### Supporting Statement For HHS/OHRP Consultation Process, Institutional Review Board Records

#### Background

The Office for Human Research Protections is requesting a new approval from the Office of Management and Budget of an Office for Human Research Protections (OHRP) requirement that Institutional Review Board records be submitted when an IRB or its institution request an HHS consultation process, for proposed research involving, respectively: (1) pregnant women, human fetuses or neonates; (2) prisoners; or, (3) children, as subjects that are not otherwise approvable by an IRB. This is a new information collection request.

## A. Justification

#### 1. <u>Need and legal basis</u>

The Department of Health and Human Services (HHS) Protection of Human Subjects regulations at 45 CFR part 46 include three subparts that have provisions that do not permit institutional review boards to approve certain categories of research, however do permit IRBs to refer such proposed research to HHS for approval consideration (referred to in this supporting statement as "HHS consultation process"). The Secretary of HHS<sup>1</sup> may determine that such research can be conducted or supported by HHS, after consulting with experts and allowing for public review and comment on the proposed research.

The provisions in the above-referenced subparts are:

(1) 45 CFR part 46, subpart B (Additional Protections for Pregnant Women, Human Fetuses and Neonates Involved in Research), §46. 207 – Research not otherwise approvable which presents an opportunity to understand, prevent, or alleviate a serious problem affecting the health or welfare of pregnant women, fetuses, or neonates.<sup>2</sup>

<sup>&</sup>lt;sup>1</sup> The Secretary's authority has been delegated to the Assistant Secretary for Health (ASH), 44 FR 46318 (August 7, 1979); see 67 FR 10216 (March 6, 2002).

 $<sup>^2</sup>$  The Secretary will conduct or support research that the IRB does not believe meets the requirements of \$46.204 or \$46.205 only if:

(2) 45 CFR part 46, subpart C (Additional Protections Pertaining to Biomedical and Behavioral Research Involving Prisoners as Subjects), §46.306 (iii) and (iv) – Permitted research involving prisoners,

- §46.306 (iii), Research on conditions particularly affecting prisoners as a class (for example, vaccine trials and other research on hepatitis which is much more prevalent in prisons than elsewhere; and research on social and psychological problems such as alcoholism, drug addiction, and sexual assaults) provided that the study may proceed only after the Secretary has consulted with appropriate experts including experts in penology, medicine, and ethics, and published notice, in the Federal Register, of his intent to approve such research;
- §46.306 (iv) Research on practices, both innovative and accepted, which have the intent and reasonable probability of improving the health or well-being of the subject. In cases in which those studies require the assignment of prisoners in a manner consistent with protocols approved by the IRB to control groups which may not benefit from the research, the study may proceed only after the Secretary has consulted with appropriate experts, including experts in penology, medicine, and ethics, and published notice, in the Federal Register, of the intent to approve such research.

(3) 45 CFR part 46, subpart D (Additional Protections for Children Involved as Subjects in Research), §46.407 – Research not otherwise approvable which presents an opportunity to understand, prevent, or alleviate a serious affecting the health or welfare of

(1) That the research in fact satisfies the conditions of §46.204, as applicable; or

(2) The following:

(042455

(ii) The research will be conducted in a ccord with sound ethical principles; and

(iii) Informed consent will be obtained in a ccord with the informed consent provisions of subpart A and other applicable subparts of this part.

<sup>(</sup>a) The IRB finds that the research presents a reasonable opportunity to further the understanding, prevention, or alleviation of a serious problem affecting the health or welfare of pregnant women, fetuses or neonates; and

<sup>(</sup>b) The Secretary, after consultation with a panel of experts in pertinent disciplines (for example: science, medicine, ethics, law) and following opportunity for public review and comment, including a public meeting announced in the FEDERAL REGISTER, has determined either:

<sup>)</sup> The research presents a reasonable opportunity to further the understanding, prevention, or alleviation of a serious problem affecting the health or welfare of pregnant women, fetuses or neonates;

#### children.3

In order for OHRP, on behalf of the Secretary of HHS, to determine if an expert panel consultation and public review and comment process should be performed, the referring institution or IRB must submit information supporting its request.

#### 2. <u>Purpose and Use of the Information</u>

If an IRB has determined that a research protocol meets the conditions to refer it to OHRP to be considered under an HHS consultation process, the IRB or its institution may submit the research protocol and supporting information to OHRP. The information that must be submitted to OHRP includes the research protocol, informed consent, parental permission or child assent documentation, and other relevant IRB records (e.g., IRB minutes).

OHRP uses this information to determine whether or not an HHS consultation process should be performed.

#### 3. Use of Improved Information Technology and Burden Reduction

This information collection imposes no technological or standard format requirements for respondents. We encourage automated technology if possible.

 $<sup>^{3}</sup>$  HHS will conduct or support research that the IRB does not believe meets the requirements of 46.404, 46.405, or 46.406 only if:

<sup>(</sup>a) the IRB finds that the research presents a reasonable opportunity to further the understanding, prevention, or alleviation of a serious problem affecting the health or welfare of children; and

<sup>(</sup>b) the Secretary, after consultation with a panel of experts in pertinent disciplines (for example: science, medicine, education, ethics, law) and following opportunity for public review and comment, has determined either:

<sup>(1)</sup> that the research in fact satisfies the conditions of 46.404, 46.405, or 46.406, as applicable, or (2) the following:

<sup>(</sup>i) the research presents a reasonable opportunity to further the understanding, prevention, or a lleviation of a serious problem affecting the health or welf are of children;

<sup>(</sup>ii) the research will be conducted in accordance with sound ethical principles;

<sup>(</sup>iii) adequate provisions are made for soliciting the assent of children and the permission of their parents or guardians, as set forth in §46.408.

#### 4. Efforts to Identify Duplication and Use of Similar Information

There is no duplication resulting from these requirements.

#### 5. <u>Impact on Small Businesses or Other Small Entities</u>

Support of research activities involving human subjects extends to small businesses. The collection of information requested will not have a significant economic impact on the small businesses.

6. <u>Consequences if Information is Collected Less Frequently</u>

Without this information collection, OHRP would not be able to determine whether or not an HHS consultation process should be performed.

#### 7. <u>Special Circumstances Relating to the Guidelines of 5 CFR 1320.5</u>

There are no special circumstances for this collection of information.

8. <u>Consultation Outside of Agency</u>

Public Comments were solicited for a 60-day period in the Federal Register published on July 29, 2021 (86 FR 40860) on this information collection. There was a comment received. Please see the supplemental document in ROCIS.

9. Explanation of Any Payment or Gift to Respondents

No payments or gifts will be provided to respondents of this information collection.

10. Assurance of Confidentiality Provided to Respondents

Collected information will be kept private to the extent required by law.

11. Justification for Sensitive Questions

No sensitive information is being collected.

12. Estimates of Annualized Burden Hours and Costs

#### 12 a. <u>Annualized Reporting Burden Estimate</u>

As of May 27, 2021, a total of 5,937 active IRBs that indicate they review HHSconducted or supported research are registered with OHRP. The expectation is that we may receive up to ten referrals a year that involve 1) pregnant women, human fetuses and neonates; (2) prisoners; or, (3) children, as subjects that are not otherwise approval by an IRB. We assume that each respondent would need an hour to submit the required information.

					<b>T</b> 1
45 CFR part	Respondent	No. of	No. of	Average	Total
46 - HHS	Туре	Respondents	Respondents	Burden	Burden
Consultation				per	Hours
Process				Response	
Provision				(in	
				hours)	
subpart B,	IRBs	3	1	1	3
§46.207					
subpart C,	IRBs	3	1	1	3
§46.306 (iii)					
and (iv)					
subpart D,	IRBs	4	1	1	4
§46.407					
TOTAL					10

#### **Estimated Annualized Burden Hours**

#### 12b. <u>Annualized Cost Burden Estimate</u>

#### **Estimated Annualized Respondents Costs**

45 CFR part	Respondent	Total Burden	Hourly Wage	Total
46 - HHS	Туре	Hours	Rate	Respondent
Consultation				Costs
Process				
Provision				
subpart B,	IRBs	3	\$43.00	\$129.00
§46.207				
subpart C,	IRBs	3	\$43.00	\$129.00
§46.306 (iii)				
and (iv)				

subpart D,	IRBs	4	\$43.00	\$172.00
§46.407				
TOTAL				\$430.00

We estimate an average wage of \$43 per hour. When multiplied by the total number of burden hours (10), we estimate the information collection costs respondents an average of \$430.00 annually.

#### 13. <u>Capital Costs</u> (Maintenance of Capital Costs)

There are no direct capital costs to respondents.

#### 14. Annualized Cost to the Federal Government

The expectation is that it will take OHRP staff 15 hours to check the collected information for each set of IRB records that are submitted, at an hourly rate of \$66.54. We estimate the annual cost to the Federal government will be \$9,981.00.

#### 15. Program or Burden Changes

This is a new collection.

#### 16. <u>Publication and Tabulation Dates</u>

When OHRP determines that an HHS consultation process will be performed, the collected information (e.g., research protocol and supporting materials) will be posted for public review and comment. It would be extremely helpful for OMB to approve this information request as soon as possible.

#### 17. Reasons Display of OMB Expiration Date is Inappropriate

The program agrees to show the approval date.

18. Exceptions to Certification for Paperwork Reduction Act Submissions

There are no exceptions to the certification.
