Section II: Product Shipment Information Form Instructions

Please answer questions 1 and 2 in the “Classification” column below. Your company’s classification will determine which product-specific sections of this reporting form should be completed.

Note: If your company is responsible for the certification of products, but your products have not yet earned the WaterSense label, you should check “Yes” in Row 1 below and report the total number of products shipped for that category. WaterSense uses the total product shipment data reported in this form to estimate the water savings and impact associated with WaterSense labeled products.

Classification	Tank-Type Toilets	Lavatory Faucets	Lavatory Faucet Accessories <small>(e.g., faucet flow restrictors, flow regulators, aerator devices, and laminar devices)</small>		Flushing Urinals	Showerheads
			Shipped as components for use in lavatory faucets	Shipped for sale as individual aftermarket devices

Classification Table

Either “Yes” or “No” must be marked for *each product category in each classification row* for the period between January 1, 2012, and December 31, 2012.

- In an effort to prevent double counting products, WaterSense will only count product shipment data from certification file owners. Additional companies should remind the certification file owner to submit a WaterSense Manufacturer Annual Reporting Form.
- **If you checked “Yes” in response to both questions for a product category**, please complete the product-specific section for that product category as indicated in the table above, but **ONLY** include shipment data on products for which you are the certification file owner, NOT an additional company.
- **If you checked “No” in response to both questions for a product category**, you do not need to complete the product-specific section for that product category.
