TITLE OF INFORMATION COLLECTION: Wilson-Fish TANF Coordination Project Performance Report Part A and B

PURPOSE:

This is a semi-annual program performance report to be submitted by the 21 grantees of the Wilson-Fish TANF Coordination Project (WF TCP). There are two parts to the report, Part A and Part B.

The purpose of the first part of the report (Part A) is to collect quantitative data to inform the Office of Refugee Resettlement (ORR) of the types of services each WF TCP grantee is providing and to whom. Additionally, Part A collects data on training, resource development, translations provided, and overall trends. Since this is a four year demonstration project, ORR will use this information to make decisions regarding future Wilson Fish programming by examining the impacts of the allowable services supported by this project have on the aggregate employment outcomes of refugee families in states that receive WF-TCP funding.

Part B is wholly qualitative and reflects on the activities that each grantee states they will accomplish for each reporting period. As the grant allows for maximum flexibility in what each program will look like for each grantee, this collection aims to find as much similarity across programs as possible while still holding each grantee accountable to their individual plans. Grantees will report semi-annually on the status of their individual proposed activities for that specific reporting period. ORR will use this information to track outcomes of grantees that are unique as well as analyze in more depth the services and outcomes reported on in Part A.

DESCRIPTION OF RESPONDENTS:

There are 21 grantees who are both state entities or non-profit agencies.

CERTIFICATION:

I certify the following to be true:

1. The collection is in compliance with HHS regulations.
2. The collection is non-controversial and does not raise issues of concern to other federal agencies.
3. Information gathered is meant primarily for program improvement and accountability.
