**Assumptions:**

<sup>a</sup> This ICR uses the following labor rates for privately-owned sources: \$148.45 for managerial, \$121.46 for technical. Source: Bureau of Labor Statistics, March 2020, “Table 2. Civilian Workers, by occupational and industry group.” The rates are packages available to those employed by private industry.

<sup>b</sup> This is a one-time activity and there are no new sources anticipated to become subject to the standard during the period of the ICR.

<sup>c</sup> We have assumed that there are approximately 9 existing sources that are subject to the standard, with no new sources added each year.

<sup>d</sup> We have estimated 18 control devices requiring Method 22 testing and visual emission inspection at the 9 existing sources. During testing, it is assumed that each of the 9 existing sources has one building per source and that all buildings will be tested.

<sup>e</sup> One-time activity. Assume the facilities hire a contractor.

<sup>f</sup> The 9 existing plants would be required to submit an Annual Compliance Certification each year.

<sup>g</sup> Assumes that 2 facilities per year would have to submit a report of exceedance.

<sup>h</sup> Recordkeeping requirements cover all existing plants.

<sup>i</sup> Transmittals would include Annual Compliance Certifications for 9 plants.

<sup>j</sup> Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.
