I am calling today about a research study, called the Survey of Family Well-Being sponsored by the Administration for Children and Families (ACF). We are contacting youth, young adults, and adults, like

Expiration Date: 09/30/2021

yourself, who participated in another study sponsored by ACF called the National Survey of Child and Adolescent Well-Being (NSCAW) approximately 7 to 14 years ago.

We are following up with over 500 adults, young adults, and or youth for this new effort to understand the experiences of families who participated in the National Survey of Child and Adolescent Well-being.

People with many different backgrounds and types of families will be asked to participate in this new study. For this reason, we try to ask about lots of different possible family members, including birth or biological parents, adoptive parents, grandparents, other relatives, and siblings. If you were adopted, we would like to know more about that experience. This information will help develop services that may support children and families.

TI: IF RESPONDENT DOES NOT REMEMBER NSCAW PARTICIPATION, PLEASE SAY: *The last survey we conducted with your family was conducted in <INSERT YEAR OF LAST NSCAW INTERVIEW>. An interviewer visited your home and interviewed your family using a laptop computer.*

Before we begin, I would like to confirm that I have the correct person. Can you please tell me your date of birth?

Great, thank you for confirming this information. As I mentioned earlier, RTI talked to you or your parent as a part of a previous study many years ago (the National Survey of Child and Adolescent Well-Being). Now, in this new Survey of Family Well-Being, we are following up with those same participants approximately 7 to 14 years after the last time you or your family were interviewed.

We want to make participation as easy as possible for you. We offer two ways for you to participate based on your schedule and preference. You can participate by telephone or complete the survey online. Choosing the online version of the survey allows you to work at your own pace. I can provide the web survey link over the phone along with your PIN for accessing the survey. If you choose the telephone version, we can get started now or we can schedule an appointment for a later date. You will receive \$30 for taking part in this study.

Which option would you prefer?

Great, the interview by telephone will take approximately 30 minutes to complete. Your participation is voluntary, and all information will be kept strictly private, as federal law requires. You may choose to skip any question in the interview for any reason. The questions will ask about things that may have happened in your life before you were 18 years old.

Some questions may make you feel uneasy or feel various emotions, such as sadness. If so, we will give you a list of resources that you can contact where there are people who may be able to help to talk with you about your feelings.

OMB #: 0970-0555
Expiration Date: 09/30/2021

There are no costs associated with taking part in this study. You will receive \$30 for taking part in this study.

We keep your interview answers on a secure computer, your responses have an ID number instead of your name. We do not identify you by your name. Your information will be combined with information from other people taking part in the study.

There are two important exceptions to the privacy information:

- 1) If during the interview we think your life or health is in serious danger, we will contact someone qualified to assist you.
- 2) At some point in the future, a different research company may take over this study. If that happens, with your consent, we would give your information to the other company.

If we haven't contacted your parent yet, we ask for your help locating your mother or father for an interview. At that point, your parent may choose whether to participate in the study. To protect your privacy and that of your parent, neither of you will know the other's answers to the interview questions.

If you decide to participate, we ask you also for your permission to link the responses you give now with the responses that we collected when you participated years ago in the National Survey of Child and Adolescent Well-Being study. Prior to using or releasing this data for future research, we will de-identify it. "De-identify" means that we will remove or code any personal information that could identify you before files are shared with other researchers to ensure that no one should be able to identify you from the information we share.

Do you have any questions, or can we go ahead and get started?

- 1 = AGREES TO STUDY PARTICIPATION (GOTO Section A)
- 2 = DOES NOT AGREE TO STUDY PARTICIPATION (GOTO NO_TConsent)

We want to make sure you have a copy of these materials for your records. We can send a copy of the fact sheet and consent form to you either by email or through the mail. Which would you prefer?
