Assumptions:

^a We assume that there are an average of 214 existing sources that are subject to the standard over the three-year period of this modified sources per year over the three-year period of this ICR.

- ^b This ICR uses the following labor rates for privately-owned sources: \$148.45 for managerial, \$121.46 for technical, and \$6 Department of Labor, Bureau of Labor Statistics, March 2020, "Table 2. Civilian Workers, by occupational and industry group have been increased by 110 percent to account for the benefit packages available to those employed by private industry.
- ^c We assume that all existing respondents will take 2 hours each year to re-familiarize with the rule. We assume that all new r
- ^d We have assumed that it will take 60 hours for each new respondent to perform initial performance tests and submit the report test due to failure.
- ^e Monitoring of operations includes: implementation of Standards Operating Procedures (SOP) for operation and maintenance monthly leak detection inspection of control equipment.
- ^f Per §60.8(g), compliance status is determined by the permitting authority on examination of the performance test results. §60.7(a)(3) requires notification of the date of actual startup.
- ^g NSPS Subpart XX does not require annual or semiannual reporting.
- ^h We assume that it will take 1.5 hours, fifty times per year, for each respondent to maintain SSM records.
- ⁱ We assume that each respondent will take 0.1 hour or 6 minutes to enter each tank identification number. We assume an average loadings/day x 350 days/year = 2,100 loadings/year)
- ^j We assume that each respondent will take 6 minutes to record leak detection information twelve times per year.
- ^k Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

0.23 for clerical labor. These rates are from the United States

TOTAL (rounded) ^f					

Assumptions:

^a We assume that there are an average of 214 existing sources that are subject to the standard over the three-year period of 10 new or reconstructed or modified sources per year over the three-year period of this ICR.

^b This ICR uses the following labor rates: \$68.37 for managerial, \$50.72 for technical, and \$27.46 for clerical labor. These rates are based on the Management (OPM), 2020 General Schedule, which excludes locality rates of pay. The rates have been increased by 60 percent available to government employees.

^c New /modified/reconstructed sources are required to submit notifications of construction/reconstruction, actual startup, and

^d New sources are required to submit performance test results. We assume 10 percent of new sources will repeat the test due

^e The rule does not require periodic reporting.

^f Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

Number of Respondents					
	Respondents That Submit Reports		Respondents That Do Not Submit Any Reports		
	(A)	(B)	(C)	(D)	(E)
Year	Number of New/Reconstructed + Modified Respondents ^a	Number of Existing Respondents	Number of Existing Respondents that keep records but do not submit reports	Number of Existing Respondents That Are Also New Respondents	Number of Respondents (E=A+B+C-D)
1	0	214	0	0	214
2	0	214	0	0	214
3	0	214	0	0	214
Average	0	214	0	0	214

^a New respondents include sources with newly constructed, reconstructed and modified affected facilities.

Capital/Startup vs. Operation and Maintenance (O&M) Costs

The only type of industry costs associated with the information collection activity in the regulations are labor costs. There are no capital/startup or operation and maintenance costs.

Total Annual Responses

(A)	(B)	(C)	(D)	(E)
Information Collection Activity	Number of Respondents	Number of Responses	Number of Existing Respondents That Keep Records But Do Not Submit Reports	Total Annual Responses E=(BxC)+D
Initial notifications	0	1	N/A	0
