

ASPA COVID-19 PUBLIC EDUCATION CAMPAIGN

A campaign to increase vaccine acceptance and reinforce basic prevention measures

CET – Annotated Questionnaire (Wave 28)

Note: The questions below are the proposed questions for the twenty-sixth wave of the Weekly Current Events Tracker (CET). Questions highlighted in yellow will be asked every week; questions highlighted in blue will be rotated into the survey on a monthly basis; and questions highlighted in green are meant to be asked in Wave 28 only or are being asked again to update data on a variable of interest. We will be fielding new questions about parents concerns about school, support for mandates in schools, parents' trust in different sources of information, perceptions of getting vaccinated to protect others, Delta variant concerns, and booster shots.

ASPA will provide OMB with updates to the questionnaire for subsequent Waves.

We are interested in your opinion of a few messages about COVID-19 vaccination.

For each of the below messages, please indicate how much you agree or disagree with the following statement:

"I would share the information in the message with a friend or family member who wants to know more about COVID-19 vaccines."

//PROGRAMMING NOTE: randomize variables in grid//

| Variable Name | Variable Text | Variable Label |
|---------------|--|--|
| ptn_w28_1 | COVID-19 vaccines are recommended for people who are pregnant, breastfeeding, trying to get pregnant now, or might become pregnant in the future. | ptn_w28_1: Recommended for pregnant people |
| ptn_w28_2 | There's even more value in getting a COVID-19 vaccine now because of how fast the new Delta variant is spreading. | ptn_w28_2: Value in vaccine because of Delta |
| ptn_w28_3 | COVID-19 cases and hospitalizations are increasing rapidly across the country and almost all new cases are caused by the Delta variant. | ptn_w28_3: COVID-19 cases increasing rapidly |
| ptn_w28_4 | Young, healthy people are more likely to become infected with COVID-19 because of the Delta variant. | ptn_w28_4: Young and healthy people more likely to be infected |
| ptn_w28_5 | Masks help prevent the spread of COVID-19, including from the Delta variant. | ptn_w28_5: Masks prevent spread |
| ptn_w28_6 | The vaccine protects against the Delta variant. Even though the Delta variant is more contagious, vaccines prevent almost all cases of severe illness, hospitalization, and death from COVID-19. | ptn_w28_6: Vaccines prevent spread of Delta |
