SMO Option Period 1 Pre-test Findings Memo

The Food and Nutrition Service (FNS) is collecting this information in order to satisfy the congressionally mandated reporting requirements from State agencies on 21 COVID-19 nationwide waivers pursuant to section 2202 of the Families First Coronavirus Response Act (P.L. 116-127). This is a mandatory collection for both the States and the School Food Authorities. FNS will use the information to assess how the waivers improved services to children and to inform FNS's planning, policy, and guidance related to state and local meal service operations during future emergency situations and unanticipated school closures. Because the personally identifiable information (PII) requested under this collection will not be used to retrieve survey records or data, requirements of the Privacy Act of 1974 do not apply. Responses will be kept private to the extent provided by law and FNS regulations. According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0584-0607. The time required to complete the pre-test and debrief for both the State CN Directors and the School Food Authority Directors is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: U.S. Department of Agriculture, Food and Nutrition Service, Office of Policy Support, 1320 Braddock Place, 5th Floor, Alexandria, VA 22314, ATTN: PRA (0584-0607). Do not return the completed form to this address.

Subject: School Meals Operations (SMO) Study: Option Period 1 Pre-test Findings

A. Introduction

This memorandum describes key findings from the School Meals Operations (SMO) Study Option Period 1 pre-test of the surveys for State Agency Child Nutrition (CN) directors and School Food Authority (SFA) directors, and the revisions we made to these instruments based on pre-test findings.

Mathematica conducted the pre-test in June 2021 with three State CN directors in Colorado, Kansas, and Texas and six SFA directors in the same States. We selected the respondents based on their interest and availability to participate within the pre-test timeframe and, for SFA directors, we also selected respondents from SFAs that varied in size and urbanicity.

We emailed hard-copy versions of the surveys to confirmed respondents and instructed them to note any questions or instructions that were unclear or may be difficult to answer. For the State Agency CN Director Survey pre-test, we asked respondents to review, but not complete, the survey. This is because they had just completed the Base Period survey, which had similar content, and we expected that fully completing the Option Period 1 survey would be an unnecessary burden. For the SFA Director Survey pre-test, we asked respondents to complete the survey and track how long it took them. The revised versions of the State Agency CN Director and SFA Director Surveys used in the pre-test are provided in Appendices A and B, respectively. We conducted 30- to 60-minute debriefing interviews with each pre-test respondent to identify questions that were confusing or difficult to answer and recommendations for changes. State CN director and SFA director debrief protocols are in Appendices C and D, respectively.

B. State Agency CN Director Survey

1. Burden

The focus of the pre-test of the State Agency CN Director Survey was to obtain feedback on the quality of the survey items, rather than precise timing estimates. However, we did ask respondents for estimates of how long it took them to complete the Base Period survey, and to provide estimates of how long it would take them to complete the Option Period 1 survey. One respondent estimated that it will take 2 to 3 hours to compile all of the data and complete the survey. Another respondent estimated that it will take more than three hours. The third

respondent estimated that the survey may take up to 20 hours to complete. All respondents said the Base Period survey took them substantially longer than the estimated three hours, but all expected the Option Period 1 survey to be much easier to complete than the Base Period survey. They also noted that they were relieved to see the Option Period 1 survey questions were very similar to the Base Period questions, as they have revised the data they are collecting from local program operators to better respond to the survey. Based on respondent feedback and other efforts to reduce burden described below, we estimate that this survey should take respondents about four hours to complete, on average.

2. Modifications to the State Agency CN Director Survey

We asked for feedback on the Option Period 1 survey, as well as the Base Period survey that respondents completed between March and May 2021. We used feedback on the Base Period survey to make improvements to the Option Period 1 survey and the draft option period 2 survey.

Respondents reported that the Option Period 1 survey is generally easy to understand, and they appreciated that the format and questions are similar to the Base Period survey. They said that including the CN response numbers, extension information, waiver expiration dates, and links to FNS guidance in the waiver list is helpful.

Respondents also said they will be able to answer the new questions in sections E and F about changes to use of local program operations waivers and monitoring waivers, respectively, since September 2020 for the nationwide waiver extensions that were applicable to SY 2020-2021 or summer 2020, and appreciated that those questions request yes/no responses instead of the proportion of local program operators. They provided feedback on ways to make the survey easier to complete and identified questions that were difficult to answer.

Table 1 provides more details on pre-test respondents’ feedback on the survey and the changes we made to address their comments. In response to their feedback, we added features to streamline coordination across State agency staff, such as by providing responses to the Base Period survey and both Word and PDF versions of the survey, inserted additional instructions, including reminding respondents that best estimates and selecting “don’t know” are acceptable, revised questions to clarify wording and intent, simplified response options, and reduced the number of questions about each waiver.

Table 1. State Agency CN Director Survey: Respondent feedback and subsequent changes

Question	Respondent feedback	Survey changes
Overall	Respondents commented that the ability to export or review their answers prior to submission would help them ensure that the survey is accurate and complete.	We will look into adding this functionality.

Question	Respondent feedback	Survey changes
Overall	Respondents said it would be helpful to have a copy of their responses to the Base Period survey to ensure consistent responses, assist with leadership changes, and provide baseline information for the comparison questions.	We will offer SAs a copy of their responses to the Base Period survey with the advance and invitation emails. It will consist of an export of their raw survey data with guidance on how to interpret it.
Overall	Respondents requested a copy of the survey in a Word document, in addition to the PDF already provided, to facilitate coordination across staff and ease survey completion.	We will offer copies of the survey as both a Word document and PDF.
Survey navigation	One respondent suggested changing the web navigation, so respondents are brought to the beginning of the section each time they enter it, rather than picking up at their last unanswered question in that section.	We will make this change.
Multiple questions	One respondent commented that one challenge in completing the survey is that they are hesitant to select the “don’t know” response. Respondents also said it was challenging to provide approximate answers since they did not have actual data to support their responses.	We added instructions to the questions that read, ‘Please provide your best estimate. If you do not have this information, please select “Don’t know.”’
Multiple questions	One respondent commented that their LPOs changed which CN programs they used throughout the school year so providing numbers or estimates of proportions is challenging. They were not sure if the survey was asking about any LPO that used it during the time period.	Where appropriate, we clarified that we are asking about use of the waiver or specific implementation methods at <i>any time</i> in the timeframe specified.
Multiple questions	One respondent noted that it was time consuming to select a response for every item in the Base Period survey. They suggested that having an option to indicate an item applied to all programs would help ease burden.	We have simplified certain response options (from proportions to yes/no). For questions A8, V2, and V4, we added an “All” response option so respondents do not have to select each program separately. We also added the instruction, “If a factor contributed to operational challenges for all listed Child Nutrition Programs your State Agency administers, please select “All.”
Waiver list, E1, E2, E3, E4, E15, E16, E18, E19	One respondent noted that the closed enrolled area eligibility waivers are very different policy changes from the regular area eligibility waivers and suggested asking about them separately to avoid confusion.	We moved the questions about closed enrolled area eligibility waivers from E15-16 and E18-19 to questions E1-E4 and moved them to a separate grouping in the waivers list.
A2a, A2b, B2c, B2d, C1, D1	One respondent commented that response option 2, “Estimated number of SFAs, data not provided by all SFAs” was a limiting response and not entirely accurate for their situation. They suggested adding other reasons for providing an estimated number.	We removed the “data not provided by all SFAs/sponsors/institutions” from the “estimated number” response options throughout. We also removed “data provided by all SFAs” from the “accurate number” response options. It is not necessary to add other reasons; whether the number is actual or estimated is all that is needed.

Question	Respondent feedback	Survey changes
A3, A6a, A5b, B3, B4c, B5, C2, D2, E32, E36	One respondent suggested the response, “about half” may be confusing and a range of percentages to clarify what that should be interpreted as would be helpful.	No change. We recommend leaving the scale as is to maintain consistency with the Base Period survey. As noted above, we have added instructions to the questions that read, ‘Please provide your best estimate. If you do not have this information, please select “Don’t know.”’ to aid respondents.
B4c item b	One respondent commented that the term “school buildings” is limiting since the CACFP At-Risk Afterschool Program is not offered in school buildings in their State.	We added “or afterschool program” to the item so it reads, “Grab-and-go tables or kiosks in school or afterschool program buildings.”
C1, C2	One respondent commented that the decision to use this waiver is at the State level so all SFAs use it.	We changed question C1 to ask, “Did your State Agency waive the identified Child Nutrition Programs reporting requirements for all SFAs in your State?” If they respond yes, we will have the total number of SFAs from the administrative data. If respondents select no, they’ll be asked, “You indicated that you did not waive the identified Child Nutrition Programs reporting requirements for all SFAs in your State. For what types of SFAs were the reporting requirements waived?” We also deleted question C2.
C3	Respondents commented that the wording of this question was confusing because the waiver did not affect the information they reported, but rather it waived the requirement to report specific elements.	We changed the question to ask, “Did your State Agency use the <i>Child Nutrition Programs reporting requirements</i> waiver for any of the following in SY 2020-2021?”
Section E and F summer 2021 questions	One respondent suggested defining “summer” with example months.	We added the note, “By summer 2020, we generally mean the months of May through September 2020.”
E2, E4, E6, E12, E16, E19, E23, E25, F2, F7	One respondent expressed concerns about the “No change” response option as they would not be able to definitively say there was no change in the number of LPOs that used the waiver.	We changed the response option from “No change” to “About the same number of LPOs used the waiver in SY 2020-2021.”
E2, E4, E6, E16, E19, E23, F2	One respondent noted that they forgot the comparison time period when completing the grids.	We added a row that reads, “ <i>Compared to March through September 2020</i> ” to remind respondents of the question.
B5, E17, E17a, E20, E20a	One respondent explained that they thought these questions were about approaches used to identify area eligible sites, not about new approaches used because of the waiver.	We changed the questions to clarify that we are asking about “new meal sites made area eligible under the waiver.”

Question	Respondent feedback	Survey changes
G4	Respondents commented that they were unsure whether they would be able to answer this question because they may not have comprehensive information on how effective the CN Emergency Operational Costs reimbursement payments were in stabilizing the financial health of LPOs or making up for their lost revenues during the public health emergency in spring 2020.	We added a “don’t know” response option here.
V4	One respondent commented that their SA’s challenge was not insufficient funds but the rules around spending their SAE and SAF funds.	We split item d into two separate items: “d. Insufficient State administrative expense funds (SAE) or State administrative funds (SAF) e. Rules regarding use of State administrative expense funds (SAE) or State administrative funds (SAF)”

CACFP = Child and Adult Care Food Program; LPO= Local program operators; SAE=State administrative expense funds; SAF=State administrative funds; SFA= School Food Authority; SA=State Agency.

C. SFA Director Survey

1. Burden

Five of the six respondents were able to complete the survey within the target burden estimate of 60 minutes. Table 2 shows each respondent’s completion time. Pre-test respondents completed the survey on hard copy. Several respondents noted that they expect the survey will be faster to complete in the web version due to automatic skip logic. We therefore do not recommend adjusting the estimated burden.

Table 2. SFA Director Survey pre-test completion times (in minutes)

Respondent	Overall	Section 1	Section 2	Section 3	Section 4	Section 5
1	54	26	9	1	14	4
2	38	15	6	0	11	6
3	78	40	10	9	14	5
4	45	27	5	1	8	4
5	56	36	6	1	10	3
6	48	20	15	1	10	2

2. Modifications to the SFA Director Survey

Overall, respondents reported that the flow of the survey was straightforward, and the questions were clearly written. Respondents provided feedback on the wording of some questions and offered suggestions for additional response options. In response to their feedback, we inserted additional instructions, revised certain questions to clarify wording and intent, and added or

modified response options to specific questions. Table 3 provides more information on pre-test respondents' feedback on the survey and the changes we made to address their comments.

Table 3. SFA Director Survey: Respondent feedback and subsequent changes

Question	Respondent feedback	Survey changes
1.1	One respondent noted that there is a school in their district that serves special needs students beyond 12th grade. They were not sure based on our instructions whether that type of school meets the definition of "other."	We added a clarification to include any schools with grades K—12 and/or K—13 to the definition of "Other" school types.
1.2	<p>Respondents suggested it would be helpful to clarify the difference between CACFP at-risk afterschool and CACFP outside-school-hours components and between the USDA DoD Fresh Fruit and Vegetable Program and the Fresh Fruit and Vegetable Program.</p> <p>One respondent found the NSLP acronym in the name for the Seamless Summer Option (SSO) confusing because the program also provides breakfasts.</p>	<p>We added definitions of the CACFP At-Risk Afterschool Meals and CACFP Outside-School-Hours Care components, as well as the USDA DoD Fresh Fruit and Vegetable Program and the Fresh Fruit and Vegetable Program.</p> <p>We removed the acronym, "NSLP" from the Seamless Summer Option to avoid potential confusion.</p>
1.3-1.5	Respondents suggested using acronyms for SFSP and SSO in this set of questions, because they are not used to seeing SFSP & SSO fully written out.	We replaced the full names for Summer Food Service Program and Seamless Summer Options with SFSP and SSO in questions 1.3 and 1.4. The full names of both programs are introduced in question 1.2.
1.9	One respondent suggested providing clarification for the response option "Conduct outreach" because outreach could mean providing information on the website or brochures, which is a separate response option.	We changed "Conducted outreach" to "Conducted other outreach" and moved this option to the bottom of list.
1.11	Respondents suggested two new response options for this question, one to capture not having enough information to answer parent questions and another to capture that the P-EBT is a new program to learn and implement.	We added two new response options to this question: "Insufficient information or guidance from State about benefits" and "Quickly implementing a new program."
1.13-1.16	Respondents reported that the phrase "students attending full time in person (no virtual instruction was provided)" is unclear because some schools allowed students to attend in person (in the school building), but instruction was provided virtually, outside of the classroom. For example, a classroom teacher may provide instruction to a portion of the students in the classroom, while the remaining students attend virtually from another area of the building, such as the library, to allow for smaller classroom sizes and social distancing.	We changed the language in question 1.13 from "...did schools in your SFA have students attending full time in person (no virtual instruction was provided) for all or part of the year" to, "...did schools in your SFA provide instruction to all students in school buildings for all or part of the year?". We also revised questions 1.14 through 1.16 to reflect this change to the language in 1.13.

Question	Respondent feedback	Survey changes
1.17	One respondent asked if “full time in-person” also included hybrid, since some students were full-time in person during the hybrid approach described above for question 1.13.	We revised the language in the question from “...did some or all students attend school in person...” to “did some all or all students receive instruction in school buildings (including full-time in person and hybrid).”
1.18-1.19	Several respondents requested clarification of the definition for bulk foods and were unsure if methods used by the schools in their SFA met this definition if only one component of the meal (such as milk) is delivered in bulk.	We clarified the hover text definition for bulk food packages by adding “one or more items” to the definition.
1.20	One respondent suggested it would be helpful to have a link to the FNS waiver guidance.	We added a link to FNS’s webpage for the Child Nutrition COVID-19 Waivers.
1.24	Two respondents suggested adding a response option to capture items offered in bulk food packages that do not require preparation.	We added a response option for, “No preparation required” to the response options.
1.25	One respondent suggested “circle sheets” as another meal counting method used by their SFA.	We added “Circle sheets, or other form for meal counting” to the list of response options for this question, and for the comparable question in section 4 (4.4).
1.29	One respondent wasn’t sure if the question was about access to food from a school garden for taste-testing purposes or using food from a garden as part of a reimbursable meal.	We added “reimbursable” meals to the question to clarify.
1.31	<p>One respondent suggested including response options for unclear and untimely guidance from FNS or the State as separate options.</p> <p>Another respondent suggested removing or separating, “and using alternative meal delivery methods” from response option g, which was “staffing meal sites and using alternate meal delivery method.” They clarified that they had staffing issues, but not related to alternative meal sites.</p>	<p>We split out separate response options for unclear guidance from FNS and the State and untimely guidance from FNS and the State (four options total).</p> <p>We removed “...and using alternative meal delivery methods” from response option g to allow respondents to select this option if staffing any meal site was a factor that contributed to operational challenges. We also added the text “and using” to response option d to allow SFAs to report that using alternative meal sites was a factor that contributed to operational challenges.</p> <p>We made the same revisions to the comparable question in section 4 (4.12).</p>
Section 2 overall	Respondents found this section easy to answer overall. One respondent referred to their financial records to answer questions in this section.	None.

Question	Respondent feedback	Survey changes
2.5	One respondent suggested adding “CN General Fund” as a response option for additional funding sources.	We revised the “District general fund” option to “District or Child Nutrition general fund.”
2.6 through 2.11	Several respondents were not sure what the “Child Nutrition Emergency Operational Costs reimbursement payments” were and if they applied to them. One respondent suggested changing the terminology to “lost revenue reimbursements” or providing a link for more information.	We added link to the guidance document on FNS’s website.
Section 3 overall	None of the respondents who participated in the pre-test currently have FSMC contracts. One respondent with prior experience working at an FSMC said the questions in this section should be straightforward for SFA Directors with an FSMC contract to answer.	None.
Section 4 overall	Overall, respondents felt this section would be easy to answer in early 2022 and reflect the timeframe of October through December 2021.	None.
4.5	One respondent suggested adding an option to reflect operational changes that increased use of prepackaged or heat and serve meals and decreased meals prepared from scratch.	We added an option for “Increased use of heat and serve meals (versus prepared from scratch)” to this question.

CACFP = Child and Adult Care Food Program; CN = Child Nutrition; FSMC = Food service management company; NSLP = National School Lunch Program; P-EBT = Pandemic Electronic Benefit Transfer; USDA DoD Fresh = USDA Department of Defense Fresh Fruit and Vegetable Program.

State Agency Director Survey - Revised

State Agency Child Nutrition Director COVID-19 Waiver Collection: Waivers used in School Year 2020-2021 and Summer 2021

June 2, 2021

Sponsored by:

U.S. Department of Agriculture
Food and Nutrition Service

Introduction

The U.S. Department of Agriculture (USDA), Food and Nutrition Service (FNS), has contracted with Mathematica to conduct the School Meals Operations (SMO) Study. This survey is collecting information on the statutory reporting requirements for the nationwide Child Nutrition COVID-19 waivers that FNS first authorized during school year (SY) 2020-2021 and changes in use of nationwide Child Nutrition COVID-19 waivers that were extended through SY 2020-2021.

The nationwide COVID-19 waivers apply to the following Child Nutrition Programs:

- National School Lunch Program (NSLP)
- School Breakfast Program (SBP)
- Seamless Summer Option (SSO)
- Summer Food Service Program (SFSP)
- Child and Adult Care Food Program (CACFP)*

Federal statute requires each State Agency that oversees these programs to report on:

1. The use of each waiver by the State Agency and local program operators, and
2. A description of whether and how each waiver resulted in improved services to children.

** This study is focused on Child Nutrition Programs and is not collecting information on use of the waivers for CACFP operations in adult day care centers.*

Full participation in the SMO Study will satisfy your State Agency's reporting requirements for the nationwide Child Nutrition COVID-19 waivers used during SY 2020-2021.

The information you provide will be kept private to the full extent allowed by law. This means that your personal information will be kept private and not associated with any of your responses about your agencies' operations. The responses you provide about operations may be tabulated separately for each State so that the public will be able to determine how your agency operates the Child Nutrition Programs.

We thank you in advance for your time and cooperation in this important study. If you have any questions about the study, please email [STUDY EMAIL] or call Mathematica toll-free at [STUDY PHONE LINE].

Waivers

Waiver list

The fall 2021 School Meals Operations (SMO) Study survey will focus on the reporting requirements associated with the nationwide waivers that were first authorized during SY 2020-2021. In addition, to ensure that reporting requirements are satisfied for extensions of the nationwide waivers covered in the first SMO survey (conducted in spring 2021), this survey will collect information on changes in waiver use since September 2020 for the nationwide waiver extensions that were applicable to SY 2020-2021 or summer 2021.

Note that this survey does not focus on the reporting requirements associated with the nationwide waivers used during SY 2021-2022. The summer 2022 School Meals Operations (SMO) Study survey will collect that information.

Below is the waiver list that includes the full, formal name of the waiver with a link to the FNS guidance and, underneath, the shortened waiver name that will be used in the survey for simplicity. The shortened names include the waiver number, a short description, the extension number, and the waiver end date.

X. Waivers First Authorized in SY 2020-2021

ALL

X1. FNS first authorized certain nationwide Child Nutrition COVID-19 waivers during SY 2020-2021. The next few sections of this survey focus on the reporting requirements associated these waivers. Which of these nationwide waivers did your State Agency use in SY 2020-2021?

We understand that you reported to FNS which waivers your State used in SY 2020-2021. However, questions in this information collection will be based on your answers to this question. Your answers ensure this effort gathers the information needed for your State Agency to meet the statutory reporting requirements for each waiver.

FNS guidance on each of the waivers is available here [[link to Waivers List page](#)].

School Food Authority (SFA) Director Survey

School Year 2021–2022

June 9, 2021

Sponsored by:

U.S. Department of Agriculture
Food and Nutrition Service

Introduction

The U.S. Department of Agriculture (USDA) Food and Nutrition Service (FNS) has contracted with Mathematica to conduct the School Meals Operations (SMO) Study. Updated information about school-based Child Nutrition (CN) Programs will help FNS effectively oversee these programs and inform both policy decisions and future training and technical assistance.

Because the COVID-19 pandemic changed the way that school-based CN programs operated during school year (SY) 2020–2021, this survey includes questions about how the pandemic affected program operations and finances.

The survey topics include:

- Meal service and operations during SY 2020–2021
- Financial impacts of the COVID-19 pandemic
- Program operations at the start of SY 2021–2022
- Food service management company (FSMC) contracts

Cooperation by States and districts is required under Section 28 of the Richard B. Russell National School Lunch Act. At the same time, recognizing the administrative effort associated with participating in research studies, SMO has been designed to limit participant burden to the extent possible. **It should take about an hour to complete the survey.**

To avoid redundant information requests, the survey focuses only on questions that cannot be answered with administrative data you have already reported to your State agency on CN program participation. The study team will receive those data from your State agency. [DELETE IF “CERTAINTY SAMPLE SFA”: Also, although this study may continue for two more years, your SFA is only being asked to participate once during the three-year period. The responses of each SFA in the annually selected nationally representative sample will therefore speak for many SFAs.]

All information collected for this study is for research purposes only and will be kept private to the full extent allowed by law.

We thank you in advance for your time and cooperation in this important study. If you have any questions about the study, please email [STUDY EMAIL] or call Mathematica toll-free at [STUDY PHONE LINE].

Thank you for taking the time to speak with me today for the review of the State Agency Child Nutrition Director survey for the School Meals Operations study. Do you have a copy of the survey in front of you?

If no: It will help our discussion if you have it in front of you. I can give you a minute to get it. (I can also email you a new copy of the survey now if necessary.)

As we mentioned, this call should take between 30 and 60 minutes. Our goal today is to get your feedback on the survey, particularly if anything is confusing or difficult to answer, and your suggestions for revisions. We will first talk about your reactions to the survey overall, and then we will ask about specific survey questions. We'll use your feedback to improve the survey.

Do you have any questions for me before we begin?

Would you mind if I recorded our conversation to make sure I capture everything accurately?

1. First, I want to confirm that you administer [CN Programs from base year sample file]. Is that still correct?
 - a. For context, when you think about your State as a whole, which programs were typically used to provide meals to children during SY 2020-2021? (E.g. SFSP or SSO, NSLP and SBP, etc.)
2. Before we get into the questions in the survey you reviewed, I'd like to hear your thoughts on the SMO State Agency Child Nutrition Director COVID-19 Waiver Collection survey you completed earlier this spring.
 - a. Thinking back, were there any questions or sections of the survey that were particularly difficult to answer?
 - b. Was there anything about the online format that was challenging? And, if so, do you have any suggestions for changes that would ease survey completion?
3. Turning to the new SMO State Agency Child Nutrition Director survey we sent you to pretest, I wanted to start by asking you what you thought of the questions overall. Take a moment to flip through the pages.
 - a. What did you think of the organization and flow of questions?

Meals for Children and the *Nationwide Waiver to Extend Area Eligibility Waiver* since September 2020, were there any questions that would be difficult to answer in this series?

- a. Were there any questions you recommend changing or adding more response options to in this section?
10. Looking at the series of questions starting with E21 (pages 39-45), which asks about changes in use of the *Nationwide Waiver to Allow Meal Pattern Flexibility in the Child Nutrition Programs* since September 2020, were there any questions that would be difficult to answer in this series?
- a. Were there any questions you recommend changing or adding more response options to in this section?
11. Looking at section F (page 46), which asks about changes to use of monitoring waivers since September 2020, are there any questions that may be difficult to answer in this section?
- a. Is it difficult to answer questions about how things have changed since September 2020?
 - b. Are there any questions you recommend changing or any response options you suggest adding in this section?
12. Questions F3, F5, and F7 (starting on page 47) ask about changes to the types of monitoring conducted by local program operators in SY 2020-2021 and summer 2021. Would you be able to answer these when we field the survey this fall? Why or why not?
- a. If no: probe on what information they would be able to provide.
13. Section G (page 47) asks about use of emergency funding. Would any questions in this section be confusing or difficult to answer when we field the survey?
- a. Are there any questions you recommend changing or any response options you suggest adding in this section?
14. Section V asks about challenges your State Agency experienced during SY 2020-2021 and summer 2021. Would any questions in this section be confusing or difficult to answer when we field the survey this coming fall?
15. Lastly, based on your review of this survey and your experience completing the SMO State Agency Child Nutrition Director survey in the spring, how long do you estimate this survey would take to complete? (Clarify time to fill out survey vs. time to gather information)

Those are all the questions I had for you. Is there anything else you'd like to add?

Thanks again for your feedback and all your help with this study.

Thank you for taking the time to speak with me today for the pre-test of the SFA Director survey for the School Meals Operations study. Do you have a copy of the survey in front of you? I also have a copy of your survey responses too, for reference.

If no: It will help our discussion if you have it in front of you. I can give you a minute to get it. (I can also email you a new copy of the survey now if necessary.)

As we mentioned, this call should take between 30 and 60 minutes. Our goal today is to get your feedback on the survey, particularly if anything was confusing or difficult to answer, and your suggestions for revisions. We will first talk about your reactions to the survey overall, and then we will ask about specific survey questions. We'll use your feedback to improve the survey. As a reminder, your responses you entered in the survey are only for the pre-test and will not be analyzed or reported.

Do you have any questions for me before we begin?

Would you mind if I recorded our conversation to make sure I capture everything accurately?

1. I wanted to start by asking you what you thought of the questions overall. Take a moment to flip through the pages.
 - a. What did you think of the organization and flow of questions?
 - b. Were there any specific questions or response options that might be confusing for respondents?
 - i. *If yes:* What do you think is confusing? How do you think we should change the question or response options to make it less confusing?
 - c. Were there any questions that did not offer a response option you needed?
 - i. *If yes:* What response options do you think we should add?
 - ii. Were there any questions you did not know how to answer?
 1. *If any questions left blank:* I see you left questions [numbers] blank. Can you tell me why?

2. About how long did it take you to answer the entire survey, including time spent gathering information?
 - a. *If more than 60 minutes:* did any sections take particularly long to complete?
3. Looking at section **1, Meal Service and Operations in SY 2020-2021**, were there any questions that were difficult to answer in this section?
 - a. [*Ask only if not recorded on survey*] How long did this section take to complete?
 - b. Were there any questions that took a long time to answer?
 - c. Were there any questions or terminology you recommend changing in section 1?
4. In 1.1, what did you think of the instruction about school types and levels? *Probe:* Was it helpful or confusing?
 - a. [*If respondent selected "Other schools"*] Was providing grade levels for Other Schools in the box provided easy or difficult for you to answer?
5. In 1.3 through 1.5 we asked about factors that influenced your SFA's decisions to use SFSP, SSO or NSLP and SBP, what did you think of the list factors provided?
 - a. Did they adequately capture factors that influenced your decisions or are there any other factors or reasons we should include?
 - b. Were there any factors listed that seemed odd or did not make sense?
6. In 1.13 through 1.17, we asked about whether your SFA's schools provided instruction in-person, virtually, or through a hybrid model in SY 2020-21
 - a. [*If respondent selected 1 or 2 for 1.14*] Can you tell more about how you chose your answer? What does "students attending full time virtually for all or part of the year" mean to you in this question?
 - i. If we were to rephrase option 1 in 1.14 to say, "Yes all or some schools had **all** students attending virtually full time all year", what would that option mean to you?
 - ii. Do the phrases, "students attending remotely" and "students attending virtually" mean different things to you? [*If yes*], could you please tell me more about that?

- b. *[If respondent selected 1 or 2 for 1.15]* Can you tell more about how you chose your answer? What does “schools using a hybrid model for all or part of the year” mean to you in this question?
 - c. *[If respondent selected 0 for both 1.14 and 1.15]* Can you tell more about how you chose your answer? Confirm: Did all students in your SFA attend full-time in person for the entire year?
 - d. Can you tell more about how you chose the answer for 1.16?
 - i. Was this question easy or difficult for you to answer?
 - e. Can you tell more about how you chose the answer for 1.17?
 - i. Was this question easy or difficult for you to answer?
7. In questions 1.18 and 1.19 we ask about the methods used to provide meals to children. Did the methods listed accurately capture the methods used by schools in your SFA, or are there others we should include?
- a. Were there any methods listed that seemed odd or did not make sense?
8. Questions 1.22 through 1.24 ask about the bulk food packages.
- a. Were there any questions or terminology you recommend changing in the section on bulk food packages?
9. Question 1.31 asks about factors that contributed to operational challenges.
- a. Did this list adequately capture factors that contributed to operational challenges, or are there any other factors we should include?
 - b. Were there any factors listed in this question that seemed odd or did not make sense?
10. Looking at section **2, Financial impacts of the COVID-19 pandemic on SFAs**, were there any questions that were difficult to answer in this section?
- a. *[Ask only if not recorded on survey]* How long did this section take to complete?

 - c. Were there any questions that took particularly long to answer?
 - d. Were there any questions or terminology you recommend changing in section 2?

11. Question 2.2 asks about factors that contributed to financial challenges.
 - a. Did this list adequately capture factors that contributed to financial challenges, or are there any other factors we should include?
 - b. Were there any factors listed in this question that seemed odd or did not make sense?
12. Question 2.4 asks about the most expensive meal service methods for your SFA during SY 2020-2021. Was this question easy or difficult for you to answer?
13. Question 2.5 asks about additional funding sources or methods used by your SFA to cover the cost of providing meals in SY 2020-2021.
 - a. Did this list adequately capture additional funding sources or methods used by your SFA, or are there any other funding sources or methods we should include?
 - b. Were there any funding sources or methods listed in this question that seemed odd or did not make sense?
14. Questions 2.6 through 2.11 ask about Child Nutrition Emergency Operational Costs reimbursement payments, were there any of these questions difficult to answer?
 - a. Can you tell more about how you chose the answer for 2.11?
 - i. Was this question easy or difficult for you to answer?
15. Looking at section **3, Food service management company (FSMC) contracts**, were there any questions that were difficult to answer in this section?
 - a. *[Ask only if not recorded on survey]* How long did this section take to complete?
 - b. Were there any questions that took particularly long to answer?
 - c. Were there any questions or terminology you recommend changing in section 3?
16. Section **4, Program operations**, asks about program operations as of October through December of 2021, since we are planning to conduct this survey in early 2022. Were there any questions that were difficult to answer in this section?
 - a. *[Ask only if not recorded on survey]* How long did this section take to complete?
 - b. Were there any questions that took particularly long to answer?
 - c. Were there any questions or terminology you recommend changing in section 4?

17. Question 4.2 asks about Child Nutrition Programs schools in your SFA participated in during October through December 2021. Was this question easy or difficult for you to answer?
18. What did you think of the response options provided in 4.5?
 - a. Are there any response options we should add here?
 - b. Were there any response options that did not make sense

Those are all the questions I had for you. Is there anything else you'd like to add?

Thanks again for your feedback. It will be very helpful as we make our revisions.
