

Rachel Pearlina Award Nomination Form

The Rachel Pearlina Award honors Rachel Pearlina, MD, MPH. Dr. Pearlina was a revered oncology fellow who received the award named in her memory in 2016 following her death at the age of 38, in November 2015, from gastric cancer. While in medical school, she completed rotations in South Africa, Haiti, Romania, and rural China where she learned to speak Mandarin fluently. For her work, she received a prestigious Fogarty International Clinical Research Fellowship and Tulane University's award for "Outstanding International Relationships." Dr. Pearlina was virtuously committed to global cancer control and provided quality care to her patients. She viewed the practice of medicine as a privilege, always striving to serve her patients better.

In honor of Dr. Rachel Pearlina, the 10th Annual Symposium on Global Cancer Research Steering Committee would like to invite nominations for the 7th Annual Rachel Pearlina Award. As part of the Symposium each year, we recognize one outstanding professional who embodies virtue and eminence in cancer research, practice, and/or training in a low- and middle-income country (LMIC) setting. The Steering Committee invites nominations of individuals, at any stage in their career, who have made major contributions to global cancer research, practice, and training. The nominee should be affiliated with an institution from a LMIC and their work should focus on cancer research, practice, and/or training in an LMIC setting.

The nominee will be recognized at the virtual Annual Symposium on Global Cancer Research on March 25, 2022. The nominee will be expected to take part in the award presentation ceremony as well as to give a keynote address that highlights their contributions to cancer research, practice, and/or training in an LMIC setting, and their future perspectives.

The Steering Committee will review nominations based on the following criteria:

1. Demonstration of commitment to and excellence in cancer research, practice, and/or training in an LMIC setting
2. Focus on reducing cancer care inequities through cancer research, practice, and/or training in an LMIC setting
3. Cancer control research, practice, and training activities either entirely or predominantly implemented in LMICs
4. Career stage and potential to contribute to cancer control in LMICs in the future

Additional eligibility criteria:

Nominations submitted in previous years are accepted

Self-nominations are accepted

Nominee must confirm willingness/ability to accept the award and deliver a keynote address, virtually, at the Symposium in advance of nomination submission (confirmation to be stated within the nomination form).

Timeline

The nomination period is November 8, 2021 through December 10, 2021.

The nominee will be selected and notified in January 2022.

OMB # 0925-0766

Expiration Date: 04/30/2023

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-0766). Do not return the completed form to this address.
