E-Cig Intro	<p>The next questions are about electronic vapor products. These are devices that usually contain a nicotine-based liquid that is vaporized and inhaled. You may also know them as e-cigarettes, vape-pens, hookah-pens, electronic hookahs (e-hookahs), electronic cigars (e-cigars), electronic pipes (e-pipes), or e-vaporizers. Some brand examples are Blu, NJOY, Vuse, MarkTen, Fin, and Logic. Some examples of electronic vapor products are pictured below.</p>		Revision	<p>The next questions are about vaping (using e-cigarettes, vape pens, JUULs, mods, other personal vaporizers). Vaping products are battery-powered and produce vapor instead of smoke. They typically use a nicotine liquid, although the amount of nicotine can vary and some may not contain any nicotine at all. Some common brands are JUUL, Vuse, MarkTen, Logic, and Blu.</p> <p>These questions concern electronic vaping products for nicotine use. The use of electronic vaping products for marijuana use is not included in these questions.</p>
