

Request for Approval under the “Generic Clearance for the Collection of Routine Customer Feedback” (OMB Control Number: 2010-0042)

TITLE OF INFORMATION COLLECTION: Office of Environmental Justice’s EJSCREEN Impact Survey

PURPOSE:

In 2021, EPA will focus on EJSCREEN training as a national EJ program strategic commitment. The Office of Environmental Justice (OEJ) asked the various National Program Managers and EPA regional offices to make commitments around EJSCREEN in at least one of the three strategic priorities. Those priorities are:

1. Directly support and engage EJ Communities
2. Support the efforts of external partners (primarily other federal agencies, states, tribes, local governments) on their EJ efforts
3. Support the integration of EJ considerations across all of EPA’s policies, programs and activities

EPA would like to perform a survey to follow up on this training to examine its impact to affect policy changes and programmatic uses, both internally and outside of EPA. Following the completion of this training effort, OEJ would like to follow up with training participants and others using the tool within 6 to 18 months. This will give the participants time to incorporate the use of the tool into programs, activities, and policies prior to the survey. EPA will use the email addresses, acquired during training, to share details of this survey and the SurveyMonkey link where participants can access and complete the survey. Other methods for disseminating information on the EJSCREEN Impact Survey is through the EJSCREEN website, EJ in Action Blog, EJ listserv, and the EPA’s Twitter and Facebook accounts. The purpose of the EJSCREEN Impact Survey is to collect feedback from training participants on their user experiences of EJSCREEN and how they have utilized the tool in action. Participant responses will be used to identify how EJSCREEN is being or has been used and how OEJ can improve the quality of the mapping tool.

DESCRIPTION OF RESPONDENTS:

OEJ anticipates primary respondents to be EJ stakeholders who conduct analyses using environmental and demographic information from a variety of different workforce sectors.
