## Attachment # 12

## Sample Analysis Tables

## TABLE 1. Program characteristics, by syringe service program location — United States

	SSP location				
	Rural No. (%)	Suburban No. (%)	Urban No. (%)	U.S. total No.	
Region					
Midwest					
Northeast					
Puerto Rico					
South					
West					
Total					
Program size (no. of syringes distributed)					
Small (1–9,999)					
Medium (10,000-55,000)					
Large (55,001–499,999)					
Very large (≥500,000)					
None/unknown/missing					
Total					
No. of syringes distributed					
No. of SSPs reporting no. of syringes					
Median no. of syringes per SSP					
Mean no. of syringes per SSP					
Total no. of syringes					
Total SSP funding					
Mean cost per SSP					
Total cost for SSP location					
Public funding of SSP (city, county, and state funding)					
Yes					
No					
Jnknown/missing					
Total					

## TABLE 2. Selected syringe service program operating characteristics and selected services, by syringe service program location — United States SSP location

Characteristic	SSP location			
	Rural	Suburban	Urban	
	(%)	(%)	(%)	
Operating Characteristic				
Syringes estimated to be distributed via secondary				
exchange				
Mobile exchange				
Experienced a lack of resources/funding				
Full-time paid personnel				
Former drug users as program personnel				
Selected Service				
Onsite HIV testing				
Onsite HCV testing				
Onsite STI screening				

Distribution of naloxone Referral to medications for opioid use disorder (MOUD)
