

PRIVACY THRESHOLD ANALYSIS (PTA)

This form serves as the official determination by the DHS Privacy Office to identify the privacy compliance requirements for all Departmental uses of personally identifiable information (PII).

A Privacy Threshold Analysis (PTA) serves as the document used to identify information technology (IT) systems, information collections/forms, technologies, rulemakings, programs, information sharing arrangements, or pilot projects that involve PII and other activities that otherwise impact the privacy of individuals as determined by the Chief Privacy Officer, pursuant to Section 222 of the Homeland Security Act, and to assess whether there is a need for additional Privacy Compliance Documentation. A PTA includes a general description of the IT system, information collection, form, technology, rulemaking, program, pilot project, information sharing arrangement, or other Department activity and describes what PII is collected (and from whom) and how that information is used and managed.

Please complete the attached Privacy Threshold Analysis and submit it to your component Privacy Office. After review by your component Privacy Officer the PTA is sent to the Department's Senior Director for Privacy Compliance for action. If you do not have a component Privacy Office, please send the PTA to the DHS Privacy Office:

Senior Director, Privacy Compliance
The Privacy Office
U.S. Department of Homeland Security
Washington, DC 20528
Tel: 202-343-1717

PIA@hq.dhs.gov

Upon receipt from your component Privacy Office, the DHS Privacy Office will review this form and assess whether any privacy compliance documentation is required. If compliance documentation is required – such as Privacy Impact Assessment (PIA), System of Records Notice (SORN), Privacy Act Statement, or Computer Matching Agreement (CMA) – the DHS Privacy Office or component Privacy Office will send you a copy of the relevant compliance template to complete and return.

Specialized Template for Information Collections (IC) and Forms

The Forms-PTA is a specialized template for Information Collections and Forms. This specialized PTA must accompany all Information Collections submitted as part of the Paperwork Reduction Act process (any instrument for collection (form, survey, questionnaire, etc.) from ten or more members of the public). Components may use this PTA to assess internal, component-specific forms as well.

SPECIFIC IC/Forms PTA QUESTIONS

1. Purpose of the Information Collection or Form

The purpose of the information collection is to ensure that each owner/operator of a commercial fishing vessel can assess the safety of their vessels and document compliance with safety regulations. This information is also used by the Coast Guard to determine compliance of fishing vessels requirements.

For a request for a waiver of the citizenship requirements for crewmembers on commercial fishing vessels, the information is used by the CG to determine whether or not to grant relief from the requirements.

For this information collection we collect basic business contact information which may include the name and address of the vessel owner/operator, if owned/operated by an individual. Additionally, records maintained onboard or submitted to the Coast Guard may include the name and position of crewmembers. For a request for a waiver of the citizenship requirements, submissions include prospective crewmember name, nationality, birth place, position to be held and employment authorization.

The authority for this collection is 46 U.S.C. Chapter 45, 46 U.S.C. 6104, 46 U.S.C. 8103 and 46 U.S.C. 10603.

DHS Privacy Office Comments: <i>Please describe rationale for privacy compliance determination above.</i>	
<p>USCG is submitting this PTA to discuss the Commercial Fishing Industry Vessel Safety Regulations information collection, which is associated with OMB Control Number 1625-0061. The purpose of this information collection is to ensure that each owner/operator of a commercial fishing vessel can assess the safety of their vessels and document compliance with safety regulations. This information is also used by USCG to determine compliance of fishing vessels requirements. Additionally, certificates of completion of training, which may be issued by the accepted instructors, will provide proof to USCG that they have completed the required training and that they are qualified to conduct the required drills and instruction. For this information collection USCG collects basic business contact information which may include the name and address of the vessel owner/operator, if owned/operated by an individual. Additionally, these training records maintained onboard or submitted to the Coast Guard may include the name and position of crewmembers.</p> <p>There is no form associated with this information collection, but the records that USCG receives are maintained in Marine Information for Safety and Law Enforcement (MISLE) database. Information is either received electronically or by paper, and is then scanned into MISLE. Records are retrieved by a vessel-specific search.</p> <p>PIA coverage can be found under DHS/USCG/PIA-008 MISLE, which outlines the risks of capturing information required to support the Coast Guard's marine safety, security, environmental protection, and law enforcement programs. SORN coverage is not</p>	

technically required as the information is retrieved by search using vessel-specific information. However, DHS/USCG-013 MISLE does provide notice of this type of information collection.

Additionally, for a request for a waiver of the citizenship requirements for crewmembers on commercial fishing vessels, additional information is used by USCG to determine whether or not to grant relief from the requirements. Submissions include prospective crewmember name, nationality, birth place, position to be held and employment authorization. There is also no form associated with this information collection.

PIA coverage is provided by DHS/USCG/PIA-015 Merchant Mariner Licensing and Documentation System, which specifically outlines the MMLD system and the information it collects. SORN coverage is provided by DHS/USCG-030 Merchant Seamen's Records, which allows for the collection of information in order to administer the Commercial Vessel Safety Program to determine domestic and international qualifications for the issuance of licenses, documents, and staff officer certifications. This includes establishing eligibility of a merchant mariner's document, duplicate documents, or additional endorsements issued by USCG.
