provides information for input into the EMRS. These are diagnostic investigations, conducted as question and answer sessions, designed simply to determine the nature and extent of illness on the premises so VS can take the necessary steps to control and eradicate a foreign animal disease outbreak.

EMRS accommodates multiple methods of entering data. APHIS staff or State personnel accessing and using EMRS can build personal user and contact screens including their contact information, dispatch information, and deployment readiness checklist.

The screenshot shows the EMRS user profile page for Fred Bourgeois. The page is titled "User" and features a navigation bar with options like "Settings", "Security", and "Fred Bourgeois". Below the navigation bar, there is a search bar and a list of actions: "NEW", "CONNECT", "APPROVE EMAIL", "REJECT EMAIL", "REASSIGN RECORDS", "MANAGE ROLES", "JOIN TEAMS", "CHANGE BUSINESS UNIT", and "CHANGE MANAGER".

The user profile is displayed in a card format with the following sections:

- User Information:** Includes fields for User Name, Full Name (Fred Bourgeois), Title (EMRS National Coordinator), Primary Email, Mobile Phone, Main Phone, and Default Queue (<Fred Bourgeois>).
- Organization Information:** Includes Business Unit (Veterinary Services), Site (Louisiana), and Position (Manager).
- Teams:** A table listing teams and their associated business units.

Team Name	Business Unit
General Distribution	Veterinary Services
Veterinary Services	Veterinary Services
- 513 Requests:** A section for managing requests, showing a table with columns for "Created On", "Request L...", and "System". It indicates "No 513 Access Request records found." and includes a pagination control.
- Recertification:** A section for managing recertification, showing a table with columns for "Date Selected", "Date Recertified", and "RecertifyingOfficial".

At the bottom of the profile card, there is a summary section:
