

Instructions:

1. Complete the measure template below by entering your candidate measure information in the column titled “Add Your Content Here.”
2. All rows that have an asterisk symbol * in the Field Label require a response. These rows also appear unshaded.
3. All rows shaded in gray are optional. You are encouraged to complete all rows that are applicable to your measure.
4. For each row, the “Guidance” column provides details about how to complete the form and what kind of data to include in your response.
5. For check boxes, note whether the field is “select one” or “select all that apply.” You can click on the box to place or remove the “X.”
6. If you have lengthy text to insert, place the text at the bottom of the form, clearly indicating your intended row number or field label.
7. Send completed templates and any accompanying files (e.g., MIPS Peer Review Journal Article attachment, testing data, MAT information) **by June 30, 2020** to prerulemaking@battelle.org
8. If you need to submit a measure change, please use the “Review” tab in Word and select “Track Changes” or highlight any updates you made to the measure, then by September 4, 2020, send the revised template to prerulemaking@battelle.org

8	* Measure Title	Provide the measure title only (255 characters or less). Put program-specific ID number in the next field, not in the title. Note: Do not enter the NQF ID, former JIRA MUC ID number, or any other ID numbers here (see other fields below). The CMS program name should not ordinarily be part of the measure title, because each measure record already has a required field that specifies the CMS program. An exception would be if there are several measures with otherwise identical titles that apply to different programs. In this case, including or imbedding a program identifier in the title (to prevent there being any otherwise duplicate titles) is helpful.	
9	Measure ID	Alphanumeric identifier (if applicable), such as a recognized program ID number for this measure (20 characters or less). Examples: 199 GPRO HF-5; ACO 28; CTM-3; PQI #08. Fields for the NQF ID number and previous year(s) JIRA MUC ID number are provided in other data fields within this form.	
10	* Measure description	Provide a brief description of the measure (700 characters or less).	
11	* Numerator	The upper portion of a fraction used to calculate a rate, proportion, or ratio. A clinical action to be counted as meeting a measure's requirements. For all fields, especially Numerator and Denominator, use plain text whenever possible. If needed, convert any special symbols, math expressions, or equations to plain text (keyboard alphanumeric, such as + - * /). This will help reduce errors and speed up data conversion, team evaluation, and MUC report formatting. For all free-text fields: Be sure to spell out all abbreviations and define special terms at their first occurrence. This will save time and revision/editing cycles during clearance.
