INTRO01

2022

About this survey:

The Centers for Disease Control and Prevention (CDC) invites you to participate in a national survey of newborn feeding practices at hospitals in the United States and Territories that provided maternity care in the past year. The survey is being conducted for CDC by Battelle, a national survey and research organization with extensive experience in the collection of health data. Participation of every hospital providing maternity care makes this survey representative of all maternity care hospitals in the United States and Territories. If your hospital provided maternity care at multiple locations, only report data for the specific physical location listed in your email invitation.

Your participation in the survey is completely voluntary.

Prior to submitting the survey, you will have the opportunity to provide your contact information so that you, the survey recipient, will receive one (1) electronic copy of your hospital's results. Providing your contact information is voluntary. Your contact information will in no way be connected to survey responses or scores.

How long will this survey take to complete?

The survey will take about 30 minutes to complete.

How will this information be used?

The purpose of this survey is to learn about newborn feeding practices at hospitals in the United States and Territories. After data collection is complete, your hospital will receive an individualized report containing a summary of survey results. Data will also be used to generate state-specific reports, national aggregate data tables, and may be used to answer other questions. Data may be released for additional approved purposes and may be shared with state health departments for the development of public health programs. Information from this survey will also assist CDC with program planning.

Are our survey responses kept confidential?

Your responses will be treated in a secure manner and will not be disclosed unless required by law. Your name, hospital name, and any other personal identifiers will not be included in either oral or written presentation of survey results. Responses will only be reported in summary form so individual responses cannot be identified.

Survey Instructions: Please use Google Chrome Browser to complete your survey

Survey Instructions:

Thank you for participating in this survey. You have been identified as the survey recipient for your hospital, which means that only you have access to the unique link to complete and submit the 2022 mPINC survey for your hospital.

We are asking you to fill out the survey with data from the 2021 calendar year (January 1, 2021 – December 31, 2021) or your hospital's fiscal year 2021. Unless otherwise specified, questions on the survey are asking about healthy newborns who are discharged to home (i.e., not transferred or admitted to the Special Care Nursery (SCN) or Neonatal Intensive Care Unit (NICU)).

This survey contains 6 core sections and an additional section for hospitals with an SCN or NICU. Each section should be completed by the most knowledgeable and appropriate staff. For example, the Mother-Baby Unit supervisor may be better able to answer one section, while the Lactation Services coordinator or NICU nurse manager may be better able to complete another section. See the table below for a list of people who may be helpful with completing different sections of the survey.

Titles of staff who may be appropriate to fill out sections of the survey include:

Mother-Baby Unit Manager / Supervisor
Labor and Delivery Unit Manager / Supervisor
Lactation Services Coordinator/ Lactation Specialist
NICU Nurse Manager
Staff nurse
Database Manager / Coordinator
Maternal and Child Health Physician Leaders

Some questions ask you to enter exact percentages; however, if your hospital does not formally track this information, please provide your best estimate.

Click [here](#) to download a blank copy of the survey. This version should only be used as a worksheet to record responses prior to entering and submitting them online. No paper copies of the survey will be accepted.

You may wish to work on this survey over a period of time, particularly if it will be completed by multiple staff. You can view all sections and pages in the survey and you may go back and forth and edit responses as needed. Your responses will only be saved after you have clicked **Next** at the bottom of the page. If you cannot complete the survey all at one time, click **Save**, and return at a later time. When you return, you may continue where you left off. Before submitting you will be able to review the questions and your answers. You will be notified before your final submission if you have missed any items.

Survey Tips:

- Click [here](#) to download/print a blank copy of the survey.
- Move between sections of the survey on the **Table of Contents** page by clicking the blue circle to the right of the section and then clicking **Next**.
- To move back and forth between questions within a section use the **Next** and **Previous** buttons.
- Do not click on your browser's back or forward button while taking the survey.
- Throughout the survey there will be pop-ups providing you with definitions and explanations; access these by hovering your mouse over the underlined text.

What to do if you have questions:

If you have any questions about the survey, please call the Battelle Survey Line toll free at 1 (866) 826-4176.

What to do when you have completed the survey:

Once you are finished with the survey, you will have the option to review and print your answers by selecting **Review Survey**. Once you are done reviewing or printing your survey, click **Next**. When you are ready to submit your survey, please select **Submit Survey** on the Table of Contents Page and click **Next**. You will be redirected to a screen thanking you for your submission. This action will send the survey to a secure database. Once you have submitted the survey, you will not be able to return to the survey. Surveys that are not submitted will not be eligible to receive a hospital report. **It is important to remember to click Submit and then Next to complete the submission process and ensure you receive a hospital report.**

Thank you for your contribution!
