### 1. Online Group Concept Mapping (GCM)

This document provides an overview of the proposed SAF-T Project Group Concept Mapping (GCM) process including screenshots of what stakeholder participants will see as they navigate through the Concept Systems, Inc. online groupwisdom<sup>™</sup> GCM platform. The information in this document is presented in the order that participants will experience in the system and is organized by three main activities included in GCM (i.e., brainstorming, sorting, and rating). The initial "General Project Areas" section contains screenshots of messages to participants every time they access the system (whether it is their first time, or they are a returning user), including important elements such as safety warnings, informed consent, welcome, and thank you messages. The "Participant Questions" section contains questions that will be asked of all participants before the sorting and rating activity.

Depending upon how individuals are recruited, they may participate in GCM activities anonymously or confidentially. Participants referred to the GCM via The Hotline (i.e., victims/survivors of relationship abuse, family members of victims/survivors, or friends of victims/survivors) will participate <u>anonymously</u> and will not be assigned a login/password. While they will be able to return to the system as many times as they like for the brainstorming activity, anonymous route respondents will be encouraged to complete the sorting and rating in one sitting (for each activity) since their data are not linked across sessions through a login/password. As the instructions included below show, anonymous participants will be encouraged to start sorting or rating only if they have enough time to complete the activity.

Participants who participate via the <u>confidential</u> path will be able to return multiple times to complete the sorting and rating tasks using a confidential username and password. Each time directions provided in this document mention returning to complete activities, these directions are specific to confidentialroute respondents and will not be visible to the anonymous-route respondents. There are notes throughout this document indicating which directions anonymous participants will not see.

Given the aforementioned differences, there will also be two separate consent forms.<sup>1</sup> Finally, we include notes throughout this document to indicate where example data have been included for illustrative purposes. Example data will be removed before data collection begins.

1

<sup>&</sup>lt;sup>1</sup> See Appendix C.1: GCM Online Consent Form – Confidential Route and Appendix C.2: GCM Online Consent Form – Anonymous Route.

#### 2. General Project Areas

Exhibit 2a. Informed consent introductory text and safety alert

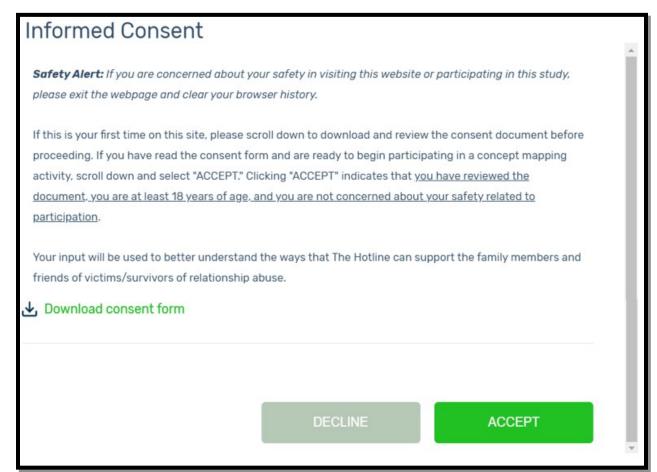

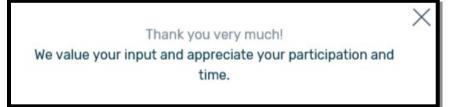

Exhibit 2b. Welcome message

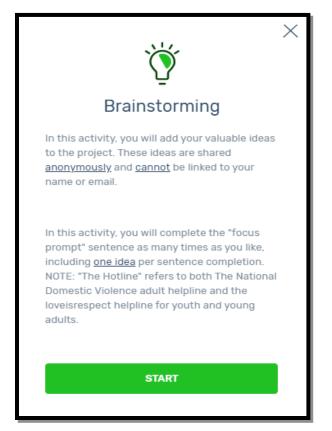

### Exhibit 2c. General completion thank you message

### 3. Brainstorming Activity

After respondents consent to participate, they will be provided with general instructions for participating in the brainstorming activity as illustrated in Exhibit 3a.

#### Exhibit 3a. Brainstorming activity general instructions message

After respondents select "START" at the bottom of the brainstorming activity general instructions message, they will be presented with pop-up windows with detailed instructions on the brainstorming activity as illustrated in Exhibits 3a-1 through 3a-4. Respondents can choose to skip or navigate forward or back through these activity instructions. After respondents progress through (or skip) these instructions, they will advance to the activity interface where they can begin the brainstorming activity (See Exhibit 3b).

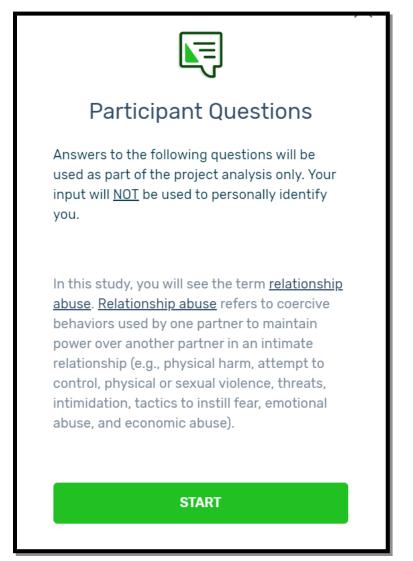

### Exhibit 3c. Brainstorming activity completion thank you message

#### 4. Participant Questions

Before beginning sorting/rating activities, participants will be prompted to answer participant questions and will be provided the definition of "relationship abuse" as illustrated in Exhibit 4a.

After respondents select "START" at the bottom of the participant questions overview message, they will be prompted to answer five participant questions. Screen shots of the five questions are illustrated in Exhibits 4b-1 through 4b-5. The responses to the participant questions will allow subsequent analyses of differences by key stakeholder group, age, race/ethnicity, and preferred mode of contacting The Hotline.

Exhibit 4b-1.	Stakeholder	group participant	question 1	: Stakeholder	group membership
---------------	-------------	-------------------	------------	---------------	------------------

l identify as a member of the following group(s) [check all that apply]: *
Relationship abuse refers to coercive behaviors used by one partner to maintain power over another partner in an intimate relationship (e. g., physical harm, attempt to control, physical and/or sexual violence, threats, intimidation, tactics to instill fear, emotional abuse, and eco nomic abuse).
Victim/survivor of relationship abuse
Family member of a victim/survivor
Friend of a victim/survivor
National Domestic Violence Hotline/loveisrespect staff member
Practitioner (e.g., therapist, service provider) working with people affected by relationship abuse (e.g., family members, friends, vi ctims/survivors)
I prefer not to answer

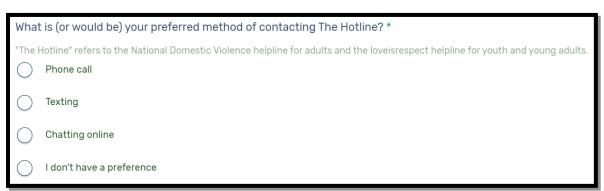

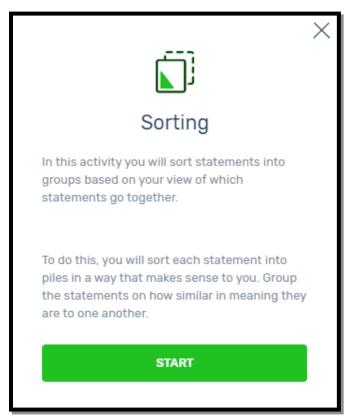

Exhibit 4b-5. Stakeholder group participant question 5: Preferred method of contacting The Hotline

#### 5. Sorting Activity

After responding to the five participant questions, respondents will be provided with general instructions for participating in the sorting activity as illustrated in Exhibit 5a.

After respondents select "START" at the bottom of the sorting activity general instructions message, they will be presented with pop-up window detailed instructions on the sorting activity as illustrated in Exhibits 5a-1 through 5a-3. Respondents can choose to skip or navigate forward or back through these activity instructions. After respondents progress through (or skip) these instructions, they will advance to the activity interface where they can begin the sorting activity (See Exhibit 5b-1).

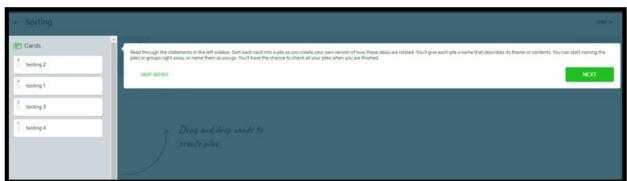

Exhibit 5b-1. Screenshot of pop-up window with sorting activity instructions: Sorting cards into piles\*

\* Text in screen shot: "Read through the statements in the left sidebar. Sort each card into a pile as you create your own version of how these ideas are related. You'll give each pile a name that describes its theme or contents. You can start naming the piles or groups right away, or name them as you go. You'll have the chance to check all your piles when you are finished." NOTE: All example statements under "Cards" will be removed before data collection.

# Exhibit 5b-2. Screenshot of pop-up window with sorting activity instructions: Editing and organizing piles\*

\* Text in screen shot: "Edit and organize piles in the blank area. People vary on how many piles they create. Usually 5 to 20 piles work well to organize this number of statements." NOTE: All example statements under "Cards" will be removed before data collection.

When respondents have completed the sorting activity, they will select "FINISH" and will receive a thank you message as illustrated in Exhibit 5d.

### Exhibit 5d. Sorting activity completion thank you message

### 6. Rating Activity

For the rating activity, respondents will be asked to rate statements according to importance and usefulness. At the beginning of the activity, respondents will see the importance section of the rating activity general instructions message as illustrated in Exhibit 6a.

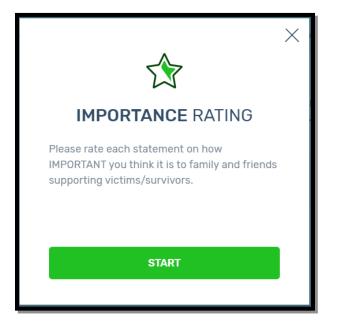

Exhibit 6a. Importance rating activity general instructions message

After respondents select "START" at the bottom of the importance section of the rating activity general instructions message, they will be presented with pop-up windows with detailed instructions on the importance section of the rating activity as illustrated in Exhibits 6a-1 and 6a-2. Respondents can choose to skip or navigate forward or back through these instructions. After respondents progress through (or skip) these instructions, they will advance to the activity interface where they can begin the importance section of the rating activity (See Exhibit 6b).
