*(Bald and Golden Eagle Protection Act, 50 CFR 22.23)*  
U.S. Fish and Wildlife Service

**NOTE:** A Federal Eagle Depredation Permit is required take Bald Eagles or Golden Eagles that have become injurious to wildlife, agriculture or other personal property, or for human or eagle health or safety. A depredation permit is intended to provide short-term relief from depredation damage until long-term measures can be implemented to reduce or eliminate the depredation problem through nonlethal control techniques. Long-term measures might include constructing enclosures or changing their design, alteration of habitat or features to remove attractants, or modification of land-use practices that attract eagles. You should review Title 50 Parts 10, 13, and 22.23 of the Code of Federal Regulations (CFR). You are responsible for reviewing and understanding these regulations before you request and accept a permit. These regulations can be found on our website at <https://www.fws.gov/birds/policies-and-regulations/permits/permit-policies-and-regulations.php>. You must be at least 18 years old to apply for this permit.

Please provide the information requested below. If additional information needs to be provided that does not fit in the designated spaces, add additional sheets to your application submission. You may use as many additional sheets as needed. Please number pages accordingly using the page number box provided at the bottom of the sheet, and the corresponding question number.

We may request additional information as appropriate to the activities you are requesting (50 CFR 13.21(d)). You should be as thorough and specific as possible in your responses. Incomplete applications will be returned. If you are requesting renewal, you still need to complete the entire application and provide all the requested information.

If you are requesting renewal, all required reporting must be up to date or the renewal will not be processed. The report form can be found at <https://www.fws.gov/forms/3-202-11.pdf>. If you are requesting renewal, you only need to provide information that has changed since your prior application.

As the permittee, you are legally responsible for ensuring that your subpermittees, staff, and volunteers adhere to the terms of your permit.

Federal Eagle Depredation permits cannot not be issued for longer than 90 days, except permits to authorize disturbance associated with hazing eagles from the vicinity of an airport, which may be valid for up to 5 years.
