public cmomenton federal register

there is no need for this survey. there is no call from teh people of this country to get this information. why all of a sudden do you want to waste taxpayer dollars on this survey. why are you coddling this industry. are you planning to do this for all of the industries as to whether the employees have "job satisfaction" or not. who needs that crap? we have a pandemic going on. anybody who has a job is lucky to have a job. no matter that we want to waste american tax dolalrs on "job satisfaction". 25 other people would like to have that job but have no job and are among the unemployed. this is a wasteful survey to bring up at this time when anybody is lucky to have a job. this commetn is for the public record. please receipt. jean publee jean [public1@gmail.com](mailto:public1@gmail.com)
