# OPTN Membership Application for Liver Transplant Programs

### **CERTIFICATION**

The undersigned, a duly authorized representative of the applicant, does hereby certify that the answers and attachments to this application are true, correct and complete, to the best of his or her knowledge after investigation. I understand that the intentional submission of false data to the OPTN may result in action by the Secretary of the Department of Health and Human Services, and/or civil or criminal penalties. By submitting this application to the OPTN, the applicant agrees: (i) to be bound by OPTN Obligations, including amendments thereto, if the applicant is granted membership and (ii) to be bound by the terms, thereof, including amendments thereto, in all matters relating to consideration of the application without regard to whether or not the applicant is granted membership.

**OPTN Representative** 

If you have any questions, please call the UNOS Membership Team at 833-577-9469 or email <a href="MembershipRequests@unos.org">MembershipRequests@unos.org</a>.

Surgeons can meet the training requirements for primary liver transplant surgeon by completing a formal 2-year surgical transplant fellowship if the following conditions are met:

- The surgeon performed at least 45 liver transplants as primary surgeon or first assistant during the 2-year fellowship period.
   This experience must be documented on a log that includes the date of transplant, the role of the surgeon, the medical record number or other unique identifier, and the fellowship director's signature.
- 2. The surgeon performed at least 20 liver procurements as primary surgeon or first assistant. These procurements must have been performed anytime during the surgeon's fellowship and the two years immediately following fellowship completion.

  This experience must be documented on a log that includes the date of procurement and Donor ID.

3.	as direct involvement in liver transplant patient care within the last 2 years. Check all tha
	apply:
	☐ The surgeon has experience managing patients with end stage liver disease.
	☐ The surgeon has experience with the selection of appropriate recipients for
	transplantation.
	$\square$ The surgeon has experience with donor selection.
	$\ \square$ The surgeon has experience with histocompatibility and tissue typing.
	$\ \square$ The surgeon has experience with performing the transplant operation.
	$\ \square$ The surgeon has experience with immediate postoperative and continuing
	inpatient care.
	$\ \square$ The surgeon has experience with the use of immunosuppressive therapy including
	side effects of the drugs and complications of immunosuppression.
	☐ The surgeon has experience with differential diagnosis of liver allograft dysfunction.
	☐ The surgeon has experience with histologic interpretation of allograft biopsies.
	☐ The surgeon has experience with interpretation of ancillary tests for liver
	dysfunction.
	☐ The surgeon has experience with long term outpatient care.
	If a box is not checked, please provide an explanation:

OMB No. 0915-0184 Expiration Date: 08/31/2023

- 4. Provide the following letters with the application:
  - A letter from the director of the training program verifying that the surgeon has met the above requirements, and is qualified to direct a liver transplant program.
  - A letter of recommendation from the fellowship training program's primary surgeon and transplant program director outlining
    - o the individual's overall qualifications to act as primary transplant surgeon,
    - o the individual's personal integrity and honesty,
    - o the individual's familiarity with and experience in adhering to OPTN obligations and compliance protocols, and
    - o any other matters judged appropriate.

The MPSC may request additional recommendation letters from the primary physician, primary surgeon, director, or others affiliated with any transplant program previously served by the surgeon, at its discretion.

• A letter from the surgeon that details his or her training and experience in liver transplantation.

OMB No. 0915-0184 Expiration Date: 08/31/2023

5B. Clini	cal Experien	ce Pathway
-----------	--------------	------------

Surgeons can meet the requirements for primary liver transplant surgeon through clinical experience gained post-fellowship, if the following conditions are met:

- 1. The surgeon has performed 60 or more liver transplants over a 2 to 5-year period as primary surgeon, co-surgeon, or first assistant at a designated liver transplant program. Of these 60 liver transplants, 30 or more must have been performed as primary surgeon or co-surgeon. Each year of the surgeon's experience must be substantive and relevant and include pre-operative assessment of liver transplant candidates, transplants performed as primary surgeon or first assistant, and post-operative management of liver recipients. This experience must be documented on a log that includes the date of transplant, the role of the surgeon, and medical record number or other unique identifier.
- 2. The surgeon has performed at least 30 liver procurements as primary surgeon, co-surgeon, or first assistant. Of these 30 liver procurements, at least 15 must have been performed as primary surgeon or co-surgeon.

  This experience must be documented on a log that includes the date of procurement, Donor ID, and role of the surgeon.

3. The surgeon has maintained a current working knowledge of liver transplantation, defined as direct involvement in liver transplant patient care within the last 2 years. Check all that apply ☐ The surgeon has experience managing patients with end stage liver disease. ☐ The surgeon has with the selection of appropriate recipients for transplantation.  $\Box$  The surgeon has experience with donor selection. ☐ The surgeon has experience with histocompatibility and tissue typing.  $\Box$  The surgeon has experience with performing the transplant operation. ☐ The surgeon has experience with immediate postoperative and continuing inpatient care. ☐ The surgeon has experience with the use of immunosuppressive therapy including side effects of the drugs and complications of immunosuppression.  $\Box$  The surgeon has experience with differential diagnosis of liver allograft dysfunction. ☐ The surgeon has experience with histologic interpretation of allograft biopsies. ☐ The surgeon has experience with interpretation of ancillary tests for liver dysfunction.  $\Box$  The surgeon has experience with long term outpatient care.

If a box is not checked, please provide an explanation:

- 4. Provide the following letters with the application:
  - A letter from the director of the transplant program and chairman of the department or hospital credentialing committee verifying that the surgeon has met the above requirements, and is qualified to direct a liver transplant program.
  - A letter of recommendation from the primary surgeon and transplant program director at the transplant program last served by the surgeon outlining
    - o the individual's overall qualifications to act as primary transplant surgeon,
    - o the individual's personal integrity and honesty,
    - the individual's familiarity with and experience in adhering to OPTN obligations and compliance protocols, and
    - o any other matters judged appropriate.

The MPSC may request additional recommendation letters from the primary physician, primary surgeon, director, or others affiliated with any transplant program previously served by the surgeon, at its discretion.

• A letter from the surgeon that details the training and experience the surgeon gained in liver transplantation.

F A	40	Tue seed a set 1	ببحج أحاج متحا	Fall acceptains	Datharra
5A.	12-month	Transplant F	iepatology	reliowship	Patnway

Physicians can meet the training requirements for a primary liver transplant physician during a separate 12-month transplant hepatology fellowship if the following conditions are met:

- 1. The physician completed 12 consecutive months of specialized training in transplantation under the direct supervision of a qualified liver transplant physician and in conjunction with a liver transplant surgeon at a liver transplant program. The training must have included at least 3 months of clinical transplant service. The remaining time must have consisted of transplant-related experience, such as experience in a tissue typing laboratory, on another solid organ transplant service, or conducting basic or clinical transplant research.
- 2. During the fellowship period, the physician was directly involved in the primary care of 30 or more newly transplanted liver recipients, and continued to follow these recipients for a minimum of 3 months from the time of transplant.

  This experience must be documented on a log that includes the date of transplant, medical record number or other unique identifier, and the signature of the director of the training program or the transplant program's primary transplant physician.

3.	The physician has maintained a current working knowledge of liver transplantation,
	defined as direct involvement in liver transplant patient care within the last 2 years. Check
	all that apply:
	$\ \square$ The physician has experience managing patients with end stage liver disease.
	$\square$ The physician has experience acute liver failure.
	$\ \square$ The physician has experience with the selection of appropriate recipients for
	transplantation.
	$\square$ The physician has experience with donor selection.
	$\ \square$ The physician has experience with histocompatibility and tissue typing.
	$\ \square$ The physician has experience with immediate post-operative patient care.
	$\ \square$ The physician has experience with the use of immunosuppressive therapy including
	side effects of the drugs and complications of immunosuppression.
	$\ \square$ The physician has experience with differential diagnosis of liver allograft
	dysfunction.
	$\ \square$ The physician has experience with histologic interpretation of allograft biopsies.
	$\ \square$ The physician has experience with interpretation of ancillary tests for liver
	dysfunction.
	$\square$ The physician has experience with long term outpatient care.
	If a box is not checked, please provide an explanation:

- 4. The physician has observed at least 3 liver procurements. The physician must have observed the evaluation, donation process, and management of these donors. This experience must be documented on a log that includes the date of procurement and Donor ID.
- 5. The physician has observed at least 3 liver transplants.

  This experience must be documented on a log that includes transplant date, donor type, and medical record number or other unique identifier.
- 6. Provide the following letters with the application:
  - A letter from the director of the training program and the supervising liver transplant physician verifying that the physician has met the above requirements and is qualified to direct a liver transplant program.
  - A letter of recommendation from the fellowship training program's primary physician and transplant program director outlining
    - o the individual's overall qualifications to act as primary transplant physician,
    - o the individual's personal integrity and honesty,
    - O the individual's familiarity with and experience in adhering to OPTN obligations and compliance protocols, and
    - o any other matters judged appropriate.
    - The MPSC may request additional recommendation letters from the primary physician, primary surgeon, director, or others affiliated with any transplant program previously served by the physician, at its discretion.
  - A letter from the physician that details the training and experience the physician gained in liver transplantation.

The training requirements outlined above are in addition to other clinical requirements for general gastroenterology training.

OMB No. 0915-0184 Expiration Date: 08/31/2023

5B.	Clinical	<b>Experience</b>	<b>Pathway</b>
JD.	CIIIIICai		ı atııvvay

A physician can meet the requirements for a primary liver transplant physician through acquired clinical experience if the following conditions are met:

1. The physician has been directly involved in the primary care of 50 or more newly transplanted liver recipients and continued to follow these recipients for a minimum of 3 months from the time of transplant. This patient care must have been provided over a 2 to 5-year period on an active liver transplant service as the primary liver transplant physician or under the direct supervision of a qualified liver transplant physician and in conjunction with a liver transplant surgeon at a designated liver transplant program.

This experience must be documented on a log that includes the date of transplant and the medical record number or other unique identifier.

2.	The physician has maintained a current working knowledge of liver transplantation,
	defined as direct involvement in liver transplant patient care <u>within the last 2 years</u> .
	Check all that apply
	$\square$ The physician has experience managing patients with end stage liver disease.
	☐ The physician has experience acute liver failure.
	$\square$ The physician has experience with the selection of appropriate recipients for
	transplantation.
	☐ The physician has experience with donor selection.
	$\ \square$ The physician has experience with histocompatibility and tissue typing.
	$\ \square$ The physician has experience with immediate post-operative patient care.
	$\ \square$ The physician has experience with the use of immunosuppressive therapy including
	side effects of the drugs and complications of immunosuppression.
	$\square$ The physician has experience with differential diagnosis of liver allograft
	dysfunction.
	$\ \square$ The physician has experience with histologic interpretation of allograft biopsies.
	$\square$ The physician has experience with interpretation of ancillary tests for liver
	dysfunction.
	☐ The physician has experience with long term outpatient care.
	If a box is not checked, please provide an explanation:

3. The physician has observed at least 3 liver procurements. The physician must have observed the evaluation, donation process, and management of these donors. This experience must be documented on a log that includes the date of procurement and Donor ID.

OMB No. 0915-0184 Expiration Date: 08/31/2023

4. The physician has observed at least 3 liver transplants.

This experience must be documented on a log that includes transplant date, donor type, and medical record number or other unique identifier.

### 5. Provide the following letters with the application:

- A letter from the qualified transplant physician or the liver transplant surgeon who
  has been directly involved with the proposed physician documenting the physician's
  experience and competence.
- A letter of recommendation from the primary physician and transplant program director at the transplant program last served by the physician outlining
  - o the individual's overall qualifications to act as primary transplant physician,
  - o the individual's personal integrity and honesty,
  - o the individual's familiarity with and experience in adhering to OPTN obligations and compliance protocols, and
  - o any other matters judged appropriate.

The MPSC may request additional recommendation letters from the primary physician, primary surgeon, director, or others affiliated with any transplant program previously served by the physician, at its discretion.

• A letter from the physician that details the training and experience the physician gained in liver transplantation.

OMB No. 0915-0184 Expiration Date: 08/31/2023

### 5C. Three-year Pediatric Gastroenterology Fellowship Pathway

A physician can meet the requirements for primary liver transplant physician by completion of 3 years of pediatric gastroenterology fellowship training as required by the American Board of Pediatrics in a program accredited by the Residency Review Committee for Pediatrics (RRC-Ped) of the Accreditation Council for Graduate Medical Education (ACGME). The training must contain at least 6 months of clinical care for transplant patients, and meet the following conditions:

- The physician is currently board certified in pediatric gastroenterology or a pediatric transplant hepatology certification of added qualification by the American Board of Pediatrics or the Royal College of Physicians and Surgeons of Canada. Provide a copy of the physician's current board certification.
- 2. During the 3-year training period the physician was directly involved in the primary care of 10 or more newly transplanted pediatric liver recipients and followed 20 newly transplanted liver recipients for a minimum of 3 months from the time of transplant, under the direct supervision of a qualified liver transplant physician along with a qualified liver transplant surgeon. The physician was also directly involved in the preoperative, perioperative and post-operative care of 10 or more liver transplants in pediatric patients. The pediatric gastroenterology program director may elect to have a portion of the transplant experience carried out at another transplant service, to meet these requirements. This experience must be documented on a log that includes the date of transplant, medical record number or other unique identifier, and the signature of the training program director or the transplant program's primary transplant physician.

3.

- 4. The experience caring for pediatric patients occurred at a liver transplant program with a qualified liver transplant physician and a qualified liver transplant surgeon that performs an average of at least 10 liver transplants on pediatric patients per year.
- The physician has observed at least 3 liver procurements. The physician must have observed the evaluation, donation process, and management of these donors.
   This experience must be documented on a log that includes the date of procurement and Donor ID.

6.

7. The physician has observed at least 3 liver transplants.

This experience must be documented on a log that includes transplant date, donor type, and medical record number or other unique identifier.

8.

OMB No. 0915-0184 Expiration Date: 08/31/2023

•	The physician has maintained a current working knowledge of liver transplantation,
	defined as direct involvement in liver transplant patient care <u>within the last 2 years</u> .
	Check all that apply
	$\square$ The physician has experience managing pediatric patients with end-stage liver
	disease.
	$\hfill \square$ The physician has experience managing pediatric patients with acute liver failure.
	$\ \square$ The physician has experience with the selection of appropriate pediatric recipients
	for transplantation.
	$\square$ The physician has experience with donor selection.
	$\ \square$ The physician has experience with histocompatibility and tissue typing.
	$\ \square$ The physician has experience with immediate postoperative care including those
	issues of management unique to the pediatric recipient.
	$\ \square$ The physician has experience with fluid and electrolyte management.
	$\ \square$ The physician has experience with the use of immunosuppressive therapy in the
	pediatric recipient including side-effects of drugs and complications of
	immunosuppression.
	$\ \square$ The physician has experience with the effects of transplantation and
	immunosuppressive agents on growth and development?
	Does the physician have experience with differential diagnosis of liver dysfunction in the allograft recipient?
	$\ \square$ Does the physician have experience with manifestation of rejection in the pediatric patient?
	$\ \square$ Does the physician have experience with histological interpretation of allograft biopsies?
	☐ Does the physician have experience with interpretation of ancillary tests for liver dysfunction?
	$\square$ Does the physician have experience with long-term outpatient care of pediatric
	allograft recipients including management of hypertension, nutritional support, and
	drug dosage, including antibiotics, in the pediatric patient.
	If a box is not checked, please provide an explanation:

### **10.** Provide the following letters with the application:

- A letter from the director of the pediatric gastroenterology training program, and the qualified liver transplant physician and surgeon of the fellowship training program verifying that the physician has met the above requirements, and is qualified to act as a liver transplant physician and direct a liver transplant program.
- A letter of recommendation from the fellowship training program's primary physician and transplant program director outlining
  - o the individual's overall qualifications to act as primary transplant physician,

OMB No. 0915-0184 Expiration Date: 08/31/2023

- o the individual's personal integrity and honesty,
- o the individual's familiarity with and experience in adhering to OPTN obligations and compliance protocols, and
- o any other matters judged appropriate.

The MPSC may request additional recommendation letters from the primary physician, primary surgeon, director, or others affiliated with any transplant program previously served by the physician, at its discretion.

• A letter from the physician that details the training and experience the physician gained in liver transplantation.

5D.	<b>Pediatric</b>	Francolon	t Honoto	loov Fall	lavvahin	Dathurau
טט.	Pediatric	i i ai isbiai i	ι пераго	iogy reli	IOWSHIID	Palliway

The requirements for primary liver transplant physician can be met during a separate pediatric transplant hepatology fellowship if the following conditions are met:

- 1. The physician is currently board certified in pediatric gastroenterology or has a current pediatric transplant hepatology certification of added qualification by the American Board of Pediatrics, the Royal College of Physicians and Surgeons of Canada, or is approved by the American Board of Pediatrics to take the certifying exam.
  Provide a copy of the physician's current board certification or documentation of the approval to take the certifying exam.
- 2. During the fellowship the physician was directly involved in the primary care of 10 or more newly transplanted pediatric liver recipients and followed 20 newly transplanted liver recipients for at least 3 months from the time of transplant, under the direct supervision of a qualified liver transplant physician and in conjunction with a qualified liver transplant surgeon. The physician must have been directly involved in the pre-operative, perioperative and post-operative care of 10 or more liver transplants in pediatric patients. The pediatric gastroenterology program director may elect to have a portion of the transplant experience completed at another liver transplant program in order to meet these requirements.

This experience must be documented on a log that includes the date of transplant, medical record number or other unique identifier, and the signature of the training program director or the transplant program's primary transplant physician.

- 3. The experience in caring for pediatric liver patients occurred at a liver transplant program with a qualified liver transplant physician and surgeon that performs an average of at least 10 pediatric liver transplants a year.
- 4. The physician has maintained a current working knowledge of liver transplantation, defined as direct involvement in liver transplant patient care <u>within the last 2 years</u>. Check all that apply

5F.	Conditional	Annroyal for Primary	<b>Transplant Physician</b>
Jr.	Conditional	ADDIOVALIOI PLIIIIALV	Halispialit Physiciali

If the primary liver transplant physician changes at an approved liver transplant program, a physician can serve as the primary liver transplant physician for a maximum of 12 months if the following conditions are met:

1. The physician has been involved in the primary care of 25 or more newly transplanted liver recipients, and has followed these patients for at least 3 months from the time of their transplant.

This experience must be documented on a log that includes the date of transplant, medical record number or other unique identifier, and the signature of the program director, division chief, or department chair from the transplant program where the experience was gained.

2.	The physician has maintained a current working knowledge of liver transplantation,
	defined as direct involvement in liver transplant patient care <u>during the last 2 years</u> .
	Check all that apply
	$\ \square$ The physician has experience managing patients with end stage liver disease.
	$\square$ The physician has experience acute liver failure.
	$\square$ The physician has experience with the selection of appropriate recipients for
	transplantation.
	$\square$ The physician has experience with donor selection.
	$\ \square$ The physician has experience with histocompatibility and tissue typing.
	$\ \square$ The physician has experience with immediate post-operative patient care.
	$\ \square$ The physician has experience with the use of immunosuppressive therapy including
	side effects of the drugs and complications of immunosuppression.
	$\square$ The physician has experience with differential diagnosis of liver allograft
	dysfunction.
	$\square$ The physician has experience with histologic interpretation of allograft biopsies.
	$\square$ The physician has experience with interpretation of ancillary tests for liver
	dysfunction.
	$\square$ The physician has experience with long term outpatient care.

- 3. The physician has 12 months experience on an active liver transplant service as the primary liver transplant physician or under the direct supervision of a qualified liver transplant physician along with a liver transplant surgeon at a designated liver transplant program. These 12 months of experience must be acquired within a 2-year period.
- 4. The physician has observed at least 3 liver procurements. The physician must have observed the evaluation, donation process, and management of these donors. This experience must be documented on a log that includes the date of procurement and Donor ID.

- 5. The physician has observed at least 3 liver transplants.

  This experience must be documented on a log that includes transplant date, donor type, and medical record number or other unique identifier.
- 6. Provide documentation that the transplant program will submit activity reports to the OPTN Contractor every 2 months describing the transplant activity, transplant outcomes, physician recruitment efforts, and other operating conditions as required by the MPSC to demonstrate the ongoing quality and efficient patient care at the program. The activity reports must also demonstrate that the physician is making sufficient progress to meet the required involvement in the primary care of 50 or more liver transplant recipients, or that the program is making sufficient progress in recruiting a physician who meets all requirements for primary liver transplant physician and who will be on site and approved by the MPSC to assume the role of primary physician by the end of the 12 month conditional approval period.
- 7. Provide documentation that the program has established and documented a consulting relationship with counterparts at another liver transplant program.
- 8. Provide the following letters along with your application:
  - A letter from the qualified liver transplant physician and surgeon who were directly involved with the physician verifying that the physician has satisfactorily met the above requirements to become the primary transplant physician of a liver transplant program.
  - A letter of recommendation from the primary physician and transplant program director at the transplant program last served by the physician outlining
    - o the individual's overall qualifications to act as primary transplant physician,
    - o the individual's personal integrity and honesty,
    - o the individual's familiarity with and experience in adhering to OPTN obligations and compliance protocols, and
    - o any other matters judged appropriate.

The MPSC may request additional recommendation letters from the primary physician, primary surgeon, director, or others affiliated with any transplant program previously served by the physician, at its discretion.

• A letter from the physician that details the training and experience the physician gained in liver transplantation.

4. Provide the following letters with the application:

OMB No. 0915-0184 Expiration Date: 08/31/2023

- A letter from the director of the training program verifying that the surgeon has met the above requirements, and is qualified to direct a liver transplant program.
- A letter of recommendation from the fellowship training program's primary surgeon and transplant program director outlining
  - o the individual's overall qualifications to act as primary transplant surgeon,
  - o the individual's personal integrity and honesty,
  - o the individual's familiarity with and experience in adhering to OPTN obligations and compliance protocols, and
  - o any other matters judged appropriate.

The MPSC may request additional recommendation letters from the primary physician, primary surgeon, director, or others affiliated with any transplant program previously served by the surgeon, at its discretion.

• A letter from the surgeon that details his or her training and experience in liver transplantation.

OMB No. 0915-0184 Expiration Date: 08/31/2023

5B.	Clinical	<b>Experience</b>	<b>Pathway</b>
JD.	CIIIIICai		ı atııvvay

Surgeons can meet the requirements for primary liver transplant surgeon through clinical experience gained post-fellowship, if the following conditions are met:

- 1. The surgeon has performed 60 or more liver transplants over a 2 to 5-year period as primary surgeon, co-surgeon, or first assistant at a designated liver transplant program. Of these 60 liver transplants, 30 or more must have been performed as primary surgeon or co-surgeon. Each year of the surgeon's experience must be substantive and relevant and include pre-operative assessment of liver transplant candidates, transplants performed as primary surgeon or first assistant, and post-operative management of liver recipients. This experience must be documented on a log that includes the date of transplant, the role of the surgeon, and medical record number or other unique identifier.
- 2. The surgeon has performed at least 30 liver procurements as primary surgeon, co-surgeon, or first assistant. Of these 30 liver procurements, at least 15 must have been performed as primary surgeon or co-surgeon.

  This experience must be documented on a log that includes the date of procurement.

This experience must be documented on a log that includes the date of procurement, Donor ID, and role of the surgeon.

3.	The surgeon has maintained a current working knowledge of liver transplantation, define
	as direct involvement in liver transplant patient care within the last 2 years.
	Check all that apply
	$\ \square$ The surgeon has experience managing patients with end stage liver disease.
	$\ \square$ The surgeon has experience with the selection of appropriate recipients for
	transplantation.

#### Part 8B: Primary Pediatric Liver Transplant Physician Requirements

	Name NPI #
2.	Check yes or no for each of the following. Provide documentation where applicable:
Yes No	
	2a. Does the physician have an M.D., D.O., or equivalent degree from another country, with a current license to practice medicine in the hospital's state or jurisdiction?  Provide a copy of the physician's resume/CV.
	this hospital?
	Provide documentation from the hospital credentialing committee that it has verified the physician's state license, board certification, training, and transplant continuing medica education, and that the physician is currently a member in good standing of the hospital's medical staff.
3.	Certification.
	The physician is currently certified in gastroenterology or transplant hepatology of certification of added qualification for pediatric transplant hepatology by the American Board of Internal Medicine, the American Board of Pediatrics, or the Royal College of Physicians and Surgeons of Canada.
	Provide a copy of the physician's current board certification.
4.	Summarize the physician's training and experience in transplant:

Training and	Date (MM/DD/YY)				#LI Patients Followed		
Experience	Start	End	Transplant Hospital	Program Director	Pre	Peri	Post
Experience Post Fellowship							
Fellowship Training							

5. Which of the following pathways is the proposed primary physician applying (check one, and complete the corresponding pathway section below):
<ul> <li>☐ The 3-year pediatric gastroenterology fellowship pathway, as described in Section 5 below.</li> <li>☐ The 12-month pediatric transplant hepatology fellowship pathway, as described in Section 5B below.</li> </ul>
☐ The combined pediatric gastroenterology or transplant hepatology training and experience pathway, as described in <i>Section 5</i> below.

OMB No. 0915-0184 Expiration Date: 08/31/2023

#### 5A. Three-year Pediatric Gastroenterology Fellowship Pathway

A physician can meet the requirements for primary liver transplant physician by completion of 3 years of pediatric gastroenterology fellowship training as required by the American Board of Pediatrics in a program accredited by the Residency Review Committee for Pediatrics (RRC-Ped) of the Accreditation Council for Graduate Medical Education (ACGME). The training must contain at least 6 months of clinical care for transplant patients, and meet the following conditions:

- The physician is currently board certification in pediatric gastroenterology or a pediatric transplant hepatology certification of added qualification by the American Board of Pediatrics or the Royal College of Physicians and Surgeons of Canada.
   Provide a copy of the physician's current board certification.
- 2. During the 3-year training period the physician was directly involved in the primary care of 10 or more newly transplanted pediatric liver recipients and followed 20 newly transplanted liver recipients for a minimum of 3 months from the time of transplant, under the direct supervision of a qualified liver transplant physician along with a qualified liver transplant surgeon. The physician was also directly involved in the preoperative, perioperative and post-operative care of 10 or more liver transplants in pediatric patients. The pediatric gastroenterology program director may elect to have a portion of the transplant experience carried out at another transplant service, to meet these requirements. This experience must be documented on a log that includes the date of transplant, medical record number or other unique identifier, and the signature of the training program director or the transplant program's primary transplant physician.
- 3. The experience caring for pediatric patients occurred at a liver transplant program with a qualified liver transplant physician and a qualified liver transplant surgeon that performs an average of at least 10 liver transplants on pediatric patients per year.
- 4. The physician has observed at least 3 liver procurements. The physician must have observed the evaluation, donation process, and management of these donors. This experience must be documented on a log that includes the date of procurement and Donor ID.
- 5. The physician has observed at least 3 liver transplants.

  This experience must be documented on a log that includes transplant date, donor type, and medical record number or other unique identifier.
- 6. The physician has maintained a current working knowledge of liver transplantation, defined as direct involvement in liver transplant patient care <u>within the last 2 years</u>. Check all that apply

5B.	Dediatric '	Trancolant	Hepatology	Fellowshin	Dathway
JD.	Pediatric	Hansbiani	HEDALOIOSY	Lellowsiiir	, Pauliway

The requirements for primary liver transplant physician can be met during a separate pediatric transplant hepatology fellowship if the following conditions are met:

- 1. The physician is currently board certified pediatric gastroenterology or has a current pediatric transplant hepatology certification of added qualification by the American Board of Pediatrics, the Royal College of Physicians and Surgeons of Canada, or is approved by the American Board of Pediatrics to take the certifying exam.
  Provide a copy of the physician's current board certification or documentation of approval to take the certifying exam.
- 2. During the fellowship the physician was directly involved in the primary care of 10 or more newly transplanted pediatric liver recipients and followed 20 newly transplanted liver recipients for at least 3 months from the time of transplant, under the direct supervision of a qualified liver transplant physician and in conjunction with a qualified liver transplant surgeon. The physician must have been directly involved in the pre-operative, perioperative and post-operative care of 10 or more liver transplants in pediatric patients. The pediatric gastroenterology program director may elect to have a portion of the transplant experience completed at another liver transplant program in order to meet these requirements.

This experience must be documented on a log that includes the date of transplant, medical record number or other unique identifier, and the signature of the training program director or the transplant program's primary transplant physician.

- 3. The experience in caring for pediatric liver patients occurred at a liver transplant program with a qualified liver transplant physician and surgeon that performs an average of at least 10 pediatric liver transplants a year.
- 4. The physician has maintained a current working knowledge of liver transplantation, defined as direct involvement in liver transplant patient care within the last 2 years.
  Check all that apply

5C.	<b>Combined Pediatric Gastroenterology/Transplant Hepatology Training and</b>
Experie	ence Pathway

A physician can meet the requirements for primary liver transplant physician if the following conditions are met:

- The physician is currently board certified in pediatric gastroenterology or a current pediatric transplant hepatology certification of added qualification by the American Board of Pediatrics, the Royal College of Physicians and Surgeons of Canada, or is approved by the American Board of Pediatrics to take the certifying exam.
   Provide a copy of the physician's current board certification or documentation of approval to take the certifying exam.
- 2. The physician gained a minimum of 2 years of experience during or after fellowship, or accumulated during both periods, at a liver transplant program.
- 3. During the 2 or more years of accumulated experience the physician was directly involved in the primary care of 10 or more newly transplanted pediatric liver recipients and followed 20 newly transplanted liver recipients for a minimum of 6 months from the time of transplant, under the direct supervision of a qualified liver transplant physician and along with a qualified liver transplant surgeon. The physician must have been directly involved in the pre-operative, peri-operative and post-operative care of 10 or more pediatric liver transplants recipients.

This experience must be documented on a log that includes the date of transplant, medical record number or other unique identifier, and the signature of the training program director or the transplant program's primary transplant physician.

#### Part 8C: Conditional Approval for a Pediatric Component

1.	the bylaw requirements:		
	Name Position		
2.	Name of Pediatric Primary Proposed Liver Transplant Surgeon or Physician who is being proposed as conditional personnel:		
	Name Position		
	gnated liver transplant program can obtain conditional approval for a pediatric component if of the following conditions is met:		
	one, and complete the corresponding portions of the application. Provide supporting entation where applicable:		
	ion A. The program has a qualified primary pediatric liver physician who meets <i>all</i> of the uirements and a surgeon who meets <i>all</i> of the following requirements:		
•	The surgeon is the current primary transplant surgeon for the liver program or meets <i>all</i> of the requirements in one of the pathways listed below:		
	O The formal 2-year transplant fellowship pathway as described in application <i>Part 3</i> , Section 5		
	O The liver transplant program clinical experience pathway, as described in application <i>Part</i> 3, <i>Section 5</i>		
•	The surgeon has performed at least 7 liver transplants, as the primary surgeon or first assistant, in recipients less than 18 years old at the time of transplant. At least 2 of these liver transplants must have been in recipients less than 6 years old or weighing less than 25 kilograms at the time of transplant. These transplants must have been performed during or after fellowship, or across both periods.  This experience must be documented on a log that includes the date of transplant, the		
	recipient's date of birth, the recipient's weight at transplant if less than 25 kilograms, the role of the surgeon, and the medical record number or other unique identifier.		
•	The surgeon has maintained a current working knowledge of pediatric liver transplantation, defined as direct involvement in pediatric liver transplant patient care within the last 2 years. This includes		

	☐ The surgeon has experience managing pediatric patients with end stage liver
diseas	2.
	$\square$ The surgeon has experience with the selection of appropriate pediatric recipients
	for transplantation.
	☐ The surgeon has experience with donor selection.
	☐ The surgeon has experience with histocompatibility and HLA typing.
	☐ The surgeon has experience performing the transplant operation.
	☐ The surgeon has experience with immediate post-operative and continuing
	inpatient care.
	☐ The surgeon has experience with the use of immunosuppressive therapy including
	side effects of the drugs and complications of immunosuppression.
	☐ The surgeon has experience with differential diagnosis of liver allograft
	dysfunction.
	$\square$ The surgeon has experience with histologic interpretation of allograft biopsies.
	☐ The surgeon has experience with interpretation of ancillary tests for liver
	dysfunction.
	☐ The surgeon has experience with long term outpatient care.

	dysfunction.
	☐ The physician has experience with long-term outpatient care of pediatric allograft
	recipients including management of hypertension, nutritional support, and drug
	dosage, including antibiotics, in the pediatric patient.
	If a box is not checked, please provide an explanation:
	• The physician should have observed at least 3 organ procurements and at least 3 liver transplants. In addition, the physician should have observed the evaluation of donor,
	the donation process, and the management of at least 3 multiple organ donors who
	donated a liver.
	This experience must be documented on the log provided.
	Provide the following letters with the application:
	O A letter from the qualified liver transplant physician and surgeon who have been
	directly involved with the physician documenting the physician's experience and
	competence.

OMB No. 0915-0184 Expiration Date: 08/31/2023

- O A letter of recommendation from the primary physician and transplant program director at the fellowship training program or transplant program last served by the physician outlining
  - the individual's overall qualifications to act as a primary transplant physician,
  - the individual's personal integrity and honesty,
  - the individual's familiarity with and experience in adhering to OPTN obligations,
  - and any other matters judged appropriate

The MPSC may request additional recommendation letters from the primary physician, primary surgeon, director, or others affiliated with any transplant program previously served by the physician, at its discretion.

O A letter from the physician that details the training and experience the physician gained in liver transplantation.

A designated liver transplant program's conditional approval for a pediatric component is valid for a maximum of 24 months.

OMB No. 0915-0184 Expiration Date: 08/31/2023

#### Part 9: Liver Transplant Programs that Perform Living Donor Recovery

A liver recovery hospital is a designated liver transplant program that performs the surgery to recover livers for transplantation from living donors.

1. Living Donor Surgeon

A liver recovery hospital must have on site at least 2 surgeons who:

| Meet the primary liver transplant surgeon requirements as outlined in Part 5 of the application above.

| Have demonstrated experience as the primary surgeon, co-surgeon, or first assistant by completion of at least 20 major liver resection surgeries, including living donor procedures, splits, reductions, and resections, within the past 5 years. Of these 20 major liver resection surgeries, seven must have been live donor procedures, and at least 10 must have been performed as the primary surgeon or co-surgeon.

This experience must be documented on a log that includes the date of the surgery, the role of the surgeon, and the medical record number or other unique identifier.

Name o	Name of Proposed Living Donor Surgeon(s):				
	Name	NPI #			
	Name	 NPI #			

#### 2. Independent Living Donor Advocate (ILDA)

The liver recovery hospital must have an independent living donor advocate (ILDA) who is not involved with the evaluation or treatment decisions of the potential recipient, and is a knowledgeable advocate for the living donor. The ILDA must be independent of the decision to transplant the potential recipient and follow the protocols that outline the duties and responsibilities of the ILDA according to OPTN *Policy 14.2: Independent Living Donor Advocate (ILDA) Requirements.* 

Name of Independent Living Donor Advocate (ILDA):								

OMB No. 0915-0184 Expiration Date: 08/31/2023

#### **PUBLIC BURDEN STATEMENT**

The private, non-profit Organ Procurement and Transplantation Network (OPTN) collects this information in order to perform the following OPTN functions: to assess whether applicants meet OPTN Bylaw requirements for membership in the OPTN; and to monitor compliance of member organizations with OPTN Obligations. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this information collection is 0915-0184 and it is valid until 08/31/2023. This information collection is required to obtain or retain a benefit per 42 CFR §121.11(b) (2). All data collected will be subject to Privacy Act protection (Privacy Act System of Records #09-15-0055). Data collected by the private non-profit OPTN also are well protected by a number of the Contractor's security features. The Contractor's security system meets or exceeds the requirements as prescribed by OMB Circular A-130, Appendix III, Security of Federal Automated Information Systems, and the Departments Automated Information Systems Security Program Handbook. The public reporting burden for this collection of information is estimated to average 3 hours per response, including the time for reviewing instructions, searching existing data sources, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to HRSA Reports Clearance Officer, 5600 Fishers Lane, Room 14N136B, Rockville, Maryland, 20857 or paperwork@hrsa.gov.
