

Instructions:

1. Before accessing the CMS MERIT (Measures Under Consideration Entry/Review and Information Tool) online system, you are invited to complete the measure template below by entering your candidate measure information in the column titled “Add Your Content Here.”
2. All rows that have an asterisk symbol * in the Field Label require a response.
3. For each row, the “Guidance” column provides details on how to complete the template and what kinds of data to include.
4. For check boxes, note whether the field is “select one” or “select all that apply.” You can click on the box to place or remove the “X.”
5. Row numbers are for convenience only and do not appear on the MERIT user interface.
6. Send any questions to MMSsupport@battelle.org.

PROPERTIES

Subsection	Row	Field Label	Guidance	[ADD YOUR CONTENT HERE]
Measure Information	001	*Measure Title	Provide the measure title only (255 characters or less). Put any program-specific identification (ID) number under Characteristics, not in the title. Note: Do not enter the CMIT ID, consensus-based entity (endorsement) ID, former Jira MUC ID number, or any other ID numbers here (see other fields below). The CMS program name should not ordinarily be part of the measure title, because each measure record already has a required field that specifies the CMS program. An exception would be if there are several measures with otherwise identical titles that apply to different programs. In this case, including or imbedding a program name in the title (to prevent there being any otherwise duplicate titles) is helpful.	
Measure Information	002	*Measure description	Provide a brief description of the measure (700 characters or less).	

Subsection	Row	Field Label	Guidance	[ADD YOUR CONTENT HERE]
Measure Information	003	*Numerator	<p>The upper portion of a fraction used to calculate a rate, proportion, or ratio. An action to be counted as meeting a measure's requirements. For all fields, especially Numerator and Denominator, use plain text whenever possible. If needed, convert any special symbols, math expressions, or equations to plain text (keyboard alphanumeric, such as + - * /). This will help reduce errors and speed up data conversion, team evaluation, and MUC report formatting.</p> <p>For all free-text fields: Be sure to spell out all abbreviations and define special terms at their first occurrence. This will save time and revision/editing cycles during clearance.</p>	
Measure Information	004	*Numerator Exclusions	<p>For additional information on exclusions/exceptions, see: https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/MMS/Downloads/Blueprint.pdf. If not applicable, enter 'N/A.'</p>	
Measure Information	005	*Denominator	<p>The lower part of a fraction used to calculate a rate, proportion, or ratio. The denominator is associated with a given population that may be counted as eligible to meet a measure's inclusion requirements.</p>	
Measure Information	006	*Denominator Exclusions	<p>For additional information on exclusions/exceptions, see: https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/MMS/Downloads/Blueprint.pdf. If not applicable, enter 'N/A.'</p>

Measure Information	007	*Denominator Exceptions	For additional information on exclusions/exceptions, see: https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/MMS/Downloads/Blueprint.pdf . If not applicable, enter 'N/A.'	
Measure Information	008	*Briefly describe the peer reviewed evidence justifying this measure	Add description of evidence. If you have lengthy text, add the evidence as an attachment, named to clearly indicate the related form field. You may attach the completed CMS consensus-based entity "Evidence Attachment" if applicable.	
Measure Information	009	Evidence that the measure can be operationalized	Provide evidence that the data source used by the measure is readily available to CMS. Summarize how CMS would operationalize the measure. For electronic clinical quality measures (eCQMs), attach feasibility scorecard or other quantitative evidence indicating measure can be reported by the intended reporting entities. If you have lengthy text, add the evidence as an attachment, named to clearly indicate the related form field.

Burden	014	*Burden for Provider: Was a provider workflow analysis conducted?	Select one	<input type="checkbox"/> Yes <input type="checkbox"/> No
Burden	015	*If yes, how many sites were evaluated in the provider workflow analysis?	Enter the number of sites that were evaluated in the provider workflow analysis.	
Burden	016	*Did the provider workflow have to be modified to accommodate the new measure?	Select one	<input type="checkbox"/> Yes <input type="checkbox"/> No
Burden	017	*If yes, how would you describe the degree of effort?	Select one	<input type="checkbox"/> 1 (little to no effort) <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 (substantial effort)
Burden	018	*Does the measure require manual abstraction?	Select one	<input type="checkbox"/> Yes <input type="checkbox"/> No
Burden	019	*If yes, what is the estimated time per record to abstract data?	Enter time in minutes. If unknown, enter 0.	
Burden	020	*How many data elements will be collected for the measure?	Enter number of elements. If a data element has to be abstracted more than once per record (e.g., medication dose is abstracted once for each of the patient's medications), estimate the average number of times it would be abstracted per eligible case and include that in the total number of data elements.

Impact	051	*Estimated impact of the measure: Estimate of annual denominator size	Enter numerical value or “unable to determine.”	
Impact	052	*Estimate of annual improvement in measure score	Enter numerical value or “not applicable.” State the expected improvement in absolute terms in the units expressed by the measure, for example, percentage points or patients per 1000. Using the estimated annual denominator size and median measure scores from your test data, estimate the number of additional numerator events or outcomes that would be achieved during each performance period if measured entities below the median score achieved at least the median measure score. For inverse measures, estimate the number of additional numerator events or outcomes avoided if measured entities above the median score achieved the median measure score.	

Subsection	Row	Field Label	Guidance	[ADD YOUR CONTENT HERE]
Cost Factors	053	*Estimated Cost Avoided by the Measure: Estimate of average cost savings per event	Numeric dollar value, “not applicable,” or “unable to determine.” Enter the estimated average net cost avoided per event as a numeric dollar value. If there is no anticipated impact, state “none.” If you are unable to estimate costs avoided, state “unable to determine.” If costs avoided are not an appropriate metric for your measure focus (e.g., mortality), state “not applicable.”	
Cost Factors	054	*Cost avoided annually by Medicare/Provider	Using the estimate for improvement and the estimated average cost savings per event, provide the costs that would be avoided by Medicare/provider annually as a numeric dollar value. If there is no anticipated impact, state “none.” If you are unable to estimate costs avoided, state “unable to determine.” If costs avoided are not an appropriate metric for your measure focus (e.g., mortality), state “not applicable.”	

Subsection	Row	Field Label	Guidance	[ADD YOUR CONTENT HERE]
Cost Factors	055	*Source of estimate	Briefly describe the assumptions for your cost estimates and cite the sources of cost information. If you did not identify sources of cost information, state "none." If costs avoided are not an appropriate metric for your measure focus (e.g., mortality), state "not applicable."	
Cost Factors	056	*Year of cost literature cited	Provide the year of the cost estimate (e.g., 2016 dollars). If adjusted for inflation, provide the year the estimate was adjusted to (e.g., 2020 dollars after adjusting for inflation). If you did not identify sources of cost information, state "none." If costs avoided are not an appropriate metric for your measure focus (e.g., mortality), state "not applicable."
