Needs and Uses: This request is for a revision and extension of a currently approved information collection through the *Environmental Compliance Questionnaire for National Oceanic and Atmospheric Administration Federal Financial Assistance Applicants* (Questionnaire). This Questionnaire is used by the National Oceanic and Atmospheric Administration (NOAA) to collect information about proposed activities for the purpose of complying with the National Environmental Policy Act (“NEPA,” 42 U.S.C. 4321–4370) and other environmental compliance requirements associated with proposed activities. NEPA requires federal agencies to complete an environmental analysis for all major federal actions, including funding non-federal activities through federal financial assistance awards where federal participation in the funded activity is expected to be significant. The Questionnaire is used in conjunction with NOAA Notices of Funding Opportunity (NOFO).

The NOFO will indicate the specific questions to which an applicant must respond in one of three ways: (1) The applicable questions are inserted directly into the NOFO with reference to the OMB Approval Number (0648–0538) for this form; (2) the NOFO will specify which questions (*e.g.*, 1, 2) an applicant must answer, with the entire OMB-approved Questionnaire attached to the NOFO; or (3) applicants to be recommended for funding will be required to answer relevant questions from the Questionnaire. The federal program officer will determine which questions are relevant to each specific applicant. Answers must be provided before the application can be submitted for final funding approval. This Questionnaire has been revised to (1) remove repetitive questions; (2) revise specific questions to use plain language; and (3) add 18 new questions that would be helpful to a wider range of NOAA programs.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Marine Fisheries Service (NMFS), Office of Protected Resources, is sponsoring a request for extension of a currently approved information collection.

Under the Endangered Species Act (ESA), determinations whether to list species as endangered or threatened must be based on the best scientific and commercial data available, including consideration of those efforts, if any, being made by any state or foreign nation (or any of their political subdivisions) to protect the particular species. On March 28, 2003, NMFS and the U.S. Fish and Wildlife Service (the “Services”) announced a final policy on the criteria the Services will use to evaluate certain conservation efforts by states, tribes, and other non-federal entities when making listing determinations under the ESA (68 FR 15100). The conservation efforts usually involve the development of a conservation plan or agreement, procedures for monitoring the effectiveness of the plan or agreement, and an annual report.

The development of conservation plans could prevent some species from becoming so imperiled that the only recourse is to add them to the list of threatened and endangered species under the Endangered Species Act. The purpose of this policy is to encourage such plans and to give applicants guidance about how NMFSs will evaluate such plans. This policy identifies criteria for evaluating the certainty of implementation and effectiveness of a conservation effort. NMFS developed this policy to ensure consistent and adequate evaluation of agreements and plans in making listing decisions and to help States and other entities develop agreements and plans that will be adequate to make listing species unnecessary.
