

passenger responses in the airport gate area at a major gateway airport; and the fifth test again tested passenger PEDs (mobile phone) through use of a 'QR' code since there have been improvements in Wi-Fi capabilities. Other tests are planned in the foreseeable future based on recommendations from the United States Travel and Tourism Advisory Board (TTAB).

The 2020 Pandemic (Corona Virus Disease 2019 or COVID-19) brought devastation to the United States and world economies. The travel and tourism industries were particularly hit hard, creating havoc with airline and airport-based data collection methods. International travel restrictions, cessation of international flight operations and airport barriers to entry for non-passenger personnel severely limited the U.S. Department of Commerce's ability to survey the number of passengers that were able to travel. (Note: travel to/from the United States was down - 88% and - 78%, respectively, in 2020).

Use of the QR code/Mobile phone approach was used selectively in situations when passenger respondents declined the paper survey due to perceived COVID-19 transmission concerns. In other situations, U.S. Department of Commerce field services administered a short form version of the questionnaire when time at the gate was limited. (Note: field service personnel were attired with appropriate personal protective equipment (PPE) and followed strict mitigation protocols).
